## Edward Dowd Presents Irrefutable Evidence Vaccine Mandates Killed & Disabled Countless Americans

March 20, 2023 • by [The Vigilant Fox \(https://dailyclout.io/author/kevinchase/\)](https://dailyclout.io/author/kevinchase/)

**“Unless we have a new virus that knows you’re working, there’s no explanation for it.”**

Back in March 2022, [Edward Dowd \(https://gettr.com/user/edwarddowd\)](https://gettr.com/user/edwarddowd) dropped a bomb using the CDC's own data to show an 84% increase in excess mortality among the millennial cohort, temporally related to the introduction of vaccine mandates from the summer into the fall.

“Starting in the summer into the fall with the mandates and the boosters, there were 61,000 excess millennial deaths. Basically, millennials experienced a Vietnam War in the second half of 2021,” he reported. “This is what we call democide, death by government.”

Ever since former Blackrock portfolio manager [Ed Dowd \(https://twitter.com/DowdEdward\)](https://twitter.com/DowdEdward) started making waves with his data, the mainstream media hasn't put much effort into debunking [Dowd's argument \(https://www.skyhorsepublishing.com/9781510776432/cause-unknown/\)](https://www.skyhorsepublishing.com/9781510776432/cause-unknown/). Instead, they opted to ignore him.

And since then, he's analyzed [data set \(https://vigilantfox.substack.com/p/smoking-gun-disability-data-reveals\)](https://vigilantfox.substack.com/p/smoking-gun-disability-data-reveals) after [data set \(https://vigilantfox.substack.com/p/silent-health-crisis-rips-through\)](https://vigilantfox.substack.com/p/silent-health-crisis-rips-through) — maintaining the conclusion that the mRNA COVID-19 injections are leaving behind a trail of destruction, disability, and death. He's summarized his thesis into a compelling book,

*"Cause Unknown": The Epidemic of Sudden Deaths in 2021 & 2022.*

[\(https://www.skyhorsepublishing.com/9781510776432/cause-unknown/\)](https://www.skyhorsepublishing.com/9781510776432/cause-unknown/)

**But not everyone has the time to read an entire book.**

So [Edward Dowd \(https://twitter.com/DowdEdward\)](https://twitter.com/DowdEdward) delivered the "elevator pitch."

“What is the most compelling piece of evidence that you have discovered and that you have covered to show that the vaccine is indeed harming people? What is the one or two pieces of data that you think are the most persuasive?” asked conservative pundit

Charlie Kirk (<https://rumble.com/v2d6lm8-ed-dowd-reveals-the-most-damning-evidence-that-the-covid-vaccine-is-harming.html>)

---

“So, two data sets,” replied [Mr. Dowd \(https://twitter.com/DowdEdward\)](https://twitter.com/DowdEdward).

1.)

## **The Society of Actuaries Group Life Policy Holder Data (<https://www.soa.org/resources/experience-studies/2022/group-life-covid-19-mortality-03-2022/>)**

Group Life Insurance is a life insurance policy often offered by large and mid-sized corporations to their employees. In 2016 the [Society of Actuaries \(https://www.soa.org/\)](https://www.soa.org/) performed a study looking at the years 2010 through 2013, in which they compared the mortality rates of people on Group Life Insurance policies to the general population. And they found that the Group Life cohort died at about one-third the rate of the general population for each respective age group within working-aged years.

But “that inverted in 2021.” Instead, Group Life policyholders (employed with well-paying jobs) suffered 40% excess mortality, whereas the general population experienced 32% excess mortality — an 8% difference.

“I blame the vaccines and mandates,” declared [Edward Dowd \(https://twitter.com/DowdEdward\)](https://twitter.com/DowdEdward).

2.)

## **The U.S Bureau of Statistics Disability Data (<https://fred.stlouisfed.org/series/LNU00074597>)**

Over three million more unfortunate souls – than two years ago – are now among the U.S. disabled population.

What's interesting is that the trend was overall heading downward in 2020. It wasn't until 2021 that the disability numbers took a significant turn for the worse — increasing by 10%.

“That was a three standard deviation event, which in geekspeak, happens point 0.3% of the time — rapid increase,” explained [Mr. Dowd \(https://twitter.com/DowdEdward\)](https://twitter.com/DowdEdward).

“Of those 3.2 million people that were added, 1.7 million are employed. When you look at the disability rate increases, employed went up 31%; the general US population went up 9%,” reported [Edward Dowd \(https://twitter.com/DowdEdward\)](https://twitter.com/DowdEdward).

“And what’s even worse is those not in labor force — those are people who could work and are willing to work — their disability rate only went up 4%. Those are the people who got fired for not taking the job or refused to take the job and quit.”

“So typically speaking, the employed of the country, by the very nature of going to work, aren’t as disabled as the general US population. And this has never happened in the history of our country,” he attested.

“Those two pieces of data are, for me, a mic drop. That’s what I presented to Senator Ron Johnson (R-WI) in December. And that’s it. That’s all we need to know.”

**But correlation doesn’t necessarily mean causation. “You don’t know the vaccine is causing that,” many would argue.**

Ed Dowd (<https://twitter.com/DowdEdward>) responds to such argument, “Well, so did the virus mutate in 2021 and 2022 to only affect younger age working people, but somehow avoid those who are not employed? That’s it. **Unless we have a new virus that knows you’re working, there’s no explanation for it.**”

**So, if the vaccines are killing people, approximately how many people have died because of them?**

Edward Dowd (<https://twitter.com/DowdEdward>) has already analyzed the data and documented it on his website (<https://phinancetechnologies.com/HumanityProjects/US%20Disabilities%20-%20Part4.htm>). And he found that for every excess death, there are about four additional cases of disabilities.

So according to [Mr. Dowd's \(https://twitter.com/DowdEdward\)](https://twitter.com/DowdEdward) calculation, if 3.2 million more Americans have become disabled in 2021 and 2022, that means about **800,000 Americans have died due to the COVID injections.**

If you found [Edward's Dowd \(https://twitter.com/DowdEdward\)](https://twitter.com/DowdEdward) "elevator pitch" convincing, please share this article with one friend.

# The Greatest Crime In Human History Ever Recorded Is Coming Soon in Paperback Form

The damning information that Pfizer, and as such, what the FDA knew, and wanted to keep hidden for 75 years, has been thoroughly documented and compiled into a paperback book (<https://dailyclout.io/product/war-room-dailyclout-pfizer-documents-analysis-volunteers-reports-book-paperback/>)

---

These important summaries, which detail astonishing ranges of deaths, disabilities, and other systematic harms to subjects, contain vastly important headlines: twenty forms of menstrual damage to women — how Pfizer covered up a flood of adverse events — PEG in breast milk — within a month of rollout, Pfizer knew the mRNA vaccines did not work.

All funds and proceeds raised go to the research project — and put food on the table for those devoting their time to this noble cause. So, please, show your support and get your (or a loved one's) hands on this critical information in one place — by ordering your copy (<https://dailyclout.io/product/war-room-dailyclout-pfizer-documents-analysis-volunteers-reports-book-paperback/>) today.

So if I am trying to help make your argument more persuasive, a counter argument will be that it was actually covid itself that causes this trend. One could imagine that while the vax rollout was much earlier than the increase in disability, it might have taken some time for the disability to manifest. Further, those IN the work force would have had more potential covid exposure, which could explain why that subgroup had a higher rate of disability. I bring up this argument because it will be an immediate response by those that want to discredit the data and there needs to be a rebuttal if you want to have a strong argument. The obvious way to refute this would be to measure the rate of Covid itself in the two subgroups. If it was the same, then its unlike the source of the discrepancy. However, this measurement would be very difficult to do (certainly in hindsight).

Most people follow one source of info and are not interested in exploring other opinions no matter how authoritative they may be. This is a highly politicized issue.
