

# It's Obvious Now: America's Voting System Is Rigged

The machines went down! The tabulators failed! The paper ran out! The printer settings were wrong!

Welcome to the Banana Republic of Biden — where the voting machines break down and the tabulators fail and the paper runs out on Election Day!

The rigging was so bad, so obvious, so corrupt that even the corporate media was forced to admit that electronic voting machines didn't work *across America*. That was a “conspiracy theory” — you might recall — just the day before.

But — lo and behold! — the machines were all “down” [in Mercer County, New Jersey](#). They were full of “mishaps” [in Harris County, Texas](#) and [in Chesterfield County, Virginia](#) and in Bell County, Texas and [in Suffolk County, New York](#). At least 20% of all the machines were “not working” [throughout Maricopa County, Arizona](#). They “ran out of paper” [in Luzerne County, Pennsylvania](#). In fact, “officials say that roughly 44 polling locations in Luzerne County ran out of paper to print ballots.”

Of course, it's completely normal on Election Day *for 44 polling places to run out of paper simultaneously*. Don't start fueling conspiracy theories by noticing that such a shortage must be deliberate!

It was *always the case* that the Washington uniparty was going to rig the elections against Trump-aligned candidates. The Swamp was not interested in victories for candidates like Blake Masters and Kari Lake in Arizona, Herschel Walker in Georgia, Dr. Oz and Doug Mastriano in Pennsylvania — and it was not interested in the continued careers of “troublemakers” like Lauren Boebert and Ron Johnson. Notice that *almost all of those races* are currently “too close to call” this morning — or called for the Democrat *long before* the votes could be counted.

Democrats needed to disrupt the Republican vote in Arizona to stop Masters and Lake — and *what a coincidence!* — the machines go down in the red precincts of Maricopa County and keep working elsewhere!

Democrats needed to disrupt the Republican vote to stop Lee Zeldin in New York — and *what a coincidence!* — the machines go down in Suffolk County!

That's Lee Zeldin's *hometown*.

Do you notice any strange curves? Any sudden surges?

Here's the real-time vote dumping in the Illinois Senate race between Tammy Duckworth (D) and Kathy Salvi (R).

The [race was called for Duckworth](#) two minutes after the polls closed.

The screenshot shows a website for Emerald Robinson. At the top center is a profile picture of a woman with blonde hair and a headband, with the name "EMERALDROBINSON" below it. Below the picture is the title "Emerald Robinson's The Right Way" and a subtitle: "The latest political gossip from inside the White House and Washington DC from an independent journalist." Below this is a text input field with the placeholder "Type your email...". Underneath the input field is a "Subscribe" button. Further down is a link that says "Let me read it first" with a right-pointing arrow. At the bottom of the main content area is a link that says "Already a subscriber? Sign in". On the right side of the page, there is a large line graph with a yellow background and a white border. The graph has a blue line and a red line. The blue line starts at a high point, drops sharply, and then levels off. The red line starts at a lower point and rises slightly. The graph is titled "analytical graphs from Cost" and has a "View" button. Below the graph are logos for "ow.com", "bidtv", and a Facebook logo.

Here's the real-time vote dumping in the Michigan Attorney General race between Dana Nessel (D) and Matthew DePerno (R).
