## The TGA's Actions Are Truly Inexcusable

Original Content

By Chris Martenson on February 21, 2023

Australia's equivalent of the FDA, the TGA, has been caught (1) having assigned causation to two childhood covid vaccine deaths and then (2) hiding those from the public. One was a 7-year-old boy, the other a 9-year-old girl.

The TGA's excuse? They "didn't want to undermine public confidence."

Instead, they opted to strongly encourage parents to get their children vaccinated and boosted as soon as they possibly could.

From my vantage point, they are all monsters, especially John Skerritt the head of the TGA. They had the data, and they decided somehow that exposing more children to the risk of death was “worth it” for some reason.

Can the TGA point to any particular harm children face due to Covid, especially Omicron? No, they really cannot.

The one ray of light in this truly horrifying tale is that the public is finally waking up in Australia. Questions are being asked. Politicians are getting testy. Still too few, but the momentum has changed.

## 23 Year Old AUS Died Suddenly From Vaccine

Tragic case, and a horrible doctor!

A young woman with an unknown neurological condition died in her sleep after receiving two doses of a Covid vaccine, an inquiry into long Covid was told.

On Friday, the standing Committee on Health, Aged Care and Sport heard from Australians who have felt neglected or dismissed after they sought help for long Covid

or the ill effects of the Covid vaccines.

The inquiry was told Amy Segdwick died “suddenly and unexpectedly” in her sleep in April last year after she experienced negative side effects from the Pfizer vaccine.

Her parents Sophie and Bruce explained their daughter was prioritised for the vaccine when Covid struck, after she became afflicted with an unknown neurological condition in 2019.

**The 23-year-old sought advice on the best vaccine for her condition and was told with minimal discussion that she should select Pfizer, the inquiry heard.**

**The decision set off a “catastrophic” chain of events, her mother said.**

**“She fell off a cliff after receiving her Pfizer vaccines,” Mrs Segdwick told the inquiry.**

Amy noticed she had numbness in her feet and became unbalanced over the month in between vaccinations.

After the second jab, the numbness spread up her legs and her limbs ached. Mrs Sedgwick said Amy had trouble standing and walking when they made an urgent doctor’s appointment.

The doctor said Amy’s worsening health could not be attributed to the vaccine.

“When we questioned the conclusion, we were firmly told we needed to let the vaccine theory go,” Mrs Sedgwick said.

“We were sick with worry.”

## Pfizer’s Long History Of Fraud & More

<https://www.armstrongeconomics.com/international-news/rule-of-law/pfizers-long-history-of-fraud-more/>

Excerpt: “In 1992, Pfizer agreed to pay between \$165 million and \$215 million. The list is endless. In 2004, [Pfizer agreed to plead guilty to two felonies](#) and paid \$430 million. In 1996, [Pfizer administered an experimental drug during a clinical trial on 200 children in Nigeria](#) but never told the parents that their children were the subjects of an experiment. Who cares about Nigeria?”

Pfizer knew all too well. Once they paid enough to get government-mandated vaccines, they could kill 50% of the population for the government will NEVER admit their guilt so any deaths must be misinformation of perhaps carried to earth by aliens floating around in balloons. My children were vaccinated. I use to get a flu shot. But once the government got involved, after dealing with them for 40+ years, I know the game. They will NEVER admit a mistake so that was the ultimate guarantee that Pfizer did not need to bother testing anything. The fix was in."

## Thanks For Showing This Chris. And Being So Clear About What's Going On.

And here is Senator Rennick asking our Australian Federal Police What they are going to do about it. <https://youtu.be/9WqUpbz9f78> . Nothing of course. And no one in these scenes seems to care less that children have died, let alone the fact of this has been covered up and more will die because of this criminal activity by our TGA and lying governments and pathetic AFP.

It's devastating to watch these hearings.

A bit of background. The Australian Federal Police (AFP) have jurisdiction over the ACT (Australian Capital Territory). They are the state police in the ACT.

The depth of indoctrination of most Australians, especially the ones that got to positions of power is extraordinary. If, progressively, they are told, on 6 o'clock news that the oceans are red, a majority would believe.

We have had some of the (best?) indoctrinators in the world work on us, I wonder why ?

Perhaps we have good minds on the other side ?

## The US Is Just As Criminally Insane As Australia

Blue Cross Blue Shield pays pediatricians a \$40,000 bonus for fully vaccinating 100 patients under the age of 2.

BUT pediatricians lose the whole bonus unless at least 63% of patients are fully vaccinated, and that includes the flu vaccine.

There is another detail to the payment system. If you give a pediatric patient a vaccine that causes an adverse event and notate that event in the patient's chart – even though the patient is “up to date” on the vaccines, the insurance won't pay on that patient.

So \$400 per patient ? How much do these vaccines cost? I know the they charged the government like what \$30 per dose of Covid? and that was an expensive jab... Who pays Blue cross to do this and why? Pharma ? Gov? this is not adding up \$ wise? where is the profit?... Is the argument the government wants a vaccinated population to save us and thats why they pay more than the vaxes cost or is the drive to lose money rooted in something much more nefarious?

Moderna is supposedly increasing the dosage price to \$400. Pfizer made roughly \$75 billion last year. It's a racket run by the Crime Syndicate known as the United States government.

This has been going on for many years already. Dr. Sears (pediatrician) in California reported on this and I saw on Facebook where an Anthem insider shared a link (that used to be public but was quickly shut down) showing that probably 5 years ago or more (time flies) Anthem was giving a kickback of \$10,000 per doctor per office if they had over 90% compliance on all childhood vaccines. That's when our pediatrician told us that we were no longer welcome there, gave us a copy of my kid's records, and that was that.

I don't remember how to find it, but there used to be a link on the CDC website that showed the FULL ADULT vaccine plan the CDC had and it included a full round of quite a variety of vaccines that they were pushing to try to get adults to comply with – much more than just the annual flu vaccine. They started with the kids assuming that as they grew up they would comply as adults. . . typical propaganda move if you have read anything about it in Germany back before WW1 and WW2.

I'm surprised Anthem has lowered their percentage of fully vaccinated and increased their bonus. That seems counter intuitive based on what they were doing over the past decade.

## Govt Tracking Unvaccinated. Everyone Should Read This Article

Hiding children's deaths is not the only thing governments are hiding. In an article on Children's Health Defense.org – read an article on how government is tracking the

unvaccinated and how there are new codes now being put in place at your local doctors office, which include a new billing code for vaccine counseling if a person refused the jab. **Story at a glance:**

- The U.S. government has secretly been tracking those who didn't get the COVID jab, or are only partially jabbed, through a previously unknown surveillance program designed by the U.S. National Center for Health Statistics, a division of the Centers for Disease Control and Prevention.
- The program was implemented on April 1, 2022, and adopted by most medical clinics and hospitals across the U.S. until January 2023.
- Under this program, doctors at clinics and hospitals have been instructed to ask patients about their vaccination status, which is then added to their electronic medical records as a diagnostic code, known as the International Classification of Diseases, Tenth Revision (ICD-10) code, so that they can be tracked inside and outside of the medical system.
- These new ICD-10 codes are part of the government's plan to implement medical tyranny using vaccine passports and digital IDs.
- They're also tracking noncompliance with all other recommended vaccines using new ICD-10 codes, and have implemented codes to describe WHY you didn't get a recommended vaccine. They've also added a billable ICD code for "vaccine safety counseling."

## No Informed Consent

Hiding the deaths of children so that parents would allow this gene therapy in their children means that parents were not informed of the risks and could not give informed consent.

If in Australia it is legal to give people a medical treatment without their consent, I hope the Aussies provide some treatments they deem efficacious to The Decision Maker and his/her minions.

Interesting will be to see how this plays out... since BR is not part of the European "other" story currently playing out... this is why I believe the puppet masters (who install and handle their governmental puppets) operate on a different kind of mentality and operating system...a feudal mentality. And this is why I believe "normal folk" like us just don't get it most of the time. because we're not thinking feudal. But as soon as you start thinking "feudal" then the fog lifts and everything suddenly becomes clear...

Maybe this is also why the ancient stories of the Gods, were always feudal in nature. It's nothing new, in fact, it's the oldest and most original OS in existence, as far as I can make out... So why should it have died out? I think feudal is alive and well and all around us.

## The Other Documents?

There were too many documents responsive to the original FOIA request, and they whittled the scope down to 11. What's in the others? If the 11 they chose to release were this bad, there are probably others which are worse.

It seems like multiple follow up requests, shifting scope each time, are in order. It also seems that the legislators should be demanding those documents in a single tranche.

## Garbalogic

Do we need a new word to describe the obfuscation being used to hide vax injury results?

I'll suggest "Garbalogic".

Somehow it seems to me the vax pushers had to have war-gamed for negative outcomes and the blowback that would follow.

I imagine they would choose wording as tame as possible, but they deserve to have that dialogue ripped from their control.

So Garbalogic is my suggestion.

But maybe some of you have a better one?

I guess I'll chime in to give you the feedback that I had the same issue when trying to watch about the same time as BR549 was. Clicked the link to watch directly on Odysee and still had the issue. I'm using Brave as my browser. Listened to the audio only option which played just fine. I just tried watching again and it's working better, but still freezing from time to time. As much as I want to like Odysee, my uneducated guess is that the problem lies with them. I thought they had fixed those issues but perhaps not quite.

Hello, I will add my own feedback as well. I watched the video just now. I have had multiple issues watching video's on Odysee (Not just Peak Prosperity's) or linked in through a website on my phone, using the Brave browser. It freezes up around every 3 minutes, reconnecting my VPN helps and will allow to resume the video. I have however not experienced a single issue watching this video on my laptop with the Brave browser. Personally I find it annoying when watching on my phone if a video platform does not allow for quick 10/15 seconds back and forwards which is why I disliked Rumble. I often listen to the video while doing other chores and when something important comes up that I need to see I like to quickly skip back a few seconds on my phone, however when I have to use the play navigation bar on a 45 minute video it often ends with me searching and skipping through several minutes of content. As David Huang says when my laptop is not available I tend to use

the audio only option as well, but works quite find, however I miss out on video content in those moments.

Thanks to you all at Peak Prosperity for all the hard work.
