Project Veritas is back with a vengeance. Elon reinstated their deleted Twitter account and they've been taking aim at Big Pharma with redoubled vigor.

But targeting Pfizer is nothing new for Project Veritas. You'll recall back in 2021, they jumped head-fist into the “vax mandate” debate by publishing a 10-minute video showing Pfizer scientists touting the benefits of natural immunity.

[Washington Times:](#)

“When somebody is naturally immune, like, they got COVID, they probably have better – not better, but more antibodies against the virus,” says Mr. Karl in the hidden-camera footage. “Because what the vaccine is, like I said, that protein that's just on the outside, so it's one antibody against one specific part of the virus.”

He went on: “When you actually get the virus, you're going to start producing antibodies against multiple pieces of virus, and not only just like that outside portion, like, the inside portion, the actual virus.”

Well, Project Veritas is back at it again, and this time they captured a Pfizer bombshell on hidden camera.

A scientist by the name of Chris Croce admits on hidden camera that there's a link between the vaccine and myocarditis... and they all know it.

Watch:

Ryan Cunningham

 **BREAKING:** Pfizer scientist Chris Croce was aware that their experimental mRNA "vaccine" was the likely cause for the myocarditis.

Here's what people are saying:

“Not surprising... anytime they spend billions in advertising to push a product that most folks are skeptical about...

You can almost be certain, it's about money!”

“Everyone needs to see this.”

“Another win for Project Veritas. Imagine how far away we would be from truth if we still relied on corporate shells such the NY Times, The Washington Post, CNN, MSNBC and the rest of the bottom feeders.”

“Being aware means intention which is murder.”

“Oh so they didn't think it might, they knew it would. Yes they said the smallpox vaccine did this to the degree in which they could release it. So now we know that they test these vaccines for this, then pretend they didn't know when talking to the media.”

Will Big Pharma (and Fauci etc.) get away with this or will these ghouls face the justice they deserve?

Time will tell, but one thing is for certain – the new GOP House has a lot of work ahead of them. And the “Trey Gowdy-style” hearings of the past – that amounted to nothing – won’t cut it anymore.

The vaxx is killing people...oh no!  
Ya don't say..?.  
Suckers..  
We knew this and now it's true?  
Shocking!  
A little longer and all the lies will become truths.  
And hopefully the guilty will burn at the stake...

Of course they all knew, and they all need to pay a price because a lot of people's health situation is now a ticking timebomb. The more evil. I just read the latest over at Reality Shed, "AT 'muh The Science' Posts YUGE Win, It Only Took Less Than 10 Years To Determine That Gas Stoves Are Hazard", so be sure to check that out yourself. With leftwingers you've got to watch your wallet and look out for vaxx shots.

They won't listen, no matter what you say or do. It's better to try and warn them but ultimately, it's wasted time. If they're not listening, they're basically doomed. I'm sorry for the ones that try and ruin my life, get me fired, imprisoned, etc, but I'm not the ones that did? F them. Not very charitable towards them and I don't really care what happens to them at this point. Maybe it's nicer to let them just live in their fantasy world, where they're virtuous and righteous for taking this 100% effective, miracle drug. I mean, what really can be done for them at this point other than to scare them?

The information was always there. You had to dig for it a little, but people clung to their comforts rather than fighting employers and government officials who pushed this con-job on them. When my wife, who "was" a nurse walked out of her job, all her co-workers simply sat back and watched.

My husband was almost fired over refusal of the shot. Yesterday his coworkers told him he was smart to not get it. Funny how that is, he was a crazy conspiracy theorist a year ago, but now they've changed their tune.

Lizards? nah. cbdc or. whatever. we can defeat them. one must just take the time to talk to people around oneself and more if one can. basically ask honest questions about their stances and see what they say. many will come around and realise they were bamboozled.

HOPEFULLY indeed. I'm NOT holding my breath however. I'd bet my entire annual salary that palms were greased in light of that.

That is the key. Women on the left either look like Rachael Maddow or Joy Behar. Others look like Dick Levigne.
