Red Voice Media would like to make a point of clarification on why we do not refer to any shot related to COVID-19 as a "vaccine." According to the CDC, the definition of a vaccine necessitates that said vaccine have a lasting effect of at least one year in preventing the contraction of the virus or disease it's intended to fight. Because all of the COVID-19 shots thus far available have barely offered six months of protection, and even then not absolute, Red Voice Media has made the decision hereafter to no longer refer to the Pfizer, Moderna, or Johnson & Johnson substances as vaccinations.

It won't be so much the dead who will need our help. It will be those who get injured, because of the jabs.

Helping them is what we must prepare ourselves for, since this task will likely be huge.

There is also the concern of the nanotech/transhumanism aspect. We see these synthetic systems being built in peoples bodies, they now have their own Bluetooth signals and according to the WEF "Covid 19 will be remembered when we accepted mass surveillance under the skin", "humans are now hackable", "Free will that's over" -Yuval Harari. So those who survive this assimilation process what will become of them? Will they be controllable are they already? Looks like a possible bdy snatchers/they live type scenario forming crazy days were living in.

With synthetic systems coming to light for me I could and would assume that the person no longer has any free will, And with that said they would become assets/property of the companies that have transformed them leaving them with no rights at all. I have recently read that any fluid transfer from these people would transfer to the unvaxed.

What do you mean by injured? If it's something that disables them, and we can't trust doctors or nurses, how could we help them? Do you have any theories why some of those that convulse start reaching for the air before collapsing? I'm thinking that it could be electrical signals.

I've watched what you stated {Start reaching for the air before collapsing} and I also was thinking electrical. I watched allot of those clips again and I've come to the mindset that they were seeing something. What they were reaching for and seeing I have no idea but something was definitely there.

Some in the Church say that the sinner must ask for forgiveness. That there is acknowledgement of sins and repentance. That we are not to just give it unconditionally. This is known as the Office of the Keys.

Justice is also separate from forgiveness.

There must be justice for the crimes committed.

BULLCRAP! Printing and distributing PAP like this does nothing but motivate the small brained fools who actually believe this psychobabble. If they don't want to take the jab.....DON'T TAKE IT. If you get sick and die it will be your OWN doing.

Yes, because the actual people with the poison in the veins are going to be just fine. Lol. You know Covid is nothing but a light flu, the jab however, has no benefit, only risk. You can have all my shots. Enjoy. (I love these ostriches with their head in sand, they are so entertaining.)

The medical system is one of the most jaded and boosted groups in society and the death and incapacitation rate will be high. Also, if the seriously injured and impaired will need intensive care, it will take many more people to do that.

I will feel no remorse for the deaths of the fakecine fascists – the innocents who didn't know better or were forced to get the clotshot for whatever reason do have my sympathy though.

The real problem though is going to be those of us who survive as, depending on the fatality level, we could very well lose enough people that essential services could start shutting down and collapsing.

If enough people who work at the power or water company die from the fakecine then we're f-d.

Same thing with people who produce food or move food or sell it.

And just imagine what's going to happen in all of those blue cities where the entire police department got the beastly jab – you think things are bad now – the whole city will be burned and looted after all of the cops die.

I live in central Minnesota, I didn't take the jab I thought it would be foolish to do so. I'm 63 and I had a very mild case of covid. I'm just wondering if we're going to lose 10% of the population to the experimental jab how come I don't know a single person who's died from it,? Just sayin and wondering.....

If you do not personally know of anyone that has died in the past two years you are lucky. One thing though, my ex sister in law is a good case. She was boosted seven days prior to her passing away in the passenger seat of my ex's Jeep. Family vacation, all the kids, a week in Florida in a condo. She was fine all week with all of the kids and what not. Her and my ex went to leave, she got into the Jeep, said she felt dizzy and that was it. She was gone that quick. The ER doctor found her lungs were two bricks of clots, and specifically blamed the recent jab. There was no autopsy. The death certificate read "Heart Failure". Seems to be a lot of this, no autopsy and and a cause of death that does not fit the actual circumstances.

The death rate of the working age population is about 3,300 per 100k (about 3.3%). After the jabs, it has risen to about 4.6%. If you know 100 people, then about 4 or 5 may have died... on average. It's increased from about 3 per 100 to 4 per 100. That isn't terribly noticeable.

I'm aware of 1 person who took the jab and had cancer come raging back. Gone shortly after diagnosis.

However, this is just year one of the Long-Cull. I don't think most were going to die in the immediacy after the shot, but that their lives will be significantly shortened. This will take a generation or two to know the full scope, which will allow for the fertility impacts to be seen.

My body count is at 16, mostly Canadian, within a day or week of the first round. My SIL was jabbed in TN. I know of five that were killed in the hospital due to the Fauci protocols. They could not see a doctor due to everything being shut down, so they locked themselves in the house and attempted to treat themselves until they were all hauled off to the hospital. All five died within days of each other. I used to be a surgical nurse, I know a little bit, these folks were murdered.

Today, we have two very close family friends, both are double jabbed, both are suddenly having weight loss issues and now vascular issues. Neither of these women have any history of this in their families. They were both jabbed around the same time frame, not at the same place, just time frame. Just told one of the daughters is now sick with covid, she is triple jabbed. I do not believe it to be covid, I think her immune system has been trashed, call it HIV/AIDS.

With what I am hearing, I have three funerals in my future.

I have been in trucking and the oil and gas industry since leaving nursing, I know a lot of folks.

In times of hardship, will you be one to show remorse to those who wished for your death?

In a word, "NO." That they wished harm or death on me, I don't care about. That they're STILL trying to harm or kill my kids, is unforgiveable. No mercy will be given to such people, let them rot where they fall.

And you'll be a lesson to my kids, what happens to such people.
