Why do Democrats continue to insist that election fraud *does not exist* — and that such “baseless claims” have been “debunked” — when prominent Democrats insisted that election fraud *does exist* and *it's a very big problem* in 2017 and 2018 and 2019 and 2020? Did they all suffer from *simultaneous amnesia* about the hearings they held, the expert witnesses they gathered, and the interviews they gave for the documentary “Kill Chain: The Cyber War on America’s Elections” on HBO?

I published an excerpt from the new book *The Parallel Election* in which the co-author Gregory Stenstrom provides a riveting first-hand account of how the 2020 election was

stolen in Delaware County, Pennsylvania by a cabal of Democrat activists and establishment GOP politicians. Stenstrom was a certified poll watcher for 36 precincts in Pennsylvania during the 2020 election — and so he personally witnessed the cheating take place.

VoterGA Uncovers Massive Election Fraud in Georgia

Why has [a federal judge in Georgia refused to release a report](#) by a cybersecurity expert who inspected Dominion voting machines and found them vulnerable to hacking and manipulation? The Federal Government Admits: Voting Machines Can Be Hacked!

President Trump blasted out my Substack article "Something Stinks in Georgia" (120,000 page views and climbing!) to his followers on TruthSocial yesterday – and it sent Biden's unpaid staff in the media into a frenzy. Discredited media outlets for beta-males and aging hippies like...

Why has an 84-page SEB complaint been filed in Fulton County (GA) showing that the vote tally for the 2020 election (as recorded in November 2020) and Fulton County's vote tally for the recount (as conducted and certified in December) still do not match?

EXCLUSIVE: Fulton County Still Can't Explain Its 2020 Election Results

A formal complaint (obtained exclusively by Emerald Robinson) has just been filed with the Georgia State Election Board regarding "errors" in the vote counting in Fulton County that impacted the stolen 2020 election. This 84-page complaint (which is too long a document and too large a PDF file to include here) explains in detail how Fulton County failed...

How's it possible that the director of Mark Zuckerberg's private election charity for Democrats (on temporary leave!) just won *the most important election integrity race in Colorado* — and a GOP primary no less! — as a *write-in candidate* by a 15 point margin with *no money and no visible support from Republicans in Colorado*? Even though she was trailing *by 20 points* the day before the election? It sounds impossible — because it is impossible.

How Did A Zuckerberg Charity Stooge Win A GOP Primary In Colorado?

The story of the GOP primary race for Secretary of State in Colorado gets more interesting the more you investigate the results. As I noted yesterday, the big news is that an Australian businessman named Mike O'Donnell somehow got 28% of the vote (173,000 citizens voted for him!) even though polling showed he had no support, he raised \$4,700 for his camp...

Why did Fulton County's IT Director — and ex-Dominion Voting Systems employee and Nigerian citizen! — Dominic Olomo keep calling *emergency meetings* with Fulton County election officials to certify results that nobody else had seen?

Exclusive: Fulton County Gets Busted Certifying False Election Results!

Today I've got exclusive coverage of Fulton County elections — and the obvious fraud being conducted in Georgia using Dominion Voting machines. That's because I've obtained documents from a source who has been in contact with Fulton County election officials, and those documents show that the claims made by Fulton County's IT Director (and ex-Dominion V...

Why did a local newspaper in Georgia called *Decaturish* report on the results of a *hand count* in a District 2 County Commission primary race in DeKalb County *between Democrats* — and that the hand count revealed such massive discrepancies between the May 24th machine results and the June 1 hand count that it *flipped the race*?

The corporate media's absurd position in 2022: it's a *conspiracy theory* to say that America's voting machines can be hacked, and if you insist on doing audits *you're crazy*, but it turns out that Dominion Voting Systems machines are *completely vulnerable to hacking once you allow the experts to review them by filing lawsuits* because the federal government itself just admitted in a cybersecurity bulletin to state election officials that the machines can be hacked!

I Need Your Support!

Who held the Biden Administration to account for its corruption every day like me?

Independent and fearless journalists need your support *like never before*.

I need your support like never before.

The corporate media is completely corrupt. Just go down the list: the Russia Hoax, the stolen 2020 election, the deadly COVID vaccines. The corporate media is actively trying *to hide the truth from the American people* on a daily basis.

If we are going to survive the current regime then we must stand together.

I’ve got your back.

Do you have mine?
