Just asking the question gets you labeled a conspiracy theorist. But it is a question that merits a discussion and central to that chat is Bill Gates.

The following image has the left in full fury and frenzy. Sites like **SNOPEs** and **Lead Stories-FactCheck** insist it is a hoax or that Bill Gates is being taken out of context.

By Helena Handbasket - May 2nd 2021-

This original article was first published in Issue 4 of The Sovereign independent in June 2011. The lady in the image above was astute enough to keep a hold of the original printed newspaper. The link for free download is at the bottom of this article.

So let me present the actual facts (I will link to source and you can check it out for yourself).

Bill Gates did a TED Talk in 2010 with the title, **Innovating to Zero**.

In the course of that talk Gates said the following:

*First, we've got population. The world today has 6.8 billion people. That's headed up to about nine billion. Now, if we do a really great job on new vaccines, health care, reproductive health services, we could lower that by, perhaps, 10 or 15 percent. But there, we see an increase of about 1.3.*

So even though SNOPEs and FactCheck scream this is a hoax, Gates did say it and the Sovereign Independent quoted him accurately. But the defenders of Gates insist it was taken out of context, so I will put it into full context.

The Bill and Melinda Gates foundation is dedicated to vaccines and seeds. Not my words, that is what Bill Gates said at the start of his Ted Talk:

***I'm going to talk today about energy and climate. And that might seem a bit surprising, because my full-time work at the foundation is mostly about vaccines and seeds, about the things that we need to invent and deliver to help the poorest two billion live better lives.***

Next, Gates identifies CO<sub>2</sub> aka global warming as the central threat:

***CO<sub>2</sub> is warming the planet, and the equation on CO<sub>2</sub> is actually a very straightforward one. If you sum up the CO<sub>2</sub> that gets emitted, that leads to a temperature increase, and that temperature increase leads to some very negative effects:***

He then identifies his equation with four factors that will determine whether or not we get to zero CO<sub>2</sub>:

*First, we've got population. The world today has 6.8 billion people. . . .*

*The second factor is the services we use. . . .*

*Now, efficiency, “E,” the energy for each service – here, finally we have some good news. . . there are a lot of services where you can bring the energy for that service down quite substantially. Some individual services even bring it down by 90 percent. . . .*

*[T]his fourth factor – this is going to be a key one – and this is the amount of CO2 put out per each unit of energy.*

Bill Gates specifically mentioned vaccines as one factor that would help reduce population. That is not how a vaccine is supposed to work. A vaccine is supposed to immunize recipients against disease and make them healthy. Healthy people reproduce. That increases population, at least over the mid-term.

Some Gates defenders argue that he was simply arguing for slowing population growth:

*So, what about the remarks about “new vaccines, health care, reproductive health services”? That is just what specialists studying population growth are saying. As people get richer they get more access to better healthcare so they stop having lots of babies because the risk of their children dying at an early age takes a steep dive. This means the total population stabilizes and stops growing after a while.*

Allegations of the Gates Foundation using poor women of color as guinea pigs emerged in 2010 in Ghana:

*. . . a former staffer with a government health initiative in Ghana made a **shocking claim**: a project partially funded by the Gates Foundation had tested the contraceptive Depo-Provera on unsuspecting villagers in the*

*remote region of Navrongo, as part of an illicit “population experiment.” The woman making the charge was the Ghanaian-born, U.S.-educated communications officer for another Gates-funded initiative by the Ghanaian government and Columbia University to use mobile phones to improve health care access for rural women and children. She had previously attempted to sue her employer for a multi-million dollar settlement when, after repeated clashes with her boss, her contract wasn’t renewed.*

While this claim remains a topic of much dispute and controversy (a good summary of the case is [here](#)), there is no dispute about the Gates Foundation role in promoting the COVID vaccines around the world.

So how are those “vaccines” working? Not well. Countries and corporations with high percentage of vaccinated citizens and employees are seeing vaccinated and boosted people contract COVID. In my hometown in Florida, one of the largest hospitals is now reporting that almost 40% of new COVID patients being admitted to the hospital are vaccinated. Two months ago that number was only 18%.

The establishment narrative that vaccines are the key to stopping the spread of COVID is crumbling before our eyes. [Alex Berenson is doing a terrific job](#) of reporting on this disaster:

*Vaccines don’t stop Covid hospitalizations or deaths. They never have, even at peak effectiveness. A huge US database offers proof*

*Even at the peak of their protection earlier in 2021, Covid vaccines barely reduced the risk of hospitalizations in vaccinated people who had “breakthrough” infections, new data show.*

*Vaccinated people in a study published Tuesday had a nearly 1 in 200 chance of requiring hospitalization for Covid in the first six months after being “fully vaccinated.”*

**Brian Cates** also is doing some great reporting on the Fauci/CDC **Götterdämmerung**.

*So for more than two years now, it is becoming increasingly obvious that the tightly knit cabal at the top of the US & international virology community engaged in a campaign of suppression and lies in a furious attempt to stave off any accountability for what had actually occurred:*

*Not only were US tax dollars spent on gain-of-function research at the Wuhan Institute of Virology, Fauci and Daszak and many others very likely knew all about this and were covering it up, desperate to hide their role in funding a military lab in China that was doing gain-of-function research on bat coronaviruses that then somehow escaped the lab and proceeded to wreak havoc around the world.*

The list of harm caused by these vaccines is growing, not shrinking. **Pregnant women** in their first two trimesters face a huge risk of miscarriage. World class athletes who have taken the jab are dropping dead or facing cardiac disability. And people over 60 who are vaccinated are dying at a higher rate than people over 60 who are not vaccinated.

People, regardless of nationality or type of government, get angry when they realize they have been duped. The promise that COVID vaccines would stop the spread and return life to normal has now been exposed as a fraud. Is COVID helping cool the planet? Well, fewer planes are flying, fewer drivers are on the road and beef is more expensive (which may mean fewer cow farts). The climate fanatics may see this as a positive development, but the biggest threat from COVID is not physical death. It is the death of liberty and an attack

on personal freedom. That is the real long-term threat you should worry about.

"And people over 60 who are vaccinated are dying at a higher

rate than people over 60 who are not vaccinated." Please tell us the source for this - specifically rather than just saying "the CDC" or some such. I don't really doubt it, but would like to have an ammo source for my use. Thanks.

I like Gateway - but the "argument" employed here doesn't actually refute the Gates defenders. I'm *no* fan of Bill Gates, but I too right away figured he meant that "As people get richer they get more access to better healthcare so they stop having lots of babies because the risk of their children dying at an early age takes a steep dive. This means the total population stabilizes and stops growing after a while."

After all, that societal observation has been made totally apart from any controversy related to vaccines or fears of population run amok.

While it's evident our earthly home could benefit from better human stewardship it's also evident that stewardship must be taken away from Globalist Corporations and cabals. A it's also clearly evident anti human psycopaths must be denied a place on our beloved planet and the very first one who needs to be terminated is Bill F%#@&ng Gates.

The mainstream media is criminally accessorizing the globalist depopulation agenda that is currently being perpetrated against humanity. The criminal cabal is pushing a genetically debilitating poison as a solution to a non crisis crisis. Thank God people are seeing this truth.

Based on the amount of fresh water and arable land I would estimate that the planet can support about 30 billion humans. There's enough land in the medians of our interstate highways to feed us here in America. It's purely hypothetical of course because this projection includes the necessity of humanity obeying God's greatest commandments, namely to love Him and to love each other.

Bill Gates is a strange person thrust into prominence strictly by happenstance. Only an idiot directly equates wealth with wisdom. I will concede that it's becoming more and more dangerous for mankind to behave idiotically.

i agree about the productivity of the land(and oceans, which can also be farmed); websearch "food forests," for example, and/or "aquaponics."

If all ground transportation were required to use hydrogen in combustion engines, the exhaust would consist of water and trace amounts of carbon, meaning that many areas currently classified as "desert" could also bloom; the only modification needed would be stainless steel exhaust headers, pipes, and mufflers because of rusting issues. An inventor named Stanley

Vaccines help people live longer, not stop reproducing. That's a lie that he meant anything else. That is so contrary to reason to consider it any other way, he'd have to be a fool not to make that distinction as the key part of his argument. Add ascii up on William Henry Gates III AND YOU GET 666.

Well, the rumor is that Billy-boi has been a dedicated satanist since he was ten; both his parents were big proponents of Planned Parenthood, a eugenics program initially begun by Margaret Sanger, who wanted to exterminate the blacks, in particular...so yeah, murderers are natural allies with he who was a liar and murderer from the Beginning...

The world does need to slow down its birth rate, especially in Asia. This old world reached its first billion people in the early 1800's. It is now at 7 billion in just 200 years. But there are better ways to do this than with a forced needle. We are making too many babies too fast.

**Genesis 9:7** "And you, be ye fruitful, and multiply; bring forth abundantly in the earth, and multiply therein."

WE have consumed too much of EVERYTHING God created, rather than being conservative and leaving enough for those billions. Keep in mind, millions die every day too. Here's an idea.....why don't the filthy rich, who have engorged themselves with money, and power, pool their cash and irrigate the Sahara, and fill it with beautiful, hard working trees that consume CO2, and give us back Oxygen to breathe ? Or maybe we could just

America has nothing to loose from eliminating Gates, Fauci, Birx, Biden, Harris, the Clintons, the Obamas, the Bushes. Everything to gain. Best to get to work, and get this over with sooner rather than later.

Americans allowed the democrats, rhinos and medias to

X

get away with anything and everything corrupt like voter fraud! We The people have the majority over the minority of democrats, rhinos and medias and they know this and actually fear a majority to over rule them. while on the other hand they rely on blind patriotism and propaganda lies to control the masses through the medias LIES and corruption of voter fraud! Americans and the people world wide must act as their bosses not the other way around!
