Mark I know people say this every week, but this is the most horrific one yet. It keeps getting longer every week, it keeps getting younger every week.

It's unfathomable seeing how many 45 and younger, teens, young adults, children, how many have been cut down in the prime of their lives by these injections. I can't believe this isn't the number one story in the nation.

Truly speaks to the state of this country when our children, family and neighbors are dying in their sleep and we can't even ask, "why"?
