

Putin's Powerful Speech on "Liberal-Globalism"

Clandestine

Jul 13

I completely missed Putin's speech on July 7th while I was breaking down Russian MIL report. I just saw it now on Telegram and it is LOADED with valuable information pertaining to the special military operation as well as the global war on the deep state. Putin's words are extremely telling and we are going to break down the most juicy chunk of his speech.

Listen to it first here:

"Here's first what I would like to emphasize: The West should have realized they've lost from the very beginning of our special military operation in Ukraine. Because it's commencement also meant the start of a fundamental breakdown of the American world order."

Putin is saying that this was over before it started. Insinuating that Russia had everything secure before they began the invasion into Ukraine. And that the consequences of this operation will expose a global "American world order". Also known as the Deep State.

Ukraine is the keystone. Stronghold for Deep State operations.

“This is the beginning of a transition from liberal-globalist American egocentrism to a truly multipolar world. A world not based on selfish rules for no other reason than the pursuit of hegemony. Nor on hypocritical double standards, but on the basis of international law and the genuine sovereignty of peoples and civilizations.”

Notice how Putin and Russia have been extremely clear and consistent in their accusations against “LIBERAL-GLOBALIST AMERICA”, and not America as a whole. Putin and Russia have repeatedly made it clear they know it’s not Trump, it’s not America, it’s not conservatism. It’s a foreign global entity that has infiltrated America in the form of liberalism.

The next interesting bit talks about the double standards on the “basis of international law” and how the Liberal-Globalist US are a threat to the genuine sovereignty of all “people and civilizations”. Putin is referencing the alleged bioweapons labs, and the threat the Deep State biological network poses to every human on Earth. Russia is not messing around and they are seeking justice for the crimes against humanity committed by the ruling families of the DNC, as per the allegations from Russian MIL.

“On their will to live their historical destiny, with their values and traditions, and build cooperation on the basis of democracy, justice, and equality.”

Talking about the salvation of the free peoples of the world living free of the globalists with our family values and not this globalist left-wing bullshit we have been fed for decades now. Every human deserves a chance at life, not to be meddled with by the likes of politicized biological warfare...

“And it must be understood that this process is already impossible to stop.”

.... Did Putin just say “NOTHING CAN STOP WHAT IS COMING”? That’s sure as shit what it sounded like to me.

Putin consistently sounds like Trump now. Literally calling out the liberal deep state globalist every time he gets in front of a microphone and advocating for them to be put on trial for crimes against humanity via violation of the Biological Weapons Treaty.

Guys, this is not hyperbole. This is not theoretical. This is as real as it gets. Putin is not joking in the slightest. This is war against the Deep State. And Putin is showing zero intentions of backing down.

This is the world's final stand against globalism. You're watching it unfold before your very eyes. It might be tough for many to believe, but Putin will one day be considered one of the great heroes of humanity.

Truly an amazing time to be alive for Humanity globally. Total #EXPOSURE of the evil that infiltrated every aspect of so many lives will make the pain of short term suffering totally worth the return of respect for reality.

Rich Keal Writes Freebridge Jul 14

The globalist banksters that have killed millions in wars are desperate to hang on. The ability to print money is the backdoor to Communism, buying media, medicine, morality and everything under the sun. Staving the masses while blaming free markets and free thinking

everything under the sun. Starving the masses while blaming free markets and free thinking through cultural Marxist tactics. <https://bit.ly/fundingbolshivism> and <https://youtu.be/BXeAlxK7rY4> are excellent pieces that cover the gamut.
