## Globalists Are Taking Over the Food System — It's Part of Their Plan to Control You

*The globalists' takeover of the food system is underway — if they control the seeds they control the food, and if they control the food they can use the digital ID to control consumer access to the food.*

By **Dr. Joseph Mercola**

We use cookies to ensure that we give you the best experience on our website. You consent to our cookies if you continue to use our website.

[Ok](#) [Privacy policy](#)

- The globalist takeover is coming at us from every possible angle. Whether we're talking about biosecurity, finance, housing, healthcare, energy, transportation or food, all the changes we're now seeing have one goal, and that is to force compliance with the globalists' agenda.
- The global food system, and protein sources, in particular, are currently under coordinated and intentional attacks to manufacture food shortages and famine.
- The globalist elite intend to eliminate traditional farming and livestock and replace it with indoor-grown produce and lab-created protein alternatives that they own and control.
- While the presence of hundreds of food brands gives the appearance of market competition, the reality is that the food industry is monopolized by fewer than a dozen companies, and all of them, in turn, are largely owned by BlackRock and Vanguard.
- Eventually, your ability to buy food will be tied to your digital identity and social credit score.

The globalist takeover agenda is nothing if not comprehensive. They're coming at us from every possible angle, and whether we're talking about biosecurity, finance, [housing](#), [health care](#), [energy](#), transportation or [food](#), all the changes we're now seeing have one goal, and that is to force compliance with the globalists' agenda.

### Dig It! #143: NEW Global Food System - MUST WATCH!

In an April 27 blog post, investigative journalist Corey Lynn takes a deep dive into the [new food system](#) being put into place, and how it is geared to control you:

"Who controls the food supply controls the people; who controls the energy can control whole continents; who controls money can control the world.' This famous quote by Henry Kissinger is ringing more and more true by the week," [Lynn writes](#).

"The globalists already control the majority of the money, are moving ever so swiftly to convert the energy system over into systems they are all invested in, and have been taking drastic measures to control the food industry while running much of it under the radar. If they control the seeds they

We use cookies to ensure that we give you the best experience on our website. You consent to our cookies if you continue to use our website.

[Ok](#) [Privacy policy](#)

infrastructure system has already been built in multiple cities and is making its way across the globe ...

"The USDA and FDA have already approved lab-grown meat, genetically modified cattle, and are funding the globalists to research and develop cellular agriculture as well as indoor growers and genetics companies ...

"Union Pacific is mandating railroad shipping reductions by 20% impacting CF Industries Holdings, the world's largest fertilizer company. Vanguard, BlackRock and State Street happen to be the top shareholders of Union Pacific, and BlackRock and Vanguard are the top three shareholders of CF Industries Holdings.

"By mapping some of the largest vertical farms, it reveals the crops, grocery stores involved, locations and billions pouring in by globalist investors and shareholders. It quickly becomes evident that this is the global plan to control all produce — ingredients that go into all food products."

## 1 Million Copies Sold — 'The Real Anthony Fauci' — BUY TODAY!

### The secret monopoly

As noted by Lynn, this monopoly has been locked into place over the course of many years. Slowly but surely, the monopoly has grown, under the radar of public consciousness, which in turn has resulted in **food getting simultaneously more expensive and less accessible**.

Now, as the final pieces are being put into place, many are waking up to the realization that we've been massively fooled and are now at the mercy of a figurative "handful" of unelected people whose megalomania is unsurpassed in human history.

[Ok](#) [Privacy policy](#)

While the presence of hundreds of food brands gives the appearance of market competition, the reality is that **the food industry is monopolized** by fewer than a dozen companies, and all of them, in turn, are largely owned by BlackRock and Vanguard.

The growing fake meat market is similarly dominated by a very small number of **large food giants** which, again, are owned by BlackRock and Vanguard.

BlackRock alone holds **\$10 trillion in assets**, up from \$6 trillion in 2017. Combined, the three largest investment firms in the world, **BlackRock, Vanguard** and State Street, have ownership in nearly 90% of **all S&P 500 firms**.

Through their investment holdings they secretly wield monopoly control over ALL industries, so the idea

We use cookies to ensure that we give you the best experience on our website. You consent to our cookies if you continue to use our website.

[Ok](#) [Privacy policy](#)

Owners and stockholders of [Vanguard](#) include [Rothschild Investment Corp](#), [Edmond De Rothschild Holding](#), the Italian Orsini family, the American Bush family, the British Royal family, the du Pont family, and the Morgan, Vanderbilt and Rockefeller families.

[Blackrock](#), meanwhile, has been called the "[fourth branch of government](#)," as they are the only private firm that has financial agreements to lend money to the central banking system.

### **Food security is undermined by patentable food**

In 2014, the U.S. Congress established the Foundation for Food and Agriculture Research Act (FFAR) through the Farm Bill.

After siphoning off [\\$200 million in taxpayer funds](#) to get the foundation started, FFAR became a nongovernmental not-for-profit organization. Bill Gates is one of its funders, and its first board of directors included deputy director Dr. Robert Horsch of the Bill & Melinda Gates Foundation.

The mission of [FFAR](#) is to "connect funders, researchers and farmers, through public-private partnerships to support audacious research addressing the biggest food and agriculture challenges." In reality, it's been used to undermine food security by increasing reliance on gene-edited and patentable foods.

In April 2019, FFAR launched the Precision Indoor Plants (PIP) Consortium, a public-private partnership of indoor growers, breeders and genetics companies with the shared goal of advancing speed-breeding and altering plant chemicals responsible for flavor, nutrition and medicinal value.

Five key crops being worked on are lettuce, [tomatoes](#), [strawberries](#), cilantro and blueberries.

Vertical farms could take over the world | Hard Reset by Fre...

In August 2020, Monsanto/Bayer helped found a startup called Unfold, which develops new vegetable seed varieties specifically geared for vertical farms.

[According to Lynn](#), "GMOs already account for 75 to 80% of food Americans consume," and once fresh produce is under patent, that percentage will inch closer to 100%.

We use cookies to ensure that we give you the best experience on our website. You consent to our cookies if you continue to use our website.

[Ok](#) [Privacy policy](#)

"Bill Gates insists that droughts and climate change is destroying our ability to farm and that the future will consist of populations moving into metropolitan cities where indoor vertical farming is necessary to feed people.

"If this is the case, why has he acquired 242,000 acres of farmland over the past decade while simultaneously investing in indoor vertical farming?

"Who gets to sit at the table with healthy produce served up by Gates while the rest of the population eats gene-edited produce from locked-down facilities, delivered to their local grocery store, and accessed only through a digital ID?" [Lynn asks](#).

"Meanwhile, the Consultative Group of International Agriculture Research (CGIAR) holds the world's largest private seed banks consisting of 10% of the worldwide germplasm across the globe, which is controlled by the Bill & Melinda Gates Foundation, Rockefeller and Ford Foundations, and World Bank, managing 768,576 accessions of hijacked farmers seeds ...

"[W]hat's going to happen to the farmers when these astronomically enormous indoor vertical farm facilities have taken over every major city, locked-in contracts with all major grocery store chains, and are funded by some of the same billionaire globalists who are seeking to control human beings through every industry for their fourth industrial revolution?

"It's a legitimate concern. Add 'gene-editing,' 'smart,' 'traceable,' and 'net zero' to the production of these facilities, and the fact that they are still moving full speed ahead on digital IDs and currency, and it becomes even more concerning ...

"Whereas this provides a lot of explanation on the absolute intentional demolition to all of our farmers on the seed, vegetable, and produce front, people should also be aware of what's been taking place with cattle ranchers and the globalists' plan to take over the meat industry as well."

## **Controlled demolition of the protein supply is underway**

As I explained in yesterday's weaponized bird flu article, alleged outbreaks of bird flu and COVID-19 in food animals, along with drought and fertilizer shortages, have led to the [mass culling of flocks](#) and [cattle herds](#) around the world.

So much so, that we're now told to [expect egg, poultry and meat shortages](#).

Add to that a global fertilizer shortage that is limiting the amount of animal feed that can be produced this year, and the curious decision to limit U.S. fertilizer shipments on trains, which restricts the distribution and raises the cost of what little remains.

Experts predict it may take up to three years to replenish [global grain stocks](#), and in the meantime, farmers won't have a readily available supply to feed their livestock.

Canada-based Nutrien Ltd., the world's largest fertilizer company, recently warned the shortage is likely to extend into 2023. The price of fertilizer has also "skyrocketed to absurd heights that have never been seen before," [The Economic Collapse Blog reports](#).

The U.S. and U.K. are also paying farmers to not farm all their available land, California is paying farmers

We use cookies to ensure that we give you the best experience on our website. You consent to our cookies if you continue to use our website.

[Ok](#) [Privacy policy](#)

Food production is being blatantly attacked and irrationally restricted on so many fronts, it's clearly an intentional demolition of primary protein sources — [meat, egg and dairy](#).

"Feb. 1, 2016, the Good Food Institute was launched ... with funding from the Bill & Melinda Gates Foundation, the Open Philanthropy Project, and Y Combinator, with the goal to 'reimagine meat production,'" [Lynn writes](#).

"In October 2021, the Good Food Institute celebrated the USDA's \$10 million grant for the creation of the first-ever National Institute for Cellular Agriculture at Tufts University so they can back researchers in manufactured meat.

"To be certain all of these goals are locked into place and the UN 2030 agenda is achieved, disrupting the fertilizer industry, food supply chain, and a rash of coincidental fires to food processing plants sure would help to seal the deal, wouldn't it?"

## It's Time to Follow the Science. Join our Campaign!

### The emperor has no clothes

In a blatantly self-serving gesture, Gates has publicly called for the West to quit eating beef and [transition to lab-grown meats](#), ostensibly to address climate change.

He's also railed against legislative attempts to make sure fake meats are properly labeled since labeling would slow down public acceptance.

Not surprisingly, [Gates](#) is financially invested in [several faux meat companies](#). As luck or godlike foresight would have it, he's also invested in [genetically engineered fertilizer](#) alternatives. [Lynn writes](#):

"Bill Gates explained [his love for fertilizer](#) in 2018 while in Tanzania. Coincidentally, Gates-led and Rockefeller-funded Alliance for a Green Revolution in Africa (AGRA) has been an epic fail, with a first-ever evaluation report that came out on February 28, 2022, after a 15-year effort with bold claims to rescue [Africa's small farmers](#).

"Their false promise to 'double yields and incomes for 30 million farming households by 2020' was removed from their website in June 2020 after an assessment by Tufts University revealed little evidence of progress, and in fact showed a 31% increase in hunger.

"Evaluators stated there were many deficiencies and AGRA's reporting and monitoring data was weak. Even the German government is considering pulling funding from AGRA over their pesticide use, which is ironic because Gates claims we need to remove pesticides in the U.S. and move to indoor vertical farming ...

"One of AGRA's biggest achievements was their participation in 72 agricultural policy reforms in 11 African countries, pertaining to seed, fertilizer and market access. Laws were created to protect intellectual property rights for 'certified' seeds, as penalties were created for open-source seed sharing.

We use cookies to ensure that we give you the best experience on our website. You consent to our cookies if you continue to use our website.

[Ok](#) [Privacy policy](#)

"On March 17, 2022, a notice was published to the [U.S. Federal Register](#) seeking comments by May 16, 2022, on Competition and Intellectual Property System: Seeds and Other Agricultural Inputs.

"Remember to read through the proper lens when reviewing this notice that derived from an executive order signed by Biden in July 2021 on promoting competition in the American economy.

"Their ultimate goal — every human being, every piece of food, resource, and product on this planet will be tracked and traced via blockchain. This isn't a theory — it is their goal.

"In July 2021, the FDA released their 'New Era of Smarter Food Safety' which consists of using tech-enabled traceability for a digital, traceable food system, from farm to plate using blockchain.

"A digital identity to grant access to establishments, control financial spending, and trace everyone's moves has been rolling out on multiple fronts, including the vaccine ID passport. Eventually, they will try to move toward a chip, as it will be easier with biometrics being installed everywhere ...

"There is no way to sugarcoat this system they are implementing. Whereas vertical farming is brilliant in many ways and could be beneficial on a smaller scale in communities, the fact that this is the global agenda to remove farms and control all produce by the globalists themselves makes it incredibly concerning ...

"We must work together to find a way forward and continue to say no to the digital ID they are creating to control our access and spending while building self-sufficiency and security together."

For solutions to this rapidly approaching dystopian future, review my previous article, "[Why Food Prices Are Expected to Skyrocket](#)," and Lynn's article "[Finding Sources of Fresh Food](#)."

Part of the answer is to grow your own food, to the best of your ability.

Another part is to support local growers by buying their produce, or else they'll get pushed out.

Starting local co-ops and community gardens can also go a long way toward creating food security in the long term.

At the same time, we also have to reject globalist solutions like [fake meat](#), [gene-edited beef](#), [GMO foods](#) and all the rest of it.

It's time to recognize that none of their solutions are for our benefit.

They're for our detriment. The World Economic Forum has declared that by 2030, you will own nothing.

They mean it. They will take everything from us, including the right to grow our own food, if we let them.

If you can afford it quit buying their shit food. I haven't for years as I had no 'health' insurance and figured eating organic and as local as possible was my health insurance. Now I have Medicare which is basically useless as no insurance unless you buy into the healthcare industry. Healthcare for profit is an oxymoron. Whatever happened to 'do no harm'. Buy local and think global. I'm lucky I have decent local sources for meat, veggies, fruit, and grains. Getting harder to find these staples in grocery stores as they are all being eaten by vulture investment firms. Korean investment firms now own one our once local health food chain stores. How to stop this? Don't think we can. As long as our 'economy' is run by Wall Street assholes who's only goal is globalism and profit for investors. How about some regulation congress and all of you in the bag crooks who own and run our government?

You and me both. i was raised by parents who raised an immense garden and orchard, ran a produce stand every summer and were organic before it was even something you had to spout. I'm 68 and still do the same and preserve enough to last all winter. I never wasted a dollar on "health" insurance and also on medicare today which is a joke. I have a flock of laying hens so all the eggs I need and enough to sell to pay for their keep. Have great resources for local farmers for all other meat needs that think like I do. My local "grocery" store is lucky to see \$25 a month of my money. When i figure out how to manufacture my own TP they won't even see that!

Try stirring a few drops of essential oil of peppermint into a mug of Bicarbonate of Soda (Sodium Bicarbonate) then decant into a jar then dip a moist toothbrush in and brush teeth...If you want a paste, then mix the above with coconut oil and use accordingly.

when we were teenagers. And we had been growing lots of our own organic foods for years. Still my husband died of cancer 19 months ago. Can't escape environmental toxins I guess. We did live in a large metro area, because of our jobs (had plans to move as soon as we retired).

4 ^ | v • Reply • Share >

**Tina** ➔ daphnedemontbrison • 2 months ago

sadly, in urban areas we are exposed to tons of dirty electricity - which causes cancer and diabetes (not much talked about). add to that the plethora of towers now it is even toxic outside as well as inside. I am sorry for your loss. please check your home for dirty electricity and around you for towers, smart meters, etc - for some of us, we can hear dirty electricity - it is called 'tinnitus' and makes life kind of crappy but at least you know something is wrong then and can look into it.

There was an article in Townhall about the GOP starving school kids, they seemed to forget Michhelle's failure to reform their food, only to have it dumped in the trash it was so bad. Dr. Mercola hit the nail on the head. But not enough info on Baby KILLING formulas, a beginning of the control. You NEED TO Stop Breastfeeding your baby. USE OUR Formula Its is a bunch of useless chemicals, some of which are Heavy Metal Toxic, the food is worse. Or a natural Additive which they aren't required to name, CARRAGEAN which the FDA has labeled as GASTRO DAMAGING, as a Gastro Patient I had to self educate, The Gastro was pushing a Neurologic Black Boxed pill called Reglan fairly new to the market, quite expensive then, now a generic, which Tricare Life was quite willing to pay for, 1 pill Hives. Next he went on to Domperidone from the Brits which is not covered and you set up an Account in the Phillipines. The Brits had just Black Boxed for Heart disease. Let's look at bread, bland, looks nice, what's wrong with it, a look at RFK JR ARTICLE

<https://childrenshealthdefe...> Now lets just take a look at that crap Formula, I can't write it as well as this Dr. Author. <https://amidwesterndoctor.s...>

IF your baby needs Nexium, now you know why, if you do it's caused by even bland food. They didn't leave the Seniors out, Ensure is nasty, Boost a tad better tasting, Atkins a little better, But its still CRAP JUNK. Soy is an enemy to Thyroid patients, it interferes with the effectiveness of the medicine, I'm Hypo Thyroid who can only take the Name Brand, in fact the generic is SO BAD the Military won't use it in their Pharmacies. Your food is designed to make you sick, give you Cancer or other Cormidities. Over comsumption of sugar and carbs will make you a Sick Fat person. On the worse Type 2 Diabetic medicines, Metformin, which doesn't work, but causes Amputations, Heart Disease, finally death.

This same company makes baby formula and suddenly was not supplying this due to a contamination at their plant during all of this manufactured crises that all these people are orchestrating seems to be somewhat of a red herring because now we are focused on the shortage but found that one company makes all this formula marketed as separate companies like Gerber, Similac or what have you. Turns out that they are all manufactured by one company that is known for making a drug that has been used as a truth serum that can also neutralize the nervous system and erase people's memories.

They are right on time. G-d is being replaced by the empty and jealous souls of this earth and we are going to suffer greatly. It's time those of us who are spiritual and believe in a higher power create our own society- much like the Amish or the Mennonites. I have no desire to live in or off their artificial foodscape. The time to move is now. We cannot wait any longer.

14 ^ | v • Reply • Share >

**roberart51** → Beatrice • 2 months ago

You are correct. It is enough that only things are published and nobody acts. Farmers must realize what is happening and fight for their farms. No matter how much power a handful of sick minds have, it is impossible for them to control everything if people rise up to defend their rights.

Yes, there is also proof that Bill Gates and Black Rock have been buying up all the best land all over the country. Bill Gates' idea of fertilizer is chemical nitrogen fertilizers and Bayer of course was a Nazi company something that is coming up quite a bit these days that many companies like IBM and even those of the Bush family and others like the Abbott company show these entities aided the Nazis and are still functioning today.

8 ⤵ | ⤶ • Reply • Share >

**Nichole** ➔ Ektor57 • a month ago

It is just so strange that everything they are doing seems to point back to this one aim to reduce the population that we have been blind to and ignored over the years because of the Cognitive Dissonance that we simply cannot accept that those who are telling us that they have our best interests in mind are actually doing us harm and that is the intent when you listen to them speak double talk about public health and lowering the population. It is quite clear by the language that they are admitting they think we are overpopulated and getting vaccines into the poorest of the world is but one part of the plan to reduce the population.

People who have the means is to get into growing your own foodstuffs and where possible, to form social groups centralised on contributing to a complete, or nearest to, cover of range if fruit and vegetables and again where possible including home reared meat. I would wish this to happen all across any country so that it circumvents the control aspect of monopolisation altogether. Not only that, but imagine three or four million people doing that across the US could actually endeavour to actually set up an internal import between groups so that that all groups can benefit from foods susceptible to climate and soil differences. A bit harder in the UK but none the less is the way to go. Select at least a portion of back gardens to grow at least certain foods and take it from there. I.e. bypass the retail big boys altogether. The food quality will be better anyway from your own growing.

6 ^ | v • Reply • Share >

**SuziAlkamyst** → cpwise2003 • a month ago

I'm doing just that...learning the hard way, but the joy when you get a good little crop, outweighs the slugs, snails, aphids and hungry mice and birds.

Someone told me you have to sow one third for the insects, slugs and snails, one third for birds and a third for ones self. If you're growing stuff on your windowsill less gets eaten!

I would like to start a movement here in the UK. A sort of 'Dig for Victory' (the movement that was initiated in the Second World War) for our times. I feel it is well within our rights to grow our own food locally, knowing that there might be food shortages and knowing that the price of food is increasing. Many of the allotments (council owned land that people can rent to grow veggies) in the UK have incredibly long waiting lists and most people, as elsewhere in the 'west' go to a supermarket. As we all know, prices are getting ridiculous. It's not even particularly good food and it's not that fresh either. I think it is also within our rights as human beings to be able to take land to grow food on. The commons that were left after the robber barons made off with most of the land are ours. We don't need the permission of the councils, it is our right, our inheritance. It is time to stand up and take back our power and we start with food.

Could seed be more worth than Gold? All life starts with a seed. So start gathering up lots of seed and start growing your own - in vases, in your garden, start sharing and trading with your trusted friends, family and neighbours. This is the beginning. And of course BILL GATES is at the top of the list of buying up all the land - to do what with it? Mmmmm CONTROL and MORE CONTROL. He is IN THE CENTRE OF ALL OF THIS. He is looking more like the Beast in Revelations than ever before. It's amazing how Bill Gates is now a Geneticist, Agriculturist and a Farmer, my gosh this guy is a bloody flipping genius..... and all with ZERO QUALIFICATION. We have tons of unqualified people who run the world right now. The only thing they have is EXPERIENCE in DEPOPULATION. What would we ever do or become without that Bill genius. He has the perfect name BILL - because that is all he is possessed by - MONEY BILL.

Why CHD does not communicate with the farmers and all the sectors that are going to be affected with all these barbarities that a group of twisted minds want to do? People need to be alerted to what is happening. This must stop NOW!!!!

Thankfully, our form of government has the U.S. Senate and the Electoral College, both of which give farm and small states more power than they would have if national elections were totally settled by popular vote. These states have to mobilize now to defeat the globalists and ensure a decentralized, democratic farm, food production and distribution system.

Essentially, with such a potentially powerful lobby, the U.S. could reinvigorate and repopulate its rural areas and small towns. The discipline of developmental economics reminds that cities would not exist without a prosperous rural sector that produces more than it needs to sustain itself. Successful countries invariably are self-sufficient with respect to providing enough high-nutrition food and land use policies that encourage socially responsible entrepreneurship. Moreover, a conscious effort to decentralize by encouraging people to repopulate and re-develop rural areas would relieve our overcrowded cities and likely improve the quality of life for millions.
