Both clips are excellent from Senator Ralph Babet.

“The Australian people were initially told that mRNA injections would stop them getting infected with Covid, would stop them spreading it, and most importantly would stop them dying from it. We were told that we were selfish if we were not willing to be vaccinated and that we could kill grandma or kill grandpa. Around 97.5% of Australians over 16 followed the government advice and have had at least one dose of mRNA injection, yet the only data that accurately identifies the vaccination status of those who got Covid showed quite clearly that the vaccinated are more likely to be infected, hospitalized, and die of Covid.”

“The fact that Australia is now experiencing its highest mortality rate in over 80 years, must be a cause for concern and it must be a priority for everyone in this place. It should be front page news.”

Dr. Simon Goddek
@goddeketal · [Follow](#)

Senator Ralph Babet is sounding the alarm, but it seems like the Australian government just doesn't care! Excess deaths are skyrocketing in Australia, and it's not just affecting the elderly, it's affecting people of all ages. But instead of taking action, the government is...

Have you noticed all the vaccination advertisements have dissapeared all of a sudden, at least they have in Victoria. I wonder how many people will trust the flu vaccine, I wouldn't myself as you could very well get a Covid shot by stealth. Here is a message for the NSW leader, you had the chance to drop the mandates and you didn't, maybe if you did you would still be there. Maybe you could call up Scommo (Mr "as much as possible") for a coffee seeing you both have a lot more time on your hands!.

The COVID vaccines are planned to kill or hurt us so we can not procreant more people. This was unleashed on the Western Nations most and will cause most of the Western Nations to be wiped out. The WEF and the UN WHO have worked with the Elites to do this so they can make the rest of us serfs.

The Atomic Reverend

Quoted from David Read a journalist.

“Yuval Noah Harari, one of the top advisors of the World Economic Forum, claims we are moving towards a world where we will not need most of the people who are currently alive.

Harari, an Israeli national and a history professor at Hebrew University of Jerusalem, was interviewed by Chris Anderson as part of TED’s “audio collective,” said that we simply “don’t need the vast majority of the population.” He called for human beings to be replaced by machines whenever possible, saying that people are just no longer “useful” to the global elite and their agenda.”

-End quote-

Knowing that and knowing that Joe Biden is part of the world economic form same thing with that nail disgraced broad from New Zealand, Justin Trudeau, Emmanuel macron and a bunch of the other Western “leaders”

Does it surprise anyone that they appear to be trying to cull us?

When we finally get mad enough and we rise up against these tyrants I will happily volunteer to pull the lever to knock the floor out from under them when the noos is tied around their necks.

Every one of these billionaire elitist yay holes need to be killed by vigilante Justice. Normally I believe in law and order but they are using our own laws against us.

No one in parliament these days? No one there to hear the truth?

Australian cops were beating people bloody for not wearing masks – any apologies for that “SS” behavior?

Knowledge Economy

This goes so much deeper. Listen to RFK's interview with Sasha Latypova, or just search her work. The conspiracy theories of the last 30 years are coalescing right now, in politics, media, tech, academia, finance, and, following Covid, in science. Interesting times ahead.

I agree with the exception of those who were coerced into taking it to keep their job.

My main desire is to see all those who knew this drug had potential for great harm tried for crimes against humanity, but don't expect it'll happen. Also those who profited off of this medicine should be made to pay dearly to those who've been negatively affected by it, but again, doubt it'll happen as our country has become utterly corrupt.

Many had no choice if they were to keep their jobs to feed and support their families. They were busy working and had little time to do a deep dive into the scandemic.

Their government and their Healthcare professionals lied to them.

It was an abomination. I have family members who had a least one shot. I do not want them to die. God forbid.

Covid was a very well planned and funded propaganda event. It is understandable that people who were busy and distracted with their jobs and families would not seeing through a very carefully constructed PsyOp media blitz. However, if they allow themselves to be duped again by the next big “thing”, it is their fault.

Blame the F'ing Democrat idiot sheep voters who put the nitwit in the Whitehouse. President Trump was cured with a cocktail that included Hydroxychloroquin and he told us so. But nooo, the censoring Marxist demons on the left prohibited any mention of if or Ivermectin which is sold over the counter like aspirin, keeping India and Mexico, two of the most densely populated countries, almost free of Covid.

It was premeditated murder and those responsible must pay. Big pharma first, then the media, then the rest.

Australia's sparse population can blissfully continue to live in those areas along the coast, while the CCP buys up the arid land swaths with those vast resources cheap, actually stealing it in effect. The Aussie politicians will get rich from bribes to let this happen, while the regular Aussie are controlled by the CCP via the Aussie politicians (governors). Sounds familiar...

Excellent. More of this please. The only way these scumbags are going to be held accountable is sunlight. Shine it right in their face every day. Never forget what these goons and lickspittles did to their fellow countrymen and fellow humans. Every politician in favor of job mandates should be imprisoned immediately. Every news outlet that lied and scared people into getting jabbed should be fined to the hilt, and maybe even put out of business. Every doctor that lied to the people in their care about jabs in order to profit should be incarcerated and decertified. Every company that mandated poison jabs for the employees at the expense of their job should be fined, audited, and made to pay REAL damages to those it coerced. The pharmaceutical companies involved must be torn down to the very last dime, and their executives placed in irons. These people do not understand anything but strength. They must be forced to publicly recant, ask for forgiveness, and offered none.

That was one of my first warnings also. That and how no debate was allowed. 100 percent of the time in my nearly 3 score and 10 years has that been a tell to AVOID when something is sold as perfect and without any doubt effective. It.Never.Is.True.
So I went hunting for nay sayers, considered their points and prayed they were going to be wrong for everyone else's sake (I took my chances with a bug that seemed pretty mild comparatively and bought a good supply of

the I-word that ended up saving me when I did finally catch it.)

I am mostly stunned that people were so easily scared into placing themselves and especially their children in potentially irreversible mortal danger. Because someone told them to.

Still gives me chills thinking about that. I have one family member, ONE, who didn't take the vaccine along with me. And maybe two friends and a couple of co workers. That's it. Everyone else took at least one, most took 2 and some coworkers are still getting boosters to this day.

It boggles the mind that people are so easily led. Fear is so powerful a weapon, it bypasses all logic and even the self preservation caution of most. SMH...
