Covid-19 vaccination is causing mass depopulation.

This is an extremely bold claim to make.

The world is at a crossroads, and the elite has two choices. They sustain millions or even billions of people with financial support and help to ensure they survive and live quality lives. Or, they set about to depopulate the world.

Unfortunately, evidence suggests they chose the depopulation route a while ago, and their plan to do so is already in motion.

Here is that sinister and alarming evidence.

As you can see from the above, from around May 2021 onwards, England and Wales recorded a huge amount of excess deaths that were not attributed to Covid-19 compared to the five-year average. It then appears that excess deaths dropped at the start of 2022.

But appearances can be deceiving, and the only reason they dropped is that the ONS decided to include the 2021 data in the 5-year-average. This makes it all the more concerning that excess deaths have been recorded every week since the end of April 2022 compared to the five-year average (2016 to

We also see a similar pattern occurring in Scotland.

Scotland has recorded excess deaths among all age groups since the beginning of 2021. But what's notable here is the same pattern we've seen in England and Wales. In January 2021, a lot of deaths were attributed to Covid-19. But then by around May 2021 excess deaths began to pick up again, however, this time they could not all be attributed to Covid-19.

There has then been a slight fall at the beginning of 2022 before they again picked up around May 2022, just like in England and Wales.

The question is why.

One could argue that perhaps the population of the United Kingdom is extremely unhealthy compared to the rest of the world and therefore more people are dying. But this unfortunately isn't a situation that is just isolated to the UK.

Most of Europe is still recording a significant amount of excess deaths, as can be seen in the following [official chart compiled by Eurostat](https://ec.europa.eu/eurostat/statistics-explained/index.php?title=File:Map01_Excess_Mortality_2022_May.png) (https://ec.europa.eu/eurostat/statistics-explained/index.php?title=File:Map01_Excess_Mortality_2022_May.png) showing excess mortality across Europe in May 2022 –

As you can see, the world is experiencing an extremely serious issue where tens to hundreds of thousands more people are dying than what is expected every single week, and further evidence suggests it's because of the Covid-19 injections.

According to a report published on 6th July 2022, by the UK's Office for National Statistics, just hours before Boris Johnson announced he was resigning as Prime Minister of the UK, the mortality rates per 100,000 are the lowest among the unvaccinated population in all age groups.

The report is titled '*Deaths by Vaccination Status, England, 1 January 2021 to 31 May 2022*' (<https://www.ons.gov.uk/file?uri=/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland/deathsoccurringbetween1january2021and31may2022/referencetable06072022accessible.xlsx>), and it can be accessed on the ONS site [here](https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland) (<https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland>), and downloaded [here](https://www.ons.gov.uk/file?uri=/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland/deathsoccurringbetween1january2021and31may2022/referencetable06072022accessible.xlsx) (<https://www.ons.gov.uk/file?uri=/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/datasets/deathsbyvaccinationstatusengland/deathsoccurringbetween1january2021and31may2022/referencetable06072022accessible.xlsx>).

Table 2 of the report contains the monthly age-standardised mortality rates by vaccination status by age group for deaths per 100,000 person-years in England up to May 2022.

Here's how the ONS present the data for 18 to 39-year-olds in May 2022 –

Cause of Death	Year Month	Age group	Vaccination status	Count of deaths	Person-years	Age-standardised mortality rate / 100,000 person-years
Non-COVID-19 deaths	2022 May	18-39	Unvaccinated	24	180720	14.1

In every single month since the beginning of 2022, partly vaccinated and double vaccinated 18-39-year-olds have been more likely to die than unvaccinated 18 to 39-year-olds. Triple vaccinated 18 to 39-year-olds however have had a mortality rate that has worsened by the month following the mass Booster campaign that occurred in the UK in December 2021.

In January, triple vaccinated 18 to 39-year-olds were ever so slightly less likely to die than unvaccinated 18 to 39-year-olds, with a mortality rate of 29.8 per 100,000 among the unvaccinated and 28.1 per 100,000 among the triple vaccinated.

The 60 to 69-year-olds show exactly the same pattern as 18 to 39-year-olds. The double and partly vaccinated have been more likely to die than the unvaccinated since the turn of the year, and the triple vaccinated have been more likely to die than the unvaccinated since February.

In January, partly vaccinated 60-69-year-olds were a shocking 256% more likely to die than unvaccinated 60-69-year-olds. Whilst in the same month, double vaccinated 60-69-year-olds were 223% more likely to die than unvaccinated 60-69-year-olds.

By May, triple vaccinated 60-69-year-olds were a troubling 117% more likely to die than unvaccinated 60-69-year-olds, with a mortality rate of 1801.3 per 100k among the triple vaccinated and a mortality rate of just 831.1 among the unvaccinated.

The unvaccinated have been the least likely to die every month since the turn of the year.

In April, double vaccinated 80-89-year-olds were 213% more likely to die than unvaccinated 80-89-year-olds, with a mortality rate of 7598.9 per 100k among the unvaccinated and a mortality rate of a troubling 23,781.8 per 100k among the double vaccinated.

But in the same month, partly vaccinated 80-89-year-olds were a terrifying 672% more likely to die than unvaccinated 80-89-year-olds, with a shocking mortality rate of 58,668.9 per 100k among the partly vaccinated.

By May 2022, triple vaccinated 80-89-year-olds were 142% more likely to die than unvaccinated 80-89-year-olds, with a mortality rate of 14,002.3 among the triple vaccinated and a mortality rate of 5,789.1 among the unvaccinated.

The official figures quietly published by the UK Government provide indisputable evidence that the Covid-19 vaccines are deadly and are killing people in the thousands.

How else do you explain significant excess deaths and the **fact** that the vaccinated are significantly more likely to die than the unvaccinated in every single age group?

Newborn Baby Deaths hit critical levels for 2nd time in 7 Months in March 2022

Evidence contained in confidential Pfizer documents, which we will come to shortly, indicates that Covid-19 vaccination increases the risk of newborn babies sadly losing their lives. Unfortunately, we are now seeing evidence of this in real-world data and it can be found in the Public Health Scotland 'Covid-19 Wider Impacts' dashboard (https://scotland.shinyapps.io/phs-covid-wider-impact/_w_1d24036b/).

Click to enlarge

Source

Official figures (<https://scotland.shinyapps.io/phs-covid-wider-impact/>) reveal that the rate of neonatal deaths increased to 4.6 per 1000 live births in March 2022, a 119% increase on the expected rate of deaths. This means the neonatal mortality rate breached an upper warning threshold known as the 'control limit' for the second time in at least four years.

The last time it breached was in September 2021, when neonatal deaths per 1000 live births climbed to 5.1. Although the rate fluctuates month to month, the figure for both September 2021 and March 2022 is on a par with levels that were last typically seen in the late 1980s.

Public Health Scotland (PHS) did not formally announce they had launched an investigation, but this is what they are supposed to do when the upper warning threshold is reached, and they did so back in 2021.

At the time, PHS said the fact that the upper control limit has been exceeded "indicates there is a higher likelihood that there are factors beyond random variation that may have contributed to the number of deaths that occurred".

This is all occurring because of the Covid-19 injections and the confidential Pfizer documents prove it.

Confidential Pfizer Documents reveal 90% of Covid Vaccinated Pregnant Women lost their Baby

The US Food and Drug Administration (<https://www.fda.gov/>) (FDA) attempted to delay the release of Pfizer's COVID-19 vaccine safety data for 75 years despite approving the injection after only 108 days of safety review on December 11th, 2020 (<https://www.fda.gov/news-events/press-announcements/fda-approves-first-covid-19-vaccine#:~:text=The%20first%20EUA%2C%20issued%20Dec,trial%20of%20thousands%20of%20individuals.>).

But in early January 2022, Federal Judge Mark Pittman ordered them to release 55,000 pages per month. They released 12,000 pages by the end of January.

Pfizer state in the document that by 28th February 2021 there were 270 known cases of exposure to the mRNA injection during pregnancy.

Forty-six percent of the mothers (124) exposed to the Pfizer Covid-19 injection suffered an adverse reaction.

Of those 124 mothers suffering an adverse reaction, 49 were considered non-serious adverse reactions, whereas 75 were considered serious. This means 58% of the mothers who reported suffering adverse reactions suffered a serious adverse event ranging from uterine contraction to foetal death.

- 146 non-serious mother cases reported exposure to vaccine in utero without the occurrence of any clinical adverse event. The exposure PTs coded to the PTs Maternal exposure during pregnancy (111), Exposure during pregnancy (29) and Maternal exposure timing unspecified (6). Trimester of exposure was reported in 21 of these cases: 1st trimester (15 cases), 2nd trimester (7), and 3rd trimester (2).
- 124 mother cases, 49 non-serious and 75 serious, reported clinical events, which occurred in the vaccinated mothers. Pregnancy related events reported in these cases coded to the PTs Abortion spontaneous (25), Uterine contraction during pregnancy, Premature rupture of membranes, Abortion, Abortion missed, and Foetal death (1 each). Other clinical events which occurred in more than 5 cases coded to the PTs Headache (33), Vaccination site pain (24), Pain in extremity and Fatigue (22 each), Myalgia and Pyrexia (16 each), Chills (13) Nausea (12), Pain (11), Arthralgia (9), Lymphadenopathy and Drug ineffective (7 each), Chest pain, Dizziness and Asthenia (6 each), Malaise and COVID-19 (5 each). Trimester of exposure was reported in 22 of these cases: 1st trimester (19 cases), 2nd trimester (1 case), 3rd trimester (2 cases).

A total of ⁴⁹ 4 serious foetus/baby cases were reported due to exposure to the Pfizer injection.

- 4 serious foetus/baby cases reported the PTs Exposure during pregnancy, Foetal growth restriction, Maternal exposure during pregnancy, Premature baby (2 each), and Death neonatal (1). Trimester of exposure was reported for 2 cases (twins) as occurring during the 1st trimester.

There were 34 outcomes altogether at the time of the report, but 5 of them were still pending. Pfizer note that only 1 of the 29 known outcomes were normal, whilst 28 of the 29 outcomes resulted in the loss/death of the baby. This equates to 97% of all known outcomes of Covid-19 vaccination during pregnancy resulting in the loss of the child.

When we include the 5 cases where the outcome was still pending it equates to 82% of all outcomes of Covid-19 vaccination during pregnancy resulting in the loss of the child. This equates to an average of around 90% between the 82% and 97% figure.

The CDC has admitted that just 1 to 10% of adverse reactions are actually reported to VAERS therefore the true figure could be many times worse. But to put these numbers into perspective, there were only 2,239 reported foetal deaths to VAERS in the 30 years prior to the emergency use authorisation of the Covid-19 injections in December of 2020. The true risk could however actually be much higher because pregnant women are a target group for Flu vaccination, whereas they are only a small demographic in terms of Covid-19 vaccination so far.

Would it shock you to find out that both Pfizer and Medicine Regulators around the world were all fully aware this would happen and instead chose to cover it up?

INFERTILITY

Medicine Regulators claim that 'Animal studies do not indicate direct or indirect harmful effects with respect to pregnancy etc.'. But this is an outright lie.

The actual study can be viewed in full [here](https://www.sciencedirect.com/science/article/pii/S0890623821000800?via%3Dihub) (<https://www.sciencedirect.com/science/article/pii/S0890623821000800?via%3Dihub>) and is titled '*Lack of effects on female fertility and prenatal and postnatal offspring development in rats with BNT162b2, a mRNA-based COVID-19 vaccine*' (<https://www.sciencedirect.com/science/article/pii/S0890623821000800?via%3Dihub>).

Unfortunately, the study found that Covid-19 vaccination significantly increases the risk of birth defects and infertility.

The study was performed on 42 female Wistar Han rats. Twenty-one were given the Pfizer Covid-19 injection, and 21 were not.

Here are the results of the study –

Table 3. Summary of rat fetal examination data from the embryo fetal development study with control (saline) and BNT162b2 (n = 21 rats per group).

the vaccinated group.

Supernumerary ribs also called accessory ribs are an uncommon variant of extra ribs arising most commonly from the cervical or lumbar vertebrae.

So what this study found is evidence of abnormal foetal formation and birth defects caused by the Pfizer Covid-19 injection. But the abnormal findings of the study don't end there. The 'pre-implantation loss' rate in the vaccinated group of rats was double that of the control group.

has an impact on fertility“?

The truth of the matter is that they actively chose to cover it up. We know this thanks to a ‘Freedom of Information (FOI) request made to the Australian Government Department of Health Therapeutic Goods Administration (TGA).

CONFIDENTIAL PFIZER DOCUMENTS REVEAL THE COVID-19 VACCINE ACCUMULATES IN THE Ovaries

Another study, (https://phmpt.org/wp-content/uploads/2022/03/125742_S1_M4_4223_185350.pdf) which can be found in the long list of confidential Pfizer documents that the FDA have been forced to publish via a court order [here](https://phmpt.org/pfizers-documents/) (<https://phmpt.org/pfizers-documents/>), was carried out on Wistar Han rats, 21 of which were female and 21 of which were male.

Each rat received a single intramuscular dose of the Pfizer Covid-19 injection and then the content and concentration of total radioactivity in blood, plasma and tissues were determined at pre-defined points following administration.

In other words, the scientists conducting the study measured how much of the Covid-19 injection has spread to other parts of the body such as the skin, liver, spleen, heart etc.

But one of the most concerning findings from the study is the fact that the Pfizer injection accumulates in the ovaries over time.

An 'ovary' is one of a pair of female glands in which the eggs form and the female hormones oestrogen and progesterone are made.

In the first 15 minutes following injection of the Pfizer jab, researchers found that the total lipid concentration in the ovaries measured 0.104ml. This then increased to 1.34ml after 1 hour, 2.34ml after 4 hours, and then 12.3ml after 48 hours.

The scientists, however, did not conduct any further research on the accumulation after a period of 48 hours, so we simply don't know whether that concerning accumulation continued.

But official UK data published by Public Health Scotland, which can be found [here](https://scotland.shinyapps.io/phs-covid-wider-impact/) (<https://scotland.shinyapps.io/phs-covid-wider-impact/>), offers some concerning clues as to the consequences of that accumulation on the ovaries.

Cases of Ovarian Cancer are at an all-time high

[Official figures](https://scotland.shinyapps.io/phs-covid-wider-impact/) (<https://scotland.shinyapps.io/phs-covid-wider-impact/>) for the number of individuals suffering from ovarian cancer show that the known trend in 2021 was significantly higher than 2020 and the 2017-2019 average.

- Official Government data showing mortality rates per 100,000 are the lowest among the unvaccinated population in all age groups,
- Official Public Health Scotland data showing new born baby deaths have hit critical levels for the 2nd time in seven months,
- Official Government of Germany data showing birth rates have dropped dramatically in 2021,
- Confidential Pfizer documents showing a miscarriage rate between 82% and 97%,
- CDC VAERS data showing Covid-19 vaccination increases the risk of suffering a miscarriage by at least 1,517%,
- The only animal study performed to prove the safety of administering the Pfizer vaccine during pregnancy indicating an increased risk of infertility and birth defects,
- Further confidential Pfizer documents revealing the vaccine accumulates in the ovaries,
- and further data from Public Health Scotland revealing cases of ovarian cancer are at an all-time high,

It looks like we have more than enough evidence to back up the bold claim that Covid-19 vaccination is causing mass depopulation.

Imagine the smug triple jabbed that abused the unjabbed the last two years, now reading this article.

Talk about having to eat some humble.

How satisfying to know those that called for the unjabbed to be locked down or quarantined are now spike protein factories...

These people have been mind-controlled by the idiot box that sits in the corner of their loungeroom, unfortunately. If they are now waking up, then it is my view that we shouldn't expect an apology (because their consciousness levels are not up to it), but WE SHOULD forgive them and welcome them aboard to the AWAKENED train – the more the merrier. Yes, they have abused us, but if they are a souled human, then they are part of us, and we shouldn't shun them. Having said that, it is still a good idea to not get too close to them, because the components from the jabs may actually spread to YOU (even if you didn't get the jab). This can occur via inhalation (so, best not to get too close) and via skin contact. There are protocols available on the internet to help these folk (and us if we need it). Monitor how you feel when you are around these people, and if you start to feel nauseous or get a headache etc., then MOVE AWAY. However, there is no need to be as mean to them as they were to us. As Gandhi said: "An eye for an eye makes the whole world blind." The unvaxxed are mostly a bit higher on the consciousness scale, that's all, and we are here to HELP the others.

Insurance company figures point to a 40% rise in death claims in 2021. The 10% drop in birth rate cited in the German studies is a huge jump. Coupling 'depopulation' with reduced 're-population' spells disaster.

I find your site's popups requesting donations and comments are intrusive. Though I've just donated, I will look for news elsewhere if I cannot read articles undisturbed. Several donation popups including in the midst of writing this interfere with reading, as does the floating comment button. When I hit the comment button's X, it takes me to the comment section, when I only wanted to get rid of button.

logic arguments with straw man arguments and justify their conviction (and wilful blindness) with a common good ideology strengthened with a moral imperative that says if you dont follow the orthodox view then your a bad person by definition and we can therefore exclude, abuse, penalise and vilify you with no further need for reason or coherence, and have a clear conscience.
