On Tuesday, the U.S. Food and Drug Administration met with its Vaccines and Related Biological Products Advisory Committee (VRBPAC) to discuss Moderna’s EUA request for a COVID-19 vaccine for children 6 through 17 years of age.

The same expert panel will meet again on Wednesday to discuss shots from Moderna and Pfizer for the kids under 5.

According to the CDC data, the incidence of heart inflammation was 4.41 excess per 100,000 who received the Pfizer/BioNTech for males aged 18-39 versus 6.27 excess cases per 100,000 for Moderna, [Reuters](#) reported.

The overall incidence is relatively rare and the vast majority who suffer the side effect fully recover, but a comparison showed the risk of myocarditis and pericarditis in young males aged 18-39 was 1.1 to 1.5 times higher after

the Moderna shot, the FDA said in its presentation, citing data from three U.S. vaccine safety databases.

Some countries in Europe have limited use of Moderna's vaccine for younger age groups after surveillance suggested it was tied to a higher risk of heart inflammation, and the FDA delayed its review of the Moderna shot to assess the myocarditis risk.

An FDA official claimed that the findings on myocarditis and pericarditis linked to both the mRNA shots "were not consistent across all of the U.S. vaccine safety monitoring systems."

The FDA called on speakers about their views on authorizing the Moderna vaccine for children ages 6 to 17. Some of the invited speakers were not in favor of the vaccine due to its life-threatening risks that completely ruined their lives.

Carolina Bourque, is a 43-year-old researcher, biologist, and a mother. Mrs. Bourque shared her personal nightmare after receiving the Moderna vaccine.

I lived a normal, active life and happy life. I work full time, took care of my family, my farm, rescue dogs, and enjoy multiple physical activities. I took my first Moderna injection early in March 2021. I took the injection because I believe it was needed to protect myself, my family, and others in my community. I believed it was safe, effective, and the right thing to do.

After my first injection, I had an anaphylactic reaction, rash, tachycardia, dizziness, shortness of breath, intense gastro pains that lasted months. My doctors ignored my reactions from the first injection and unbelievably recommended a second shot. They said it was needed to be safe.

I took the second Moderna injection in June of 2021. I got dizzy right away. x  
Two days after the injection, I could not get out of bed for a couple of days.  
My right leg and my arms were weak.

I developed facial paralysis and migraines. My eyesight became fuzzy. I was dizzy and confused. I had no choice but to stay down. It has been about twelve and 15 months of reaction to the injections. I still deal with daily fatigue, dizziness, memory problems, nerve and joint pains, burning up the skin, numbness, ringing up the ears, headaches, tingling sensations in my body, my face droops, and my right hand tremors.

This injection has badly harmed my life, my family, my work, and my health. They have taken me away from everything that made my life happy and fulfilling. So far, there [are] no effective treatments that can help me. I have seen numerous specialists, try special diets, [and] supplements. I have found no answers or guidance. There's no pathway to improvement. No one knows if I will ever get better.

The effects of the shots are so extreme and never-ending. As soon as I mentioned that the symptoms are vaccine-related, I feel completely ignored. Most doctors do not want to talk about the possibility of vaccine injury.

**How is that going to affect the little kids that cannot communicate or explain what's going on with their bodies? Side effects needs to be acknowledged publicly. Long-term research needs to be done before we can push this into our kids. Knowing the level of immunity before injecting this into our kids should be accounted for.**

The next speaker who was not in favor of the vaccine was Robyn Handsman.

Mrs. Handsman was very emotional as she tried to recall how the Moderna vaccine ruined her life.

x

I got the first injection on September 15, 2021, so it's very emotional for me. I got the first dose and everything was fine until 08:00 am. On Friday morning at 08:00, I woke up and my hands and my arms were completely numb and tingly. I called 911, but instead of going to the hospital, I went to my doctor's and did a urine sample and an EKG and I was sent home. By Sunday night, I was just watching TV. I got up to go to the bathroom and I said out loud that I was really dizzy. My husband said, we need to take your blood pressure and he took my blood pressure and he immediately called 911. It was 211/105. I took one of my husband's blood pressure pills because I was not on anything because I was a completely healthy person and I also took 325 mg of Aspirin.

The paramedics confirmed my extremely high blood pressure, but since I took the pill, I decided to stay home. At 11:30, my husband said, let's take it one more time before going to sleep. And my blood pressure was even higher, so 911 was called again. I took another aspirin and a second pill from my husband. The ambulance came. They did an EKG and they said my heart looked good and Covid was rampant in the hospital so I stayed home.

The next morning I woke up. It was 198/98. So I went to the ER. I took a third pill of my husband's blood pressure medication. I was in and out of the emergency ERs and Urgent Cares Monday and Tuesday. By Wednesday, I went back to my doctor and did another urine sample. He gave me a second blood pressure pill to take. So now I was on two.

By Thursday, my left arm had pain and numbness and was admitted to the ER. By Friday in the hospital, I got an email from my doctor that I had protein in my urine. In five days it went from zero to 433 and I now have

permanent kidney damage. I released all my medical records to Moderna. Moderna called my doctor because I had 100% proof it was vaccine-related. From the urine samples. They said that they're seeing many cases like mine and that I also had all my blood work taken three months earlier.

x

And the worst part about it is I'm allergic to foods that I've never been allergic to and I eat them and my blood pressure goes to 200 over 100. And I would say, that's crazy, except I don't know that I ate something that I was allergic to.

**Why on Earth would you give this to kids? And young people when the risk of dying from COVID is practically zero. How many people have to go to sleep and never wake up? It is not a coincidence. Kids are dying on the fields from heart conditions like never before. Me and thousands and thousands of lives are forever changed. We have no recourse. We can't go after the vaccine injury program. Moderna has complete immunity and we're censored on our support groups. We have to talk in code, and I'm very concerned that this is all about money and I really don't know how people sleep at night knowing this is injuring and killing people all over the place.**

Dr. Harvey Klein also gave his honest and brutal comments regarding the vaccine. Dr. Harvey A. Klein is an orthopedist in Brooklyn, New York and is affiliated with multiple hospitals in the area, including New York Community Hospital and Maimonides Medical Center. He received his medical degree from Tufts University School of Medicine and has been in practice for more than 20 years, according to [US News](#).

My only interest is in saving children's lives. I pray that the advisory committee members will open your hearts to God's truth about protecting his children, which includes your children and grandchildren. I'm an MD graduate of Tufts Medical School, one of the top ten in the country. I am

trained as an orthopedic surgeon. Before I went to medical school, I was a mechanical engineer, assistant and electrical engineer from Brooklyn Polytech, and a rocket scientist. In the late sixties, I had a machine shop and we made parts for Grumman, who had the contract for the Land, the lunar excursion module that landed on the moon in 1969.

I'm appalled at the arrogance that you meaning the FDA [has] in even thinking about vaccinating healthy children with outdated, highly toxic, Covid vaccines. Children who have a 99.98% survival rate.

Their statistics show that over 100,000 children ages birth to 18 that have been vaccinated with Pfizer-BioNTech, and Moderna so called vaccines have had severe life-threatening adverse reactions such as myocarditis, many more severe adverse reactions, and even death. We know that VAERS is underreported by a factor of 100.

The data cries out loudly to stop this insanity immediately before you kill or maim one more innocent child. These vaccines are not experimental. They have bio weapons designed to maim and kill in a risk-benefit analysis of children up to age 18 have a survival rate of 99.9 reactions and virtually no deaths.

**Why in the world would you want to try to improve on perfection by exposing them to significant chances of being permanently severed, severely injured, or dead? The risk is infinite and the benefits are nonexistent, and the efficacy is extremely negative. Why do you want to mess with God's given perfect system? The best treatment you can do is to leave these children alone under God's care and failing to do that, then your only purpose is to maim and kill. That clearly being the case, the FDA should change its name to the JMI, the Josef Mengele Institute.**

**It is not too late to repent and return to God in His Torah. If you want to experiment, do it on yourselves. Don't think that for 1 second that God is not aware of your very nefarious and murderous plans and actions. If you haven't forbid go through with mandating vaccines for innocently helping children, you will burn in hell for eternity.**
