Was Obama the architect of the illegal government and Big Tech censoring machine?

With the release of the Twitter files by Elon Musk, we learned that the FBI was working with Twitter in censoring and blacklisting content on the social media platform. From information being gathered in the case between Missouri and Louisiana and the US government, where The

Gateway Pundit is the lead plaintiff, we have also learned that this was taking place with other government departments and other Big Tech companies.

Evidence Shows that It's Not Just Twitter and the FBI, the State Department, CISA, Facebook. YouTube and Google Are Also Working to Censure and Ban the Information You Receive

There is a hole in the dike. There is more on the most shocking First Amendment crimes perpetrated by our government since the country's beginnings. Elon Musk at Twitter released information that revealed the FBI was working with Twitter to censor, shadow ban, and suspend tweets and accounts from conservatives and others. Twitter targeted accounts ... Continue reading

How did this ever get started? It looks like Obama may have been behind this.

Jason Goodman at [Crowdsourcethetruth.com](https://www.crowdsourcethetruth.com) reminds us that Barack Obama signed an Executive Order in 2015 that ties all of this together.

In 2015, long after Ayers and Dohrn helped the obscure Illinois State Senator rise to international prominence, President Obama held a technology summit at Stanford University. After delivering remarks on the future of technology and industry, Obama signed Executive Order 13691 Promoting Private Sector Cybersecurity Information Sharing. In it, the President commanded that, “private companies, nonprofit organizations, executive departments and agencies (agencies), and other entities must be able to share information related to cybersecurity risks and incidents and collaborate to respond in as close to real time as possible.” Stanford students in attendance were probably unaware, but this order codified long standing FBI demands to supersede the fourth amendment and investigate anyone they wanted. This paved the way for the Neo-fascism now being exposed in the ongoing releases of the “Twitter Files”.

Making good on his campaign promise, Obama ensured that America would be fundamentally transformed from a Constitutional Republic into a Neo-fascist Technocratic Autocracy. This new authority would be enforced by a digitally enabled Super-Stasi made up of FBI InfraGard members, (<https://www.infragard.org/>) and other contractors including hundreds, perhaps even thousands of ordinary citizens patrolling on-line as America’s Secret Police.

Such an Orwellian overthrow would be calculated to happen without anyone noticing until it was too late. The merger of government and corporate technological power enabled a class of politically aligned bureaucratic elites to maintain control by monitoring and stifling opposition rather than allowing open debate in a free marketplace of ideas. These traitors have trampled the Constitution and destroyed the most fundamental aspect of American greatness.

EO 13691 states the following [emphasis added]:

Section 1. Policy. In order to address cyber threats to public health and safety, national security, and economic security of the United States, **private companies, nonprofit organizations, executive departments and agencies (agencies), and other entities must be able to share information** related to cybersecurity risks and incidents and collaborate to respond in as close to real time as possible.

Organizations engaged in the sharing of information related to cybersecurity risks and incidents play an invaluable role in the collective cybersecurity of the United States. The purpose of this order is to encourage the voluntary formation of such organizations, to establish mechanisms to continually improve the capabilities and functions of these organizations, and **to better allow these organizations to partner with the Federal Government** on a voluntary basis.

Such information sharing must be conducted in a manner that protects the privacy and civil liberties of individuals, that preserves business confidentiality, that safeguards the information being shared, and that protects the ability of the Government to detect, investigate, prevent, and respond to cyber threats to the public health and safety, national security, and economic security of the United States.

One section of this EO states that agencies are required to share assessments of their agency's activities and provide those assessments to the DHS. It may be helpful to get ahold of these assessments.

(b) Senior privacy and civil liberties officials for agencies engaged in activities under this order shall conduct assessments of their agency's activities and provide those assessments to the Department of Homeland Security (DHS) Chief Privacy Officer and the DHS Office for Civil Rights and Civil Liberties for consideration and inclusion in the Privacy and Civil Liberties Assessment report required under Executive Order 13636.

Obama wanted to change America. He created a framework to punish and destroy the America he knows and dislikes.
