

Is The Federal Government Rigging Maricopa County?

FBI agents openly run Arizona's elections. The voting machines fail and no elected official bothers to investigate. Welcome to the final stages of America's constitutional republic.

The testimony of poll workers in Maricopa County regarding the stolen midterm elections is an important historical record for future generations of Americans.

For example: were America's voting machines connected to the Internet?

Poll Worker explains how his ENTIRE polling location was inoperable when they opened on Election Day.

This is getting very, very bad for Maricopa County. Very bad. Like, unbelievably bad.

The printers didn't print! The tabulators didn't tabulate! The machines wouldn't process the ballots!

How do you have a legal election if all the election equipment stops working on Election Day?

People who know computer systems — like Joe Oltmann — testified that 40% of the voting machines in Maricopa County were inoperable on Election Day.

Obviously, this is a lot of eyewitness testimony to the complete failure of voting machines in Arizona.

Maricopa County officials certified its election results anyway, and the FBI agent who suddenly became Arizona’s “Director of Elections” in 2021 — [her name is Kori Lorick](#) — had no problem with it either.

Why are FBI agents being hired to supervise state elections? Well, my theory is that FBI agents are being installed as state elections supervisors to “supervise” certain elections when voting machines have to malfunction *only in GOP-dominated polling sites*.

Do our states actually run our elections — per our Constitution? *Don't be ridiculous.* Everywhere you look, you can see [federal authorities openly taking over](#) (“supervising” or “monitoring” are their preferred terms for open interference) elections illegally. The

Biden regime's DOJ has no legal authority to "monitor" state elections — but they're doing it anyway.

Just look at Cochise County — which declined to certify its midterm election results.

The screenshot shows a social media post from the Republican Party of Arizona (@AZGOP). The post features a profile picture of a woman with blonde hair and a white headband, with the name 'EMERALD ROBINSON' written below it. The main text of the post reads: 'Emerald Robinson's The Right Way' followed by 'The latest political gossip from inside the White House and Washington DC from an independent journalist.' Do you see this highly coordinated activity?

FBI agents are running our state elections, and the DOJ is illegally monitoring those elections too. The Democrat lawsuits are already *ready to be filed* against county officials who question those results, and the media articles publicizing those Democrat lawsuits are *ready to be printed too*.

Do you see how they're rigging our elections yet?

This is just the tip of the problem, and it will be far worse come the 2024 elections. You people just don't get it...the scum sucking liberals OWN you, they own the positions of power, they own the polling places, they own the machines, they own the judges and still you pathetic morons allow this stuff to happen. Take a SMART PILL and SECEDE. The deep-state is far to deep for any one person President or otherwise to change. The left has been
