real james bond villains wear cardigans

bill gates, the WEF, and the WHO are not done with us. it's time we were done with them.

**el gato malo**

Apr 13

❤ 590 💬 139 ↗

in history as in literature, a special place of contempt is held for the grand vizier, the guy behind the throne, the power behind the power. it's a position of great influence but zero accountability, especially if you can subvert the ruler you puppet past the point of being able to scapegoat you.

buying or leading a politician and getting goodies is a process as old as politics, probably older as it was likely the reason the first politician was elected in the first place...

but the truly discerning james bond villain level vizier, well, they just go right ahead and buy their own NGO's. that's how you take over the world. space lasers and earthquake machines may be cool, but real conquest usually banal.

get to about the 1 minute mark in [this video](#) where you can hear bill speak about talking to donald trump in the white house.

trump asks about looking into some of the ill effects of vaccines.

gates tells him “that’s a dead end, that would be a bad thing, don’t do that.”

this is not a man giving well intentioned advice.

this is a man covering up a crime committed in the service of crony capitalism.

the gates foundation has a longstanding relationship with vaccines that is more than a little sketchy. they were pushing oral polio vaccines in africa LONG after they were known to be unsafe and had actually become the leading cause of polio in the world.

*“The Gates Foundation is a leading funder of oral polio vaccination in Africa and around the world, having dedicated **nearly \$4 billion** to such efforts by the end of 2018. As discussed in Forbes in **May 2019**, Gates has “personally [driven] the development” of new oral polio vaccines and plays a “strategic role beyond funding.”*

the US uses ONLY injected IPV polio vaccines. both the US and the EU discontinued use of orals because of side effects including **actually causing polio**.

*A year ago, news outlets briefly shone a light on the fact (a fact that makes public health officials squirm) that oral polio vaccines are **causing polio outbreaks**. With reports streaming in throughout 2019 regarding the circulation of **vaccine-derived polioviruses** in numerous African and Asian countries, a CDC virologist confessed, “We have now **created more new emergences** of the virus than we have stopped.”*

... there were 400 recorded cases of vaccine-derived polio in more than 20 countries worldwide.

(author's note: that's ~3X the total of all natural polio cases worldwide and of those, only 29 occurred outside of pakistan and 100% of those were in afghanistan. this vaccines caused multiples more polio than the virus itself)

This week, the same story is making the same [headlines](#), with the WHO's shamefaced announcement that the oral polio vaccine is responsible for an alarming polio outbreak in Sudan—"linked to an ongoing vaccine-sparked epidemic in Chad"—with parallel outbreaks in a dozen other African countries. In fact, between August 2019 and August 2020, there were [400 recorded cases of vaccine-derived polio](#) in more than 20 countries worldwide. Ironically, WHO disclosed this "[setback](#)" barely a week after it declared the African continent to be free of wild poliovirus—which has not been seen in Africa since 2016. While African epidemiologists cheerily [claim](#) that these outbreaks can "be brought under control with further immunization," and Sudan prepares to launch a [mass polio vaccination campaign](#), WHO is warning that "the risk of [further spread of the vaccine-derived polio](#) across central Africa and the Horn of Africa" is high.

but gates kept pushing them in africa anyway, probably because so many of his pals owned the production and that's what the gates foundation does. that's what all these guys do. big business and billionaires are not friends of free markets. they want sure things and it's cheaper to twist and break arms and buy mandated markets than to compete on a fair playing field.

i have (on excellent, direct authority from a personal friend who i trust implicitly and who spoke directly to the folks involved) the following story about the gates foundation in india:

gates himself came in to speak with the health ministers. he offered them a vaccine for a disease they already had one for. they told him, "no thank you, we already have that one covered." he told them "well, you need to switch to this vaccine or there will be no gates foundation investment for india." the one he wanted them to switch to was owned by a "friend of his." this story was relayed by extremely liberal folks who literally run vaccine programs in india. they heard this conversation directly and have no reason to lie. they were horrified. it was a pay to play stick up. (they still declined)

this is not the sort of conflict of interest that's helpful in a guy telling the president not to look into vaccine issues. it also stands testament to his morality and inclination. bill gates is as amoral as he is rich. always has been. much of microsoft was stolen from his less machiavellian partners.

i'm presuming this interview above and the discussion with trump were pre-covid because it's never mentioned and had this been post covid, i find it hard to believe that it would not have been, but it seems more apropos now than ever. obviously, the conflicts of interest certainly did not stop back then and vaccine ill effects are looking like quite the hot topic just now.

and gates is, as ever, right smack in the middle of the dirtiest, most profitable part of it.

it was september 2019. SARSCOV-2 was still not really on the radar. according to many, there was not even an outbreak yet.

that same month, billy made a large [investment](#) in a company called bioNtech to allegedly pursue HIV and tuberculosis vaccines. if memory serves, he bought about 1/3 of the company which was entirely preclinical in infectious diseases at the time. they were mostly a phase 1-2 oncology company. this looks like a sweetheart valuation.

obviously, this became a very big deal in a very big hurry. it was their mRNA payload that was licensed by pfizer for their vaccine, a product that went on to be the most profitable drug per unit time in human history. (and possibly the most profitable altogether) bioNtech minted money.

lots of things about this investment have long smelled fishier than a sushi bar dumpster.

but then a funny thing happened with a now vexingly familiar cast of characters.

Geneva, Switzerland, 15 October 2019 – The Johns Hopkins Center for Health Security in partnership with the World Economic Forum and the Bill & Melinda Gates Foundation will host Event 201: a high-level simulation exercise for pandemic preparedness and response, in New York, USA, on Friday 18 October, 08.45 - 12.30 EDT.

(read more [HERE](#))

even months later in january 2020, folks like osterholm were still buying the “[no signs of human to human transmission](#)” line.

yet somehow, 4 months earlier (and who knows when the due diligence started. might have been 6 or more), gates was putting his money right on the one obscure square that would pay out 100 to one. at a company with near zero footprint in infectious disease. for a virus no one was focused on. whose genetic code would not (allegedly) be initially characterized for 4 more months.

then, in the same odd, sudden miracle that got moderna the NIH science they licensed for their vaccine, bioNtech also had a product and pfizer jumped to license it.

alone, having a wargame for the war that had, unbeknownst to most, already started, might raise eyebrows, but it might also be a coincidence.

but when the folks coming to that wargame have been making big bets on the kinds of weapons that that precise (and only that precise) sort of war would use, well, one might start to sharpen the points on one's pointy questions.

just what was informing what here?

this idea that "mRNA is magic and you can develop a vaccine in weeks" is complete nonsense. it's never been true and the rest of the mRNA vaccine timelines stand testament to it. no other vaxx has been forthcoming.

this HAD to have been in the works for a significant period beforehand.

the fix appears to have been deeply in here. somebody was getting some VERY early looks at some tech to vaccinate against a virus no one else even had a copy of. the awareness not just of the pathogen, but the way to code for its spike protein and the impending pandemic seems to have been loose in certain circles long before the rest of us were told.

the NIH seeded moderna. i still do not have confirmation on where bioNtech got theirs, but i have a hunch and it rhymes with "silly plates" and that this might explain the sweetheart deal.

there is really only one story that makes sense to me here on covid origins, and that story is this:

NIH funded eco health alliance run by daszak and in cahoots with folks like baric colored outside the lines with fauci's grant money. they, in collaboration with the wuhan institute of virology hotwired the hell out of covid viruses from bats engaging in gain of function work WAY outside of safe limits. this was not a weapon. it was work on inoculation. that was

daszak's longstanding focus. we'll probably never know what happened in wuhan, but the breadcrumbs here are AWFULLY provocative and the sudden appearance of 2 mRNA vaccines, one with the NIH folks that funded EHA at the WIV, one with bioNtech, looks like an offshoot of it. (lots of detail [HERE](#) and [HERE](#) on the breadcrumbs)

wrapped up in this from the very beginning were load of the WEF gang (who had just run an oddly timely pandemic wargame for a disease an awful lot like covid) and the WHO.

billy gates is neck deep in both, a charter member of the cool kids crony capitalist table at davos and a top funding source for the WHO, donating more than 10% of its budget. it's clearly a great investment for him as it poops golden eggs in terms of early information and hard sell opportunities for poor countries. it's a seat at every table that makes you look like a philanthropist while in reality being a lead pipe wielding coercive corporatist.

gates is not a good guy.

he's a sociopathic nerd with the most unsavory of associates.

and he knows how to play the crony capitalist game with the absolute best of them. the gates foundation has become a barely veiled international influence organization masquerading as a charity.

between gates and china, the WHO will dance to whatever song the two play. and oh, how they will dance.

remember this gem? (i do)

Tedros Adhanom Ghebreyesus ✓
@DrTedros

In many ways, [#China](#) is actually setting a new standard for outbreak response. Our greatest concern is the potential for the virus to spread to countries with weaker health systems, and which are ill-prepared to deal with it. [#2019nCoV](#)

World Health Organization (WHO) ✓ @WHO · Jan 30, 2020

"We don't know what sort of damage this [#2019nCoV](#) virus could do if it were to spread in a country with a weaker health system.

We must act now to help countries prepare for that possibility"-@DrTedros

[Show this thread](#)

this was a big part of what got the out of control abandonment of 100 years of science based pandemic guidelines rolling.

“hey, let’s throw all the science, data, and history out the window and copy a terrifying authoritarian regime with a human rights record that would make myanmar blush!”

yeah, well, we all remember how THAT worked out...

but this is government. it’s worse than government, it’s trans-national organizational government. these are the people who invented “failing up” where the bigger your screw ups, the higher you get promoted. (if you doubt me, look at who runs the IMF and the world bank some time...)

and so, despite having cheer led for nothing uty pseudoscience, failure, and human ruin, the current plan being put forward is, wait for it, “hey, let’s give the WHO massive, unaccountable globalist powers!”

of course, this was clearly the plan all along if you were paying attention.

Tedros Adhanom Ghebreyesus ✓

@DrTedros

Agree with [@BillGates](#) & [@melindagates](#): there's no national solution to a  crisis. The sooner we all work together to stop [#COVID19](#), the more lives will be saved, the more people will get back access to essential health care & the higher chance that we will build back better.

Gates Foundation ✓ @gatesfoundation · Sep 14, 2020

What the world does in the next few months is going to make a big difference. Read our 2020 Goalkeepers Report to learn what it will take to end the pandemic. gates.ly/33uJkr3

4:26 PM · Sep 15, 2020 · Twitter for iPhone

note the direct parrot of the WEF “build back better” taking point.

this gang sees every crisis as a chance to try to grab control of the world. and [they are at it again](#).

In a consensus decision aimed at protecting the world from future infectious diseases crises, the World Health Assembly today agreed to kickstart a global process to draft and negotiate a convention, agreement or other international instrument under the Constitution of the World Health Organization to strengthen pandemic prevention, preparedness and response.

Dr Tedros Adhanom Ghebreyesus, WHO Director-General, said the decision by the World Health Assembly was historic in nature, vital in its mission, and represented a once-in-a-generation opportunity to strengthen the global health architecture to protect and promote the well-being of all people.

“The COVID-19 pandemic has shone a light on the many flaws in the global system to protect people from pandemics: the most vulnerable people going without vaccines; health workers

without needed equipment to perform their life-saving work; and ‘me-first’ approaches that stymie the global solidarity needed to deal with a global threat,” Dr Tedros said.

they will also force licensing, break patents, and drive health policy at the highest levels.

but here’s the full blown worst of it:

The World Health Organization (WHO) has contracted German-based Deutsche Telekom subsidiary T-Systems to *develop a global vaccine passport system*, with plans to link every person on the planet to a QR code digital ID.

Indeed, despite the *minuscule threat posed by new variants* and *dubious-at-best vaccine efficacy*, the WHO is adamant that a global *QR code-based vaccine passport system* is vital for all future health emergencies, not just COVID.

“COVID-19 affects everyone. Countries will therefore only emerge from the pandemic together. Vaccination certificates that are tamper-proof and digitally verifiable build trust. WHO is therefore supporting member states in building national and regional trust networks and verification technology,” says unit head of the WHO’s Department of Digital Health and Innovation Garrett Mehl.

“The WHO’s gateway service also serves as a bridge between regional systems. It can also be used as part of future vaccination campaigns and home-based records.”

got that? this one is going to be digitally verifiable and global. nowhere to run, nowhere to hide, universal, mandatory, trans-national, and administered by an agency completely unaccountable to you and beholden to proven kleptocrats, authoritarians, and crony corporatists. they are basically a subsidiary of china and gates inc.

they will not get any better or more honest next time.

we're talking about taking one of the most corrupt, captured, and incompetent agencies in the history of bureaucratic bloviation and giving them the keys to the world crisis machine and to an electronic health passport that will be your right to travel and work and eat out and shop and who knows what else. this is the cornerstone of an international social credit system. wait until they add your ESG score and your carbon footprint.

giving this team universal chicken little rights and direct links at highest levels to public policy is bad enough. letting them enable fine grained access into permission to have anything resembling a life will have you eating bugs and tweeting what you're told faster than you can say **#grasshoppers #yummy!**

they promised you that in the future you'd have no privacy and own nothing and that you'd been happy.

guess which two promises they're going to keep?

and government will fall all over themselves to help and to outsource the imposition of the infinite personal tracking and permissioning they have so long salivated over under the pretext of pandemic preparedness. (oops, look, another trojan framing of subjugating masquerading as safety. told you these were EVERYWHERE...)

this is not going to be acceptable or even tolerable.

this group should be disbanded, not granted greater remit.

and they are not done, because the power behind these thrones is ever hungry.

you might be thinking "wow, that was awful" but they are all thinking "wow, that was surprisingly easy. i wonder what we could do if we had some time to get set up beforehand and really run the table?"

these are not good people.

they do not have noble aims nor your best interests at heart.

they are a global aristocracy of surpassing ruthlessness telling scare stories so they can mandate alleged solutions.

they tell you it's about saving you.

it isn't.

read the fine print.

follow the money.

CLIMATE CHANGE

Bill Gates: Rich nations should shift entirely to synthetic beef

We spoke to the Microsoft cofounder about his new book, the limits of his optimism, the tech breakthroughs and energy policies we need—and how his thinking on climate change has evolved.

By James Temple

February 14, 2021

Gates is an investor either personally or through Breakthrough Energy Ventures in several of the companies he mentions below, including Beyond Meats, Carbon Engineering, Impossible Foods, Memphis Meats, and Pivot Bio. This interview has been edited for space and clarity.

the super rich do not like to guess. they do not like to be surprised by trends. it is far more certain and therefore more profitable to force you to buy that which they are selling. the public health gift and the climate gift are all one gift: use government and trans-

government to frighten and force people into buying the needless products that you're going to produce for them.

small investors talk their book. titanic investors force you to buy it.

- *if it's a vaccine, mandate it and bar all useful therapeutics from market.*
- *if it's a windmill, kill nuclear and inflict absurdist carbon taxes.*
- *never let any of it be properly assessed.*
- *use fear to drive compliance and compliance to drive mandate.*

they will sell you your own collar and leash and demand your gratitude for having done so.

and if you don't wake up pretty soon, they're going to get it from you. by force. and you will be powerless to stop it.

the confluence of a global health passport and central bank digital currencies is an extinction level event for personal liberty and privacy.

and make no mistake: gates wants it. the WEF wants it. and most western governments want it.

but they also know that you do not want it. so they need a pretext and a plan and a pile of boring, technocratic yammering to hide it behind. they learned from last time. they saw the cracks we squirmed through and how we got away. and they do not plan to let it happen again. the next one will be air tight. they'll have the WHO ready to both be able to declare a global emergency and impose ready made verified global digital ID using that fear as a pretext.

if you let them get these pieces into place, you are NOT going to like the endgame.

it's time to de-legitimize and defund these agencies.

let's go.

Kean Bexte
@TheRealKean

NEW: The World Health Organization's website crashed earlier today as the public filed angry feedback about their proposed Global Pandemic Authority.

#StopTheTreaty: WHO allows brief feedback on global pandemic treaty - The Counter Signal

The WHO has quietly allowed individual citizens to provide feedback on their proposed global pandemic treaty.
