Tierney's Real News

Dec 12

Shortly after 9/11, Vice President Dick Cheney instructed the National Security State to view all Americans as potential threats.

The Department of Homeland Security (DHS) and the Office of the Director of National Intelligence (ODNI) were created specifically for this purpose. The Department of Homeland Security (DHS) came along in 2002, and within the Intelligence Reform and Terrorism Prevention Act of 2004 the Office of the Director of National Intelligence (ODNI) was formed.

The DHS, ODNI, DOJ and FBI became the four pillars of a NEW institution. Atop these pillars is where you will find the **Fourth Branch of Government - the Intelligence Branch.**

After September 11, 2001, the US electronic surveillance system - that was originally created to monitor threats from abroad - was retooled to monitor threats inside our own country. That is when all of our electronic 'metadata' came under federal surveillance. That's exactly what Edward Snowden tried to point out.

new institution - which is

the **FOURTH BRANCH OF GOVERNMENT - THE INTELLIGENCE BRANCH**. Presidents Dwight D. Eisenhower (military) to John F. Kennedy (CIA) to Richard Nixon (FBI) all warned against this happening. The 4th Branch controls our Government and influences every facet of our life. *We The People* are under surveillance. *We The People* are the target. This is what Trump means when he says “They aren’t after me - they are after you. I’m only standing in the way.”

The ODNI was created and originally intended for the CIA, NSA, DoD, DoS, and DIA to deposit their unique intelligence in ONE PLACE - so that agencies like the DOJ and FBI could access threats when needed to analyze threats to the U.S. This, they hoped, would ensure the obvious flags missed in the 9/11 attacks would not be missed again. However, it is now used by the Intelligence Branch to target Trump and American citizens and hide information from one agency to another.

The Intelligence Branch is an independent functioning branch of government, it is no longer a subsidiary set of agencies within the Executive Branch as most would think. The Intelligence Branch functions much like the State Department, through a unique set of public-private partnerships that support it. They use corporations to do their dirty work - like those in Silicon Valley. The Intelligence Branch holds power over the ODNI through their influence and partnership with the body that authorizes the power within it, the Senate Select Committee on Intelligence (SSCI).

Hillary Clinton, and her operatives in the Obama State Department, began working on their first steps to use Big Tech to spy on and control us all. The Obama administration used the “Arab Spring” as a beta test. The Obama administration recruited Facebook and Twitter to support rebellions in the Middle East that the White House and DoS supported and to hide those they didn’t. This was the modern merge between the U.S. intelligence community and Big Tech social media.

In many ways, this coordinated effort was a test run for how they rigged the 2020 U.S. presidential election. The U.S. intelligence community worked with social media platforms and political operatives.

Many people say that Congress is the solution to eliminating the Fourth and superseding Branch of Government, the Intelligence Branch. This is an exercise in futility because the Legislative Branch, specifically the SSCI, facilitated the creation of the Intelligence Branch.

The **United States Senate Select Committee on Intelligence** (sometimes referred to as the **Intelligence Committee** or **SSCI**) is dedicated to overseeing the **United States Intelligence Community**—the agencies and bureaus of the **federal government of the**

All of President Obama's 2009 intelligence appointments required confirmation from the Senate. The nominees had to first pass through the Democrat controlled SSCI, and then to a full Senate vote where Democrats held a 60-vote majority. Essentially, Obama got everyone he wanted in place easily. Rahm Emmanuel was Obama's Chief of Staff, and Valerie Jarrett was Senior Advisor.

Over the past 10 years, all these Senators have been on the SSCI. Now do you see why they act the way they do? They protect each other AND those in the SSCI Committee.

Feinstein's staffer, Dan Jones, left the SSCI so he could act as a liaison and political operative between private-sector efforts (Fusion GPS, Chris Steele) and the SSCI.

The SSCI was a participant in the Fusion GPS/Chris Steele fake Dossier operation, and as a direct consequence Republicans were inherently tied to the problem with President Trump taking office in January of 2017. They didn't expect him to win. They thought their efforts would be covered up.

Bottom line: When it came to the intelligence system targeting Donald Trump during the 2015/2016 primary, the GOP was just as much at risk of being exposed as their Democrat counterparts.

branch, so the Intelligence

**The Intelligence Branch carefully selects its own members by controlling how security clearances are investigated and allowed through the FBI.** The Intelligence Branch also uses compartmentalization of intelligence as a way to keep each agency, and each downstream branch of government (executive, legislative and judicial), at arm's length as a method to stop anyone from seeing the larger picture of their activity. I call this the "*silo effect*" and it is done by design.

Any appointee to the intelligence community must first pass through the SSCI, before they get a full Senate vote. If the SSCI rejects the candidate, they simply refuse to take up the nomination. The president is then blocked from that appointment. This is what happened with President Trump over and over again.

Additionally, the Intelligence Branch protects itself, and its allies through the formal classification process.

The Intelligence Branch gets to decide unilaterally what information will be released and what information will be kept secret. There is no entity outside the Intelligence Branch, and yes that includes the President of the United States, who can supersede the classification authority of the Intelligence Branch. This is something 99.9% of the people on our side get totally and frustratingly wrong.

This also explains why Joe Biden has instructed Attorney General Merrick Garland to use the full power of the DOJ to stop state level election reform efforts. The worry of successful state level election control is also why the Intelligence Branch now needs to support the federal takeover of elections.

When the Intelligence Branch within government wants to conduct surveillance and monitor American citizens, they run up against problems due to the Constitution of the United States. They get around those legal limitations by sub-contracting the intelligence gathering, the actual data mining, and allowing outside parties (contractors) to have access to the central database.

The biggest names in Big Tech have a partnership with the Five Eyes intelligence network, ultimately controlled by the NSA, to: (1) monitor all activity in their platforms; (2) identify extremist content; (3) look for expressions of Domestic Violent Extremism (DVE); and then, (4) put the content details into a database where the Five Eyes intelligence agencies (U.K., U.S., Australia, Canada, New Zealand) can access it.

Our elections have been usurped by the Intelligence Branch. Both Democrat AND Republican corruption is dependent on manipulated election results. Start at the state level. Start there.... everything else is downstream.

This is what what We the People are up against in DC. Preserving this system is also what removing Donald Trump is all about. The targeting of President Trump in order to preserve the system, the system that was created by Bush-Cheney and weaponized during the Obama administration - this is what the actions of the DOJ and FBI are all about.

What would powerful people in DC do to stop the American people from finding this out?

**Would they use every lever they have to destroy Trump's reputation, would they impeach a President twice for no reason, frame him for an insurrection and drive him from office, raid his home or arrest him? Yes, they would.**

about the removal of President Trump from the White House - by the intelligence  
community. This is no different than the removal of Presidents Kennedy & Nixon.

Finally - I've heard many people say that Trump's biggest problem is he doesn't know how to hire personnel that won't turn against him. Do you see the problem now? ALL of DC is corrupt. And those that aren't corrupt - are easily paid off and corrupted.

Here's one recent example of just how disloyal they really are.

As you know, Ronna McDaniel is the RNC chair and everybody wants her to go. Me included. Lee Zeldin thought about running against her but backed out. I like Lee.

So, the two that are left running against Ronna are Harmeet Dhillon, a lawyer, and Mike Lindell. Harmeet is partnering with a guy named Henry Barbour who allegedly took down the Tea Party and wants to take down MAGA.

Lindell is MAGA. I think Mike would be the best choice for the party.

Anyway, the other day I was listening to a podcast by Jenna Ellis, who used to be one of President Trump's election lawyers.
