The family of a young woman from Broken Arrow, Oklahoma has revealed that their 18-year-old healthy daughter died unexpectedly on November 9 from an unknown cause.

Trista Deane Martin, a 2022 graduate of Broken Arrow High School, died suddenly months after receiving the Pfizer shot.

x

“I woke up this morning & for that split second before I was totally awake, I thought it was all just a horrible dream... then reality came crashing down around me, drowning me, crushing me, you are gone,” Trista’s mother, Taylor Martin, **wrote** on her Facebook account. “Why??? None of this makes any sense. I’m lost. I’m broken.”

Taylor was devastated by the loss of her daughter and couldn’t understand what had happened.

“Our sweet, funny, fierce, caring, kind, strong, there are not enough words, daughter is gone. In the blink of an eye, gone. Trista Deanè Martin passed away yesterday evening & we have no answers. No why. Just gone. She was only 18. She was just starting her adult life. This isn’t fair. This isn’t right. Your children are not supposed to go before you,” she continued.

“She actually had already had COVID twice & the media made her think she still needed the shot,” she **wrote**.

“I blame the media for scaring our children into believing the BS!” Taylor **added**.

“This has to be stopped! They need to be held accountable!” she continued.

Trista allegedly had the Pfizer shot in July and didn't tell her family about it.

“On November 9, my healthy, vibrant [18-year-old] beautiful daughter Trista [died suddenly]. We don't know why. She just died. It will take months for the M.E. report, they said. I learned from her friends that she got the Pfizer shot back in July and told her friends not to tell me,” Trista's father, Allen Martin, **wrote** on his social media.

According to Allen, her daughter has natural antibodies because she had Covid twice prior to receiving the shot.

“She got a check-up in July. They found nothing out of the ordinary. I am not anti-vax. I'm anti-Covid vax. We all already had covid and have natural antibodies. There was no legitimate reason for her to get this shot behind my back,” Allen wrote.

Allen stated that her daughter suffered heart swelling and organ failure.

x

“She had no history of diabetes, yet had a blood glucose level of over 600, and her heart was swollen as I watched her die. YOU are shameful,” Allen **responded** to a troll on Twitter.

“I have no doubt that Pfizer and the relentless “it’s safe” message from the media killed my daughter. We HAVE to stop this,” Allen said in the email.

18 y/o Trisha Martin [#DiedSuddenlv](#) after receiving the Pfizer 

Her parents didn't know & had warned of the mRNA dangers- but the media convinced her otherwise.

She said she “felt like she was dying”laid down, & never woke up.

She suffered organ failure and a swollen heart.
