

# Big pharma rakes in 100 billion dollars in 2022 – that’s \$100,000,000,000 – by selling toxic “vaccines” during a humanitarian crisis. Add another 131 billion dollars in profits from 2021

H/t Dr John Campbell from his YouTube video here at the [17 minute mark](#).

Reuters ran an article below that shows big pharma made profits of the odd \$100 billion in 2022.

[Drug companies face COVID cliff in 2023 as sales set to plummet | Reuters](#)

Pfizer made a profit of 37.8 billion dollars in 2022. Moderna made 18.4 billion dollars.

Here’s a full list of 2022 profits:

| Company                        | 2022 revenues | Source             |
|--------------------------------|---------------|--------------------|
| Pfizer (vaccine with BioNTech) | \$37.81 bln   | Company            |
| Pfizer antiviral treatment     | \$18.93 bln   | Company            |
| Moderna vaccine                | \$18.40 bln   | Company            |
| Merck antiviral treatment      | \$5.68 bln    | Company            |
| BioNTech (vaccine with Pfizer) | \$4.06 bln*   | Company            |
| Gilead antiviral treatment     | \$3.91 bln    | Company            |
| GSK antibody treatment         | \$2.8 bln     | Company            |
| Johnson & Johnson vaccine      | \$2.18 bln    | Company            |
| Lilly antibody treatments      | \$2.02 bln    | Company            |
| AstraZeneca vaccine            | \$1.94 bln    | Refinitiv estimate |
| AstraZeneca treatment          | \$1.78 bln    | Refinitiv estimate |
| Regeneron antibody treatment   | \$1.77 bln    | Company            |
| Novavax vaccine                | \$1.59 bln    | Refinitiv estimate |

Check out the lamenting tone to the Reuters article – it is sympathizing with a steep decline in profits for 2023 because of falling demand for injections that kill and maim.

Now keep in mind that Pfizer and Moderna are likely to raise the price of their bivalent C19 mRNA injections to between 80 and 120 bucks a dose – 4-6 times more than the average price of an l or the latest bivalents.

here:

argest pharma companies by  
4.8 billion in revenue and \$130.6

ested solely in diverting tax dollars  
ed health regulators DURING A  
IS, right?

Pfizer and Moderna et al, did not act from any sense of compassion or “noble purpose”. They acted to make money out of prevailing fear with a product that makes “snake oil” look like it actually is safe and effective.

Oh, and in case you are wondering how much tax was clawed back out of the 100 of billions of dollars tax-payers paid to big pharma to NOT save tax-payers lives, but actually kill or maim tax payers during the humanitarian crisis, check this out.

From here: [Pfizer Income Taxes 2010-2022](#) | [PFE](#) | [MacroTrends](#)

- Pfizer annual income taxes for 2022 were \$3.328B
- Pfizer annual income taxes for 2021 were \$1.852B
- Pfizer annual income taxes for 2020 were \$0.37B

Pfizer reported revenues of \$37.8 billion for calendar year 2022. Keep in mind those revenues are after employing all those “woke” morons in a bloated bureaucratic “marzipan layer” and who were caught on Project Veritas videos or testifying before the European Parliament – 7 figure “salary+bonus” employees.

They are housed in plush offices all round the world and enjoy massive expense accounts, first class travel and 5 star hotels and such. Of course, CEO Bourla reduced profits by a huge margin with his 50 million buck package [for 2021 and 2022](#).

Remember Pfizer is a “project co-ordinator.” – just like Martin [Shkreli](#) and Elizabeth [Holmes](#). It “manages” supply chains. It has around 1,500 scientists of its own, but the vast number of people employed to produce Pfizer branded drugs work for other companies and not Pfizer.

So, Pfizer ramps up expenses by a huge margin and then minimizes its tax bill at the parent level in order to pay less than 9% in tax.

Moderna? [Moderna Income Taxes 2017-2022](#) | [MRNA](#) | [MacroTrends](#)

Well, during its short life as a going concern until funded by Fauci and the DoD, we have this

Moderna income taxes for the twelve months ending September 30, 2022 were \$1.565B

- Moderna annual income taxes for 2021 were \$1.083B
- Moderna annual income taxes for 2020 were \$0.003B
- Moderna annual income taxes for 2019 were \$-0.001B

1.5 billion in taxes on 18.4 billion of profits. Wow! 8%. They need to employ some of Pfizer's tax advisors, right?

There you have it. Tax payers pay almost a quarter of a trillion bucks to big pharma – including a huge chunk for toxic C19 mRNA injections that were supposed to help prevent a humanitarian crisis. Instead, they have created a humanitarian crisis, made out like bandits and paid 8-9% in tax. These mongrels now intend to increase prices 4-5 times.

Onwards!

I drink a lot of coffee – if you like my “stuff” but don't want to pay for a subscription you can buy me a cup to show (any!) appreciation here: <https://ko-fi.com/peterhalligan> You could of course be one of the first Founder Members!

Beware of shorting Big Pharma. Remember, they have been paying off politicians for decades. At the end of the day, these pols will give their paymasters a pass and exempt them from prosecution.
