Top Sydney cardiologist, Dr. Ross Walker, has called for a ban on mRNA vaccines after seeing a rise in jab-related heart conditions, Daily Mail reported.

Australia is famous for its totalitarian COVID restrictions and vaccine mandates. The Deputy Premier of NSW **boldly declared** that even businesses that accept unvaccinated people would be subject to exceptionally heavy fines back in 2021.

Australia's Northern Territory imposed an authoritarian lockdown on citizens who have not been 'fully vaccinated' against Covid-19 as officials scrambled to deal with the highly-mild Omicron variant back in January. Any individual 16 or older and who was not fully vaccinated will not be able to leave their homes until the middle of next week, even if it's to go to work or to get exercise outdoors.

Dr. Walker made this admission after 18-year-old Monica Eskandar suffered terrifying chest pains hours after receiving her first Covid shots last year.

Doctors later diagnosed her with pericarditis, a condition linked with mRNA Covid vaccines.

“Getting Covid is ten times worse than getting vaccinated – but we don’t need to use mRNA vaccines like Pfizer and Moderna,” cardiologist Dr. Ross Walker told Daily Mail Australia.

“We have to put COVID in perspective where it is right now, not where it was 12 months ago, because it has changed and I think we are seeing a change,” he added.

“We have alternatives like AstraZeneca and Novavax which are just as good,” he said. “I’ve seen many people getting vaccine reactions, who get symptoms for about three to six months afterwards.”

“I’ve seen 60-70 patients in my own practice over the past 12 months who have had similar reactions... I’ve seen other people with chest pain, shortness of breath, heart palpitations,” he continued.

The Gateway Pundit previously **reported** that the country is confronting an epidemic of Sudden Adult Death Syndrome. The syndrome is striking down healthy and active young people in Australia.

It is recommended that people under the age of 40 get a heart check since they may be at a higher risk of developing Sudden Adult Death Syndrome.

TGP **reported** that the Australian government is now paying for your funeral if the COVID vaccine kills you.

The **Services Australia website** now has instructions and forms for family members to fill out if the forced experimental COVID vaccines kill someone in their family.

Deceased COVID-19 vaccine recipient payments and funeral costs

In cases involving death you may be eligible for payment and support for funeral costs. We'll make this payment to the deceased's estate.

on this page

[What proof you need](#)

[How to calculate payments and funeral costs](#)

What proof you need

Before you can claim, you need to get your doctor to complete a **COVID-19 vaccine claims scheme medical report**. You need this as proof when you submit the claim. We need your doctor's responses to help us assess your claim.

You need to provide the following documents with your claim:

- the deceased's death certificate or medical cause of death certificate
- proof that you're acting on behalf of the deceased
- proof of any funeral costs and who paid, like receipts

- proof of any amounts you got or will get from third parties, like funeral insurance
- proof of the deceased's partner and children dependent on the earnings of the deceased at the time of death, if applicable.

How to calculate payments and funeral costs

You need to show your actual costs for the funeral. Remember to deduct any amounts you got or will get from third parties.

If your claim involves death, find out what you can claim in the [COVID-19 vaccine claims scheme policy](#) on the Department of Health and Aged Care website.
