

The Mortality Rate Is Up 17% Across The Vaccinated World

Why are cancers rising rapidly in 2022 as well as non-COVID deaths?

Last week, I recommended that my followers pay attention to [the Twitter account of Dr. Andrew Huff](#) — because he's the most important whistleblower in America right now.

This week, I recommend that you follow [the Twitter account of the Ethical Skeptic](#) — who might be the most important COVID data analyst right now.

Why?

The Black Ops/SCI Top Secret US Naval intelligence officer and data expert [known as the "Ethical Skeptic" on Twitter](#) has been keeping tabs on the CDC's database releases, and he's got some very bad news: the mortality rate across the vaccinated world is up 17% and cancer is "at a 9-sigma rise."

Ethical Skeptic 🌞 @EthicalSkeptic · Oct 19

Cancer is at a 9-sigma rise. The numbers are more than clear on this.

Cancer is a hard ship to turn, slow to move 1-sigma. This is a hard-rudder turn for cancer, which means something is right ahead.

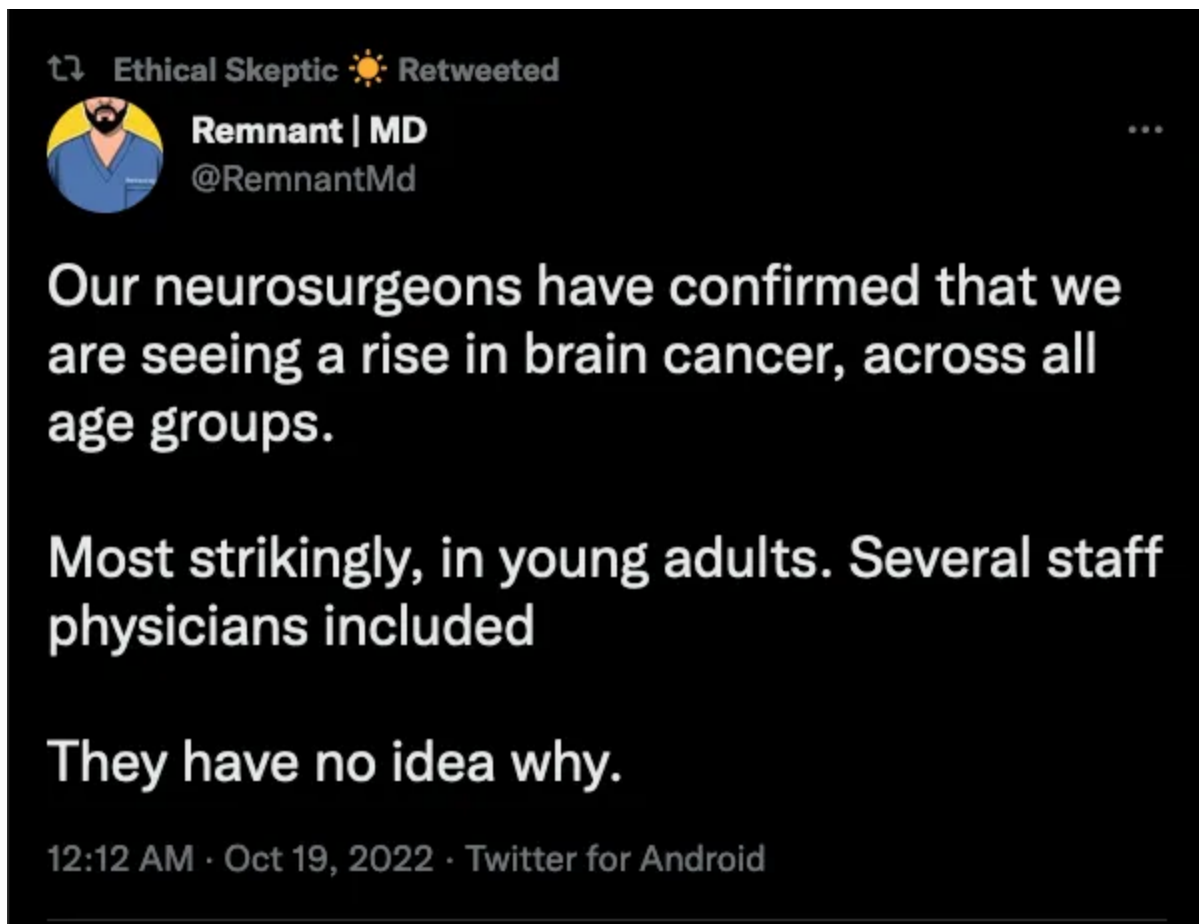

And the CDC has panicked over it enough to risk fraud to cover it up.

The top chart, titled "Malignant Neoplasms (C00-C97) Deaths - Wk 40 (Lag/MCoD Adjusted)", shows weekly deaths per million people from 2017 to 2022. It features two lines: a blue line for actual deaths and a green line representing a trend with a lag. A vertical dashed line marks the MNIWR Week 34 2022 reflection point. Annotations include "o-event = 9", "0.23% annual growth", and "75% of Wonder MCoD-UcOid differential added back to ICD-SO for Cancer post wk 22 2022". A callout box states "30,600 Extra Anomalous Deaths Since MNIWR WK 34 2021".

The bottom chart, titled "CDC Reassignment of Cancer UCOD to Covid UCOD - Trend 2018 - 2022 (Wk 38)", displays the percentage of deaths assigned to COVID-19 versus cancer. It includes a red line for the trend and a green shaded area indicating a 75% false rate. A large text box explains: "CDC made the decision during the 'System Upgrade' to begin hiding cancer ICD-10 UCOD [C00-D48] deaths by reassigning MCoD-Cancer deaths to Covid UCOD (U07.1) regardless of what the attending physician had reported... thereby making 'MCoD Cancer with Covid UCOD' deaths a suddenly very large component of overall Covid Mortality for the 22 weeks since this change in policy ('23%). This has served to fraudulently lower the Cancer Mortality Trend. This policy change was not possible to accomplish in the field - in such short order, 100% compliant, and without a directive. Therefore, it was adopted unilaterally by the CDC itself."

At the bottom left, there are social media interaction icons: a speech bubble with "142", a retweet icon with "2,461", a heart icon with "4,423", and a share icon.

The extraordinary increase in cancer cases seems to be confirmed by various doctors who can speak honestly on social media because they are speaking anonymously.

Here is lag-adjusted non-COVID mortality on a chart.

This is happening around the world right now. Here's Dr. John Campbell explaining that 17% more people died in Australia in the first half of 2022 than expected.

Dr.No (Reformed)
@DrNo_Reformed

17.1% more people are dying of a mysterious cause, and nobody on the news cares.

Excess mortality rates are being noticed by insurance industry experts as well — particularly in working age people between the ages of 18 and 64.

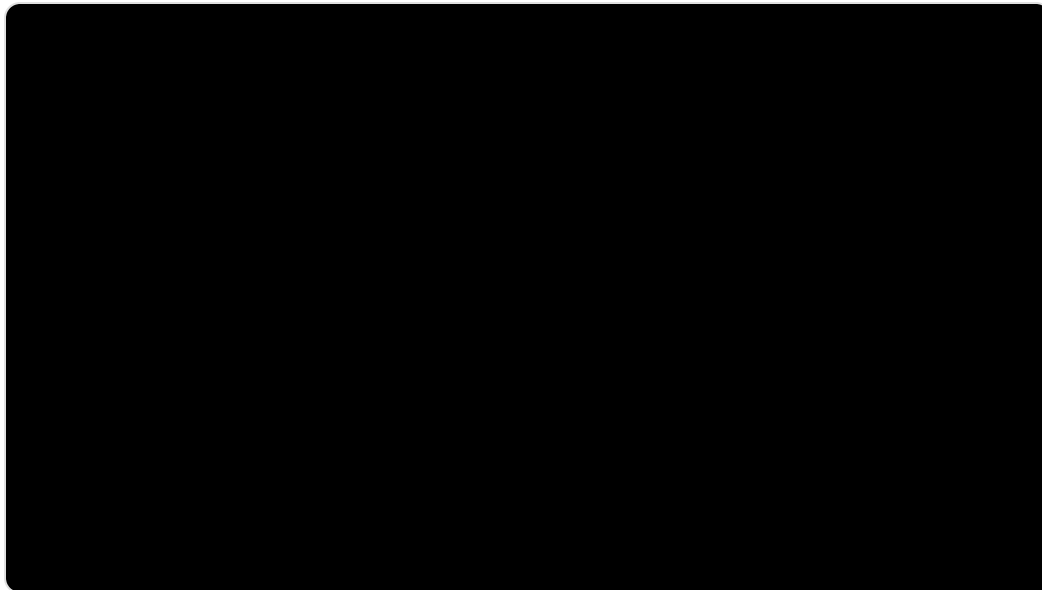

Dr.No (Reformed)

@DrNo_Reformed

Largest mass die-off of the working class in history?

CEO of an insurance company with 2,000 employees claiming a 10 sigma event of working class people dying off. 1 out of a billion years?

The Ethical Skeptic has been closely monitoring the CDC's data game-playing to hide excess deaths.

@EthicalSkeptic

...

And there we have it with today's Wonder data drop folks.

Undeniable smoking gun proof.

CDC is now (post 'system upgrade') unilaterally shifting Cancer UCoD deaths to Covid UCoD deaths (even trivial nosocomial cases of Covid). Thereby hiding the stark cancer increase from you.

11:43 AM · Oct 18, 2022 · Twitter Web App

The Ethical Skeptic contends that the CDC database is being manipulated to hide the side effects of the experimental COVID vaccines.

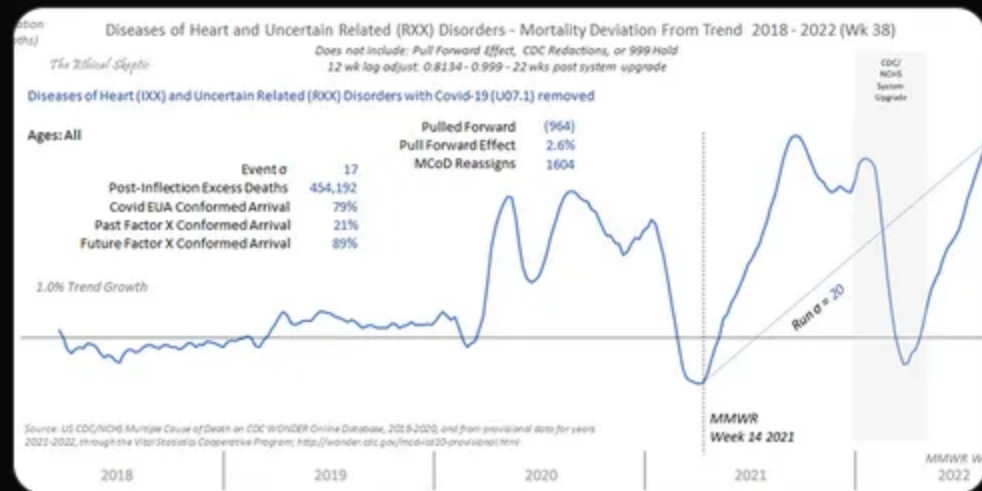

Ethical Skeptic 🌞 @EthicalSkeptic · 14h
And there it is... 😎

Add heart related RXX Abnormal Clinical & Lab Findings
Mortality back into IXX ICD-10 Heart related mortality, and

You find the hidden Heart Related Deaths.

Despite Covid at a VERY low level, we are at an all time peak
in heart related deaths.

20-sigma

Here's that screenshot up close. You should probably sit down before you read this last chart — especially if you're vaccinated.

In sum: there very little COVID in the world now, but there's plenty of unexplained deaths.

Heart-related deaths. Cancer deaths.

How many of those deaths were vaccinated people?

I Need Your Support!

Who's the only reporter in the world [to ask Dr. Fauci why he funded the Wuhan Lab of Virology](#)? Who was the first reporter [to confront Jen Psaki about Hunter Biden](#) and his Chinese investments? Who [asked President Trump when he would stop](#) the NIH's funding of the Wuhan Lab in April 2020 — a year before any other media outlet?

Independent and fearless journalists need your support *like never before*.

I need your support like never before.

If we are going [to survive the current regime](#) then we must stand together.

I've got your back. Do you have mine?

I took two shots and now get extremely short of breath going up one flight of stairs. I suspect I will die of a "heart event" in the next 12-24 months. This is anecdotal but it is my experience.

Been following Ethical for over a year now. Don't have a Twitter account. Have wanted to ask if the cancer and heart issues could also be a side effect of having been infected with the virus itself. Agree the shots are awful, but if this was an engineered bio weapon ...
