

# Pediatrician Michelle Perro speaks out against the COVID vaccines

It's not often that a pediatrician speaks out publicly against the COVID vaccine. I finally found one that was willing to risk losing her license to speak out frankly with the camera rolling.

[Michelle Perro, MD](#) is one of the very few pediatricians who is not afraid to speak the truth about the COVID vaccines and her peers.

I originally planned this to last just 30 minutes, but [the interview lasted for 90 minutes](#) covering a wide range of topics including censorship of doctors, AB2098 (the California doctor censorship bill that was just signed into law), clinical practice guidelines, why her peers are retiring in large numbers, MIS-C rates in children, whether she has been able to red-pill anyone (short answer is no; she talked to 30 of her peers and red-pilled 0), are GMO foods safe or not, how can doctors be looking the other way while we give our kids unsafe drugs, and more.

If you want to get some insight as to what doctors are thinking, [have a listen](#).

I'm still watching this interview, which is excellent. I see why you scheduled 30 minutes and then stayed another 60 minutes! 🤔

One observation: Dr. Perro mentions that current medical education needs to be reformed, top to bottom. She's right, of course, but I think the reformation is actually happening, albeit informally as many of us are taking our health care into our own hands.

Take me, for example: I haven't seen my internist (or any conventional allopathic physician) in many years BUT I have seen various health practitioners, including:

- \* an alternative endocrinologist (who helped me to get OFF thyroid medication);
- \* two different (and very good) acupuncturists;
- \* chiropractors; and
- \* masseuses.

I'm looking for a homeopath and herbalist. I'm in New York City, so if anyone has any recommendations....

If only there were thousands of doctors with her knowledge and experience practicing today

with at least one near me. My kind of healer. Great interview!
