# Report: 44 Percent of Pregnant Women in Pfizer Trial Lost Their Babies; FDA and CDC Recommended Jabs For Expectant Mothers Anyway

By Debra Heine

August 16, 2022

court order. Despite this, Pfizer, and the Biden administration insisted that the vaccines were safe for pregnant women. Out of 50 pregnant women, 22 of them lost their babies, according to an analysis of the documents.

In a January court ruling, U.S. District Judge Mark Pittman of the Northern District of Texas, ordered the Food and Drug Administration (FDA) to release around 12,000 documents immediately, and then 55,000 pages a month until all documents were released, totaling more than 300,000 pages.

The nonprofit group, Public Health and Medical Professionals for Transparency, sued the FDA last September, after the agency denied its Freedom of Information Act (FOIA) request to expedite the release of mRNA vaccine review documents. In a November 2021 joint status report, the FDA proposed releasing only 500 pages of the documents a month, which would have taken up to 75 years.

Trial documents released in April revealed that Pfizer had to hire 1,800 additional full-time employees in the first half of 2021 to deal with “the large increase” of adverse reactions to its COVID vaccine.

The Pfizer-BioNTech COVID-19 Vaccine was made available under the Emergency Use Authorization (EUA) on Dec. 11, 2020. By February of 2021, the company was seeing so many safety signals, including in pregnant and breastfeeding mothers, it had to immediately hire 600 employees to process the data.

A batch of documents released in late July showed that 44 percent of women who were pregnant during the trial suffered miscarriages, feminist author and journalist Dr. Naomi Wolf revealed on Steve Bannon’s War Room podcast. Wolf has been spearheading research and analysis of the Pfizer documents through her website Daily Clout.

In the past, only 10 to 15 percent of known pregnancies ended in miscarriage.

“Pfizer took those deaths of babies—those spontaneous abortions and miscarriages—and recategorized them as recovered/resolved adverse effects,” Wolf told Bannon. “In other words, if you lost your baby, it was categorized by Pfizer as a resolved adverse event, like a headache that got better,” she added.

Wolf said adverse event cutoff report showing the miscarriages was March 13, 2021, and the FDA received the report on April 1, 2021.

Therefore, the FDA had this data nearly a year and a half ago, and instead raising an alarm, they, along with the CDC, went ahead and recommended the experimental injections for expectant mothers anyway.

“Over a year ago, the FDA received this report that out of 50 pregnant women, 22 of them lost their babies, and they did not say anything,” Wolf said, choking back tears. “Thus the FDA was aware of the horrifying rate of fetal death by the start of April 2021 and were silent.”

The CDC, as recently as last month, still recommended the experimental mRNA vaccines for pregnant and breastfeeding “people.”

“COVID-19 vaccination is recommended for all people 6 months and older. This includes people who are pregnant, breastfeeding, trying to get pregnant now, or might become pregnant in the future,” the CDC claims in a July 2022 post on its [website](#). “CDC also recommends COVID-19 vaccines for infants 6 months and older who’s mother was vaccinated or had a COVID infection before or while pregnant.”

The FDA and CDC could conceivably claim they were unaware of high rate of miscarriages in the trial because Pfizer attempted to obscure the data.

“Pfizer notes the miscarriages as serious adverse events with moderate or severe toxicity ratings,” Wolf explained. “However, all of them were recategorized, by Pfizer, in the internal documents under the category of adverse events that were ‘recovered’ or ‘resolved.’”

Wolf noted that the Pfizer trial data correlates with the massive increase in miscarriages seen worldwide since the vaccine rollouts.

“If you extrapolate, globally, to all the pregnant women who are injected, it could explain what we’re seeing now of a baby die-off. 200 percent rise in neonatal deaths or spontaneous abortions and miscarriages in Scotland,” she said, adding, “86 babies died in Ontario when they usually have five or six [per quarter], and in Israel, a 34 percent rise of spontaneous abortions and miscarriages to vaccine.”

[Back in January](#), three military doctors who had access to vaccination data in the DoD’s Defense Medical Epidemiology Database (DMED) disclosed that miscarriages and cancers among members of the US

military had increased by about 300 percent in 2021 over the five year average.

These alarming safety signals were among several others brought to light by Thomas Renz, a member of [America's Frontline Doctors'](#) legal team, during a [panel discussion](#) convened by Sen. Ron Johnson (R-Wis.) in January.

The CDC, however, still maintains on its website that “evidence continues to build showing that: COVID-19 vaccination during pregnancy is safe and effective.”

The agency also claimed “there is currently no evidence that any vaccines, including COVID-19 vaccines, cause fertility problems in women or men,” despite recent studies [showing otherwise](#).

Dr. James Thorp, an physician MD board-certified in obstetrics and gynecology, as well as maternal-fetal medicine, said in a recent interview that he has seen a massive spike in fetal death and adverse pregnancy outcomes after the mass vaccination campaign began.

Dr. Thorp told Epoch Times he has practiced obstetrics for over 42 years and sees 6,000–7,000 high-risk OB patients a year.

The obstetrician declared that the use of the experimental COVID vaccines on expectant mothers “broke all the rules.”

“We have always been guided by that principle, that longstanding, six millennia principle—the golden rule of pregnancy—you never, *ever* use an investigational drug, a new substance, a new drug, a new vaccine—even if there’s a potential benefit,” he said. “You don’t *ever* use a new substance in pregnancy.”

Thorp said that in his practice, he’s seen a “significant increase” in problems, including “extraordinarily abnormal menstrual periods” before pregnancy.

“The vaccine I’m very concerned about and I do believe that in pregnancy, it’s contraindicated,” he said.

He said that his attempts to disclose these adverse events have been hampered by the imposition of gag orders on physicians and nurses that were imposed in September 2021.

In September of 2021, the American Board of Obstetrics and Gynecology (ABOG) put out a [statement](#) in support of the Federation of State Medical Boards' (FSMB) contention that “providing misinformation about the COVID-19 vaccine contradicts physicians’ ethical and professional responsibilities.” The ABOG said physicians disseminating “misinformation” would be subject to “disciplinary actions, including suspension or revocation of their medical license.”

The ACOG, like the CDC, recommends the experimental injections for “pregnant people.”

“The fact that ABOG would recommend this “vaccine” in pregnancy is an abomination and may well be the greatest disaster in the history of obstetrics,” Thorp wrote in [an article](#) in the Gazette of Medical Sciences (GMS), titled: *Patient Betrayal: The Corruption of Healthcare, Informed Consent and the Physician-Patient Relationship*.

Nah, to the hangman's deck. And far FAR more than just the CDC/FDA/Pharma people. The heads of medical societies enforcing bs gag orders, the MSM repeatedly pushing the false narrative, every.single.employee at any social media platform who removed, banned, blocked, or otherwise silenced people questioning this garbage shot.

All part of the replacement which isn't so great for us. The globalist left is importing foreign replacements to Western countries for the Westerners they are killing (abortion, shots) or sterilizing (trans movement).

Bill gates (owns a large amount of big pharma) has long advocated for population control. He and his wife have been buying 'vaccines' for third world countries for years. The covid vaccine was the largest trial ever tried on the human population. We are just starting to see the results of that trial.

Pretty sure one of those countries also sued and banned Billy boi and his foundation from their country too because they found out they were basically using the population as involuntary guinea pigs. Should have had a human rights tribunal for that one.

It happened in Russia against White Christians the same way, many Conservatives still haven't figured out who there enemies are yet, because it's not the "Democrats," and it's not the CCP. It's not even the WEF.

Chabad Lubavitch is above all of those groups, including above the central

bankers, you see them standing behind US presidents as they sign bills that have destroyed America, you see them guiding presidents who send us into global wars. We have the documents proving who they are and what their plans are, and it's now all unfolding.

It;s the authors of this piece gaslighting you. You are shocked that there were 22 identified miscarriages amongst the 4 million plus woemn who were pregnant during the time this data was gathered. Thats actually a 0.00005% miscarriage rate.

This is on Trump.

Some of it yes. But the lying by phizer is their fault, and the insistence on saying it can be given to pregnant women still (and as it happens with this admin, pregnant men) is the Biden administration's fault.

So go ahead blame Trump for part of this, but F\*\*\* YOU if you think you can lean on the new two rules of law and let phizer and Biden off the hook!!!

And when Trump did that it was then a novel virus that we really didn't have much data on in terms of danger/lethality etc. etc.

He certainly didn't have the data that the Biden Admin did

Nor did Trump mandate its use.

Remember too, that Trump didn't stipulate a methodology, that was done by Pfizer, Moderna, J&J and the FDA & CDC.

But Biden finally got a bill passed to allow the government to bargain for lower prices for Medicare. Why did it take so long?

Trump never got that done.

2 ^ | v 10 • Reply • Share >

**h2k** → Orygunduck • 6 days ago

Bargain? Those of us who are thinking call it price controls. And price controls will cause capital to flee the pharma industry and you'll see far fewer drugs

being introduced into the market. Any government action - any action - is disruptive to the market and causes unintended consequences. A few years ago when Hillary was a senator in NY, she pushed a bill that capped prices on flu vaccine. Guess in which year there was insufficient supply of flu vaccine when it was plentiful before?

10 ^ | v 1 • Reply • Share >

**Orygunduck** → h2k • 6 days ago

Except it is not.  
What existed before was price controls and set up to artificially inflate profits of drug makers. And Republicans liked it that way.
