SCAMDEMIC - CORONA VIRUS

Pfizer Confirms Covid-Vaccinated People Can “Shed” Spike Protein and Can Harm the Unvaccinated

OCTOBER 4, 2021 | ALGORA BLOG | 150 COMMENTS

Spread the Word

by: [CFT Team](#) also written by [ampproject.org](#)

In their latest issue brief, [America’s Frontline Doctors](#) (AFLDS) warned how spike proteins resulting from experimental COVID-19 gene therapy vaccines have the capacity to 1.) pass through the “blood-brain barrier” causing neurological damage, 2.) be “shed” by the vaccinated, bringing about sickness in unvaccinated children and adults, and 3.) cause irregular vaginal bleeding in women.

Released last week and titled “[Identifying Post-vaccination Complications & Their Causes: an Analysis of Covid-19 Patient Data](#),” the stated purpose of the document is “to provide additional information for concerned citizens, health experts, and policymakers about adverse events and other post-vaccination issues resulting from the three experimental COVID-19 vaccines currently administered under EUA (emergency use authorization)” by the U.S. Food and Drug Administration (FDA).

The non-profit organization highlighted the [thousands](#) of adverse events which are related to these “[vaccines](#)” and captured by the Centers for Disease Control and Prevention’s (CDC) [Vaccine Adverse Event Reporting System](#) (VAERS). “Yet these complications have received a fraction of the attention paid to [J&J’s blood-clotting controversy](#),” they lamented with dismay, asking, “Why?”

In taking a closer look at this data, AFLDS presents “some major categories of concern as-yet publicly unaddressed by either the FDA or CDC,” asserting that failure of these regulators “to consider these and other ‘[known unknowns](#)’ is a dereliction of basic medical research.”

They breakout their general categories of concern as shown below:

First, there are significant fears regarding the wide distribution of these new vaccines, which employ a new technology and remain only [experimental](#) without full approval from the FDA. Instead of employing an attenuated antigen response – as happens with conventional vaccines – these experimental agents introduce something called a “[spike protein](#)” into one’s system.

“It takes years to be sure something new is safe,” the AFLDS document confirms. “No one knows definitively the long-term health implications for the body and brain, especially among the young, related to this spike pro-

tein. In addition, if documented problems with the protein do arise, there will never be any way to reverse the adverse effects in those already vaccinated.”

Second, unlike conventional vaccines, these spike proteins, along with “lipid nanoparticles” have the capacity to pass through the “blood-brain barrier” which provides special protection for these sensitive areas of the body.

“There simply has not been enough time to know what brain problems and how often a brain problem will develop from that,” the document warns.

Risks from such penetration include “chronic inflammation and thrombosis (clotting) in the neurological system, contributing to tremors, chronic lethargy, stroke, Bell’s Palsy and ALS-type symptoms. The lipid nanoparticles can potentially fuse with brain cells, resulting in delayed neuro-degenerative disease. And the mRNA-induced spike protein can bind to brain tissue 10 to 20 times stronger than the spike proteins that are (naturally) part of the original virus.”

Third, as these experimental vaccines produce many trillions of spike proteins in their recipients, these vaccinated individuals “can shed some of these (spike protein) particles to close contacts,” causing disease in them.

In an email correspondence with LifeSiteNews, Dr. Simone Gold, the founder of AFLDS, directed this writer to an April 29 tweet where she posted a document from Pfizer’s experimental trials in which the pharmaceutical giant “acknowledges this mechanism” of potential shedding, she wrote.

As the document states, one can be “exposed to [the] study intervention due to environmental exposure,” including “by inhalation or skin contact” with someone involved in the study, or with another who has been exposed in the same way.

And this, according to AFLDS, can be dangerous. As the issues brief continues, “the spike proteins are pathogenic (‘disease causing’) just like the full virus.” Furthermore, these “spike proteins bind more tightly than the fully intact virus” and thus cases around the world of “pericarditis, shingles, pneumonia, blood clots in the extremities and brain, Bell’s Palsy, vaginal bleeding and miscarriages have been reported in persons who are near persons who have been vaccinated.” Such shedding also “appears to be causing wide variety of autoimmune disease (where the body attacks its own tissue) in some persons.”

In addition, other more serious dangers to even the unvaccinated are possible due to the fact that these “spike proteins can cross the blood brain barrier, unlike traditional vaccines.”

Fourth, such shedding leaves children vulnerable if they are in proximity to parents and teachers who have received these experimental vaccines. While the threat of COVID-19 to the young is rightly described as “irrelevant,” including a 99.997% survival rate for those under 20 years of age, AFLDS is concerned some children may become symptomatic due to such proximity to the vaccinated.

At such point there is a danger that “public health bureaucrats” might use such cases to “speculate that a child’s illness is related to a SARS-CoV-2 ‘variant,’” when it is a result of contact with vaccinated adults.

“Our other concern is that children could develop long-term chronic autoimmune disease including neurological problems due to the fact that children have decades ahead of them and trillions of the spike proteins mentioned above.”

Fifth, “AFLDS is aware of thousands of **reports** involving vaginal bleeding, post-menopausal vaginal bleeding, and miscarriages following COVID-19 vaccination as well as anecdotal reports of similar adverse events among those in close contact with the vaccinated.” While at this point the independent physicians organization “cannot comment definitively on the close contacts” other than to mention they “have heard reports of this worldwide,” the **many reported incidents of post-vaccination vaginal bleeding** establishes a clear “**connection between the vaccine and irregular bleeding.**”

“Despite this clear-cut evidence, menstrual-cycle changes were not listed among the FDA’s **common side effects** in its phase-three clinical participants. Women’s reproductive health needs to be taken seriously rather than **waved away** by agenda-driven public health officials,” the brief reads.

Finally, acknowledging the “**irrepressible economic incentive among pharmaceutical companies**” to market **unnecessary and dangerous childhood COVID vaccines, boosters**, and the like, AFLDS insists “**Public health experts should stop and assess data on possible vaccine side effects and related post-vaccination questions before it is too late.**”

So Pfizer’s own internal report (on page 69) warns health care workers about being exposed to people who have been vaccinated – which is rather ironic considering most health care workers are required to be vaccinated themselves.

Anyone walking in to a hospital or doctor’s office will be exposed to the spike proteins being shed by virtually the entire staff of workers – but the concentrations will be low compared to what is in the blood streams of the vaccinated.

Of course, the amount of spike proteins you could actually breathe in is miniscule compared to the amount that these vaccines are programming vaccinated people’s bodies to manufacture – non-stop 24/7.

A recent study confirms that the spike proteins produced by the mRNA vaccines can indeed cause serious health problems as they continuously build up in the vaccinated.

As literally trillions of these spike proteins build up and overwhelm your body, your internal organs will begun to shut down and your brain will stop functioning – which is why a U.K. government report is predicting a huge percentage of doubly vaccinated people will be dying in the coming “Third Wave” of the fake pandemic.

This coming massive death toll will, of course, be blamed on new, exotic-sound virus “variant” – or better yet, “scare-iants” – and the “selfish unvaccinated.”

Needless to say, it would behoove everyone who is unvaccinated to avoid extended exposure to the vaccinated, especially in confined spaces.

The entire world has never been deceived on such a massive scale.

It would appear **that** Satan indeed has been loosed from his prison – and he knows his time is short to make this final **move** to dominate this world before he is destroyed.

The death numbers are overblown- covid didn't kill all those people.. remdesivir did.. hospitals soaked up millions in taxpayer funds to vent and treat with this killer.. funny that doctors were so puzzled that organ failure was part of the covid flu..it was not.. for every step they took including putting many on Dialysis after treating with rimdisever and going into renal failure was a huge payday for the medical community.

bottom line do not go to the hospital.. your life could depend on it.

Yes, Remdesivir seems to be Fauci's favorite. Sure to _____. The only legal way pharma can push us to take the Jab is to say that Covid has no remedy. But it does have remedies such as hydroxychloroquin & zinc or Ivermectin which are banned by Fauci and the Feds.

Reply to [Jiree](#)

Agreed that the death numbers are overblown and that some died from using Remdesivir. However, some did actually survive due to Remdesivir. I agree also

with stay away from the hospital because they won't bother using Ivermectin which works and doesn't cause renal failure. Remdesivir causes renal failure in 25% of patients.

Who says you will die if you catch it? Its got a death rate of 0.05% that's 5 people in 10,000... After reading what damage the “vaccine” can do to the body, how it destroys your innate immune system how quickly any faint protection fades,how it pressures the virus to mutate and all the thousands of deaths and disabling injuries that the “vaccine” seems to

have caused I'd rather take my chance of catching the virus with my God given immune system to protect me thanks, and can you guess? I am NOT on drugs!!!! I'm just using my God given brain!....

Mrs Nobody ⌚ 6 months ago

↻ Reply to [randy](#)

Yes. This is the message that needs to go viral. The HCQ & ivermectin with vitamin protocol is saving lives. I've seen it with my own eyes. It's nothing short of a miracle. Many could have been saved with immediate early intervention. The protocol of test and zero treatment until need for hospitalization is beyond criminal. So many elderly were neglected and outright euthanized by this standard of “care” Completely disgusting. I sincerely hope that these atrocities are someday held to account. So glad you and your family are well. Natural immunity & herd immunity coming in hot.

I asked the hospital to give my parents the life savings medicine. The Dr's. Said they couldn't have it because of the heart medication they were on. Liars! They were so sick they weren't taking their meds. My son-in-law's father is on heart meds and he got the monoclonal antibodies and was covid free after 2 days! The hospital let my parents die for the xtra money for the ventilator and because they were elderly white people. They will be judged by their evil deeds. God help us all.

I am not a DR. but the more I research this, I believe the vaccine is the variant and the variant is the vaccine. This would explain why this bio weapon virus was created, and then a bio weapon vaccine announced to be the solution. Then couple that with fear, and people run to the vaccine; which will never gaurd people from infection, because the infection is in the injection. Such a sinister plan

from so many greedy people involved globally.

They believe they can play god; and reduce the population. Genocide is nothing new to man, it can be disguised and ruthlessly harm millions, but just look like a miracle drug, inducing people to take it, out of fear; due to not knowing to seek the Lord first, and not man.

Kristi, you can drink pine Needle tea to counteract the spike protein. Research it and find out for yourself. You can know you are subjected and being harmed by spike protein shedding when you see small almond size mysterious bruises on your body for no apparent reason. They are oval shaped and usually superficial and don't hurt. But it means bleeding is taking pk A certified in your body. Also a blood test may show t g at you have increased CRP protein which demonstrates increased body inflammation.

Darn, I didn't know anything about this. So what do I do if I work in a supermarket where nearly everyone has been vaccinated and I am in close contact with everyone?

I've never heard of Pine Needle Tea either. Is it easy to get a hold of?

Loading...

Gord ⌚ 7 months ago

🗨️ Reply to [John9](#)

I just pick the needles off the tree, simmer, not boil for 5-10 minutes, strain, add honey and drink. Very refreshing taste. You do not need to buy if you have pine trees around

Caution, NO LODGEPOLE, PONDEROSA, or NORFOLK PINE

Google for confirmation, there are lots of sites

White Pine I've heard is great. But not directly for anything other than allergies. I plan to find some white pine and pick the needles and make my own. Hoping to stop having to buy Claritin-D.

Wow, I have these bruises all over my upper arms (more red than purple), and I have been drinking pine needle tea, taking chlorine dioxide solution, vit D, C, Zinc, Quercitin.

My whole family got Covid except me. I had one night of violent shaking chills, delirious sort of dreams and woke up soaked in sweat, but felt good as new. Tested negative for Covid. Wonder what's up. Maybe a reaction to spike proteins from my kids' vaxxed friends??

What you describe is EXACTLY the way I feel every time that I am around people that I know have been vaccinated. Obviously, we are all exposed to people that we do not know and that have been vaccinated. I’m becoming keen to knowing who is and who is not when I am with or around strangers, because the fatigue that I feel the next day is REAL. I buy pine needle tea from a seller on Etsy. It does work. I also have an infrared sauna and that helps significantly!

Thank you for posting this. Very hard to find answers to specific questions these days. I know the jab sheds. Looking for any info on the length of the shedding period. With the inefficacy of the jab, the insistence on boosters endangers all. I have survived Covid-19. Don't need a drug that neither prevents nor heals. If it was a real vaccine it would not be as concerning but it obviously has another purpose. Deeply regret that we have allowed the endangering of pregnant women and newborns, as well as threatening the lives of naturally immune children.

I heard Ann Vandersteel talking with Dr. Judy Mikovits on a podcast. Ms. Vandersteel said she got tested for spike proteins, but her test came back negative. Do you advise such testing for the unvaccinated who are concerned about working around the vaccinated? If yes, how can I get that test? Secondly, I heard Dr. Brian Insley talk about doing T-Cell testing to see if his patients have natural immunity against this virus. Do you have any information on that type of test, and how one can get that? These seem to be tests that are far and above a faulty PCR test and beneficial to the patient.

Loading...

Reply to [Sue](#)

From what I have gathered from speaking to people exposed to vaccinated people is that the symptoms they have last for about two to three weeks.

My household was exposed to a vaccinated disability support worker without knowing and one person had unexplained nose bleeds for 2 weeks and another had PMS that she had not suffered from since a hysterectomy 4 years ago.

We now tell people that if they are getting vaccinated or booster shots they can't come around for three weeks.

Loading...

Reply

Cat Mad 8 months ago

I would love to hear from people that have had an increase in their monoclonal antibodies in relation to MGUS and multiple myeloma.

My bone marrow spike protein went from 10% to %15% and I have now officially developed multiple myeloma.

My IGg levels in blood tests went from 17 to 28 and during that increase I was exposed to vaccinated staff every two weeks at the hospital. In fact they have a mass vaccination centre there.

I feel the S Spike may have aggravated my condition and caused it to develop into bone marrow cancer.

My treatment also includes getting plasma exchange and I worry that blood donations that make that product is now contaminated with donations from vaccinated people.

I have been paying close attention to how I feel after being in close contact with people that I know have been vaccinated. Yesterday, I had a hair appointment and was in close proximity for over three hours to my hair stylist who just received his third vaccination. This morning after getting up, I felt so fatigued, that I almost felt like I needed to crawl back into bed. Interestingly, this happens every time I'm with some of my extended family members who have been vaccinated. I am 59 and went through menopause from 2014 - 2016. Is it possible to feel sore and fatigued after being exposed to the vaccinated?

My mother is elderly and lives out of state. I have been going there every few months for the last few years as she is not well. She is vaxed I am not and the lady 2 times I have been there I have gotten very ill with Covid like symptoms, the second time it really affected my breathing and was terribly scary. I had all the symptoms and I knew what was happening and just wanted to leave and get home. My mother is brainwashed and would never understand- I will never get the jab as for one I know what's behind all of this and two I don't tolerate vaccines even if it was legit. I'm literally

afraid to go back and I cannot even explain to my mother what is happening to me. As I said, the second time was worse so who's to say the next wouldn't be even more severe.

I can't be the only one here... since the vaccine came out, EVERY SINGLE TIME I'm around large crowds (especially indoors) that are vaccinated, I get very ill for the next 48-72 hours.

I get very bad frontal headaches that do not respond to NSAIDs, dizziness, lethargy, brain fog and facial pain/pressure.

I now try to avoid large crowds as I don't know what to do to ameliorate these symptoms... anyone else?
