Denis Rancourt – there was no C19 respiratory disease, hospital protocols killed people, withholding anti-biotics from the poor killed people – 13 million dead globally, 330,000 in the US

H/t Dan Fournier his article covering the full 12 hours of proceedings of the National Citizens Enquiry on May 11, Day 1, Quebec here:

(100) Massive Covid-19 Data Manipulation Revealed: Highlights from the National Citizens Inquiry in Quebec City (substack.com)

Worth a read before watching the video or reading my ciff notes. Do a Ctrl F with “Rancourt begins” as the search term to navigate to Dan Fournier’s reporting in the SubStack link.

Denis Rancourt’s one hour 15 minute testimony starts at around the 10 hour mark.

Cliff notes:

Not possible for such a severe US rate of death to occur without the same rate of death in Canada. In other words, excess mortality was not the result of a respiratory virus.

Poverty has a strong correlation with reported C19 deaths amongst US States – slide below of poverty rate v mortality rate for 50 US States. No-one poor = no deaths = no respiratory virus. 30 million health poverty/institutionalized on medications - Americans unable to take care of themselves. Mental health problems, average income. Above 130,000 bucks per family = no deaths.

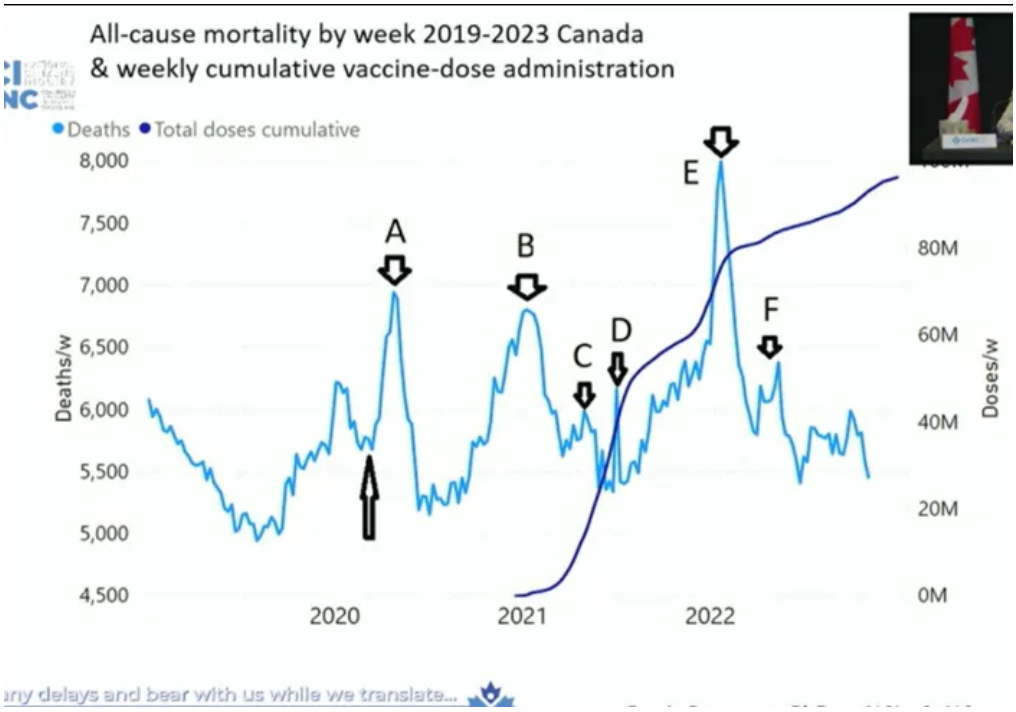
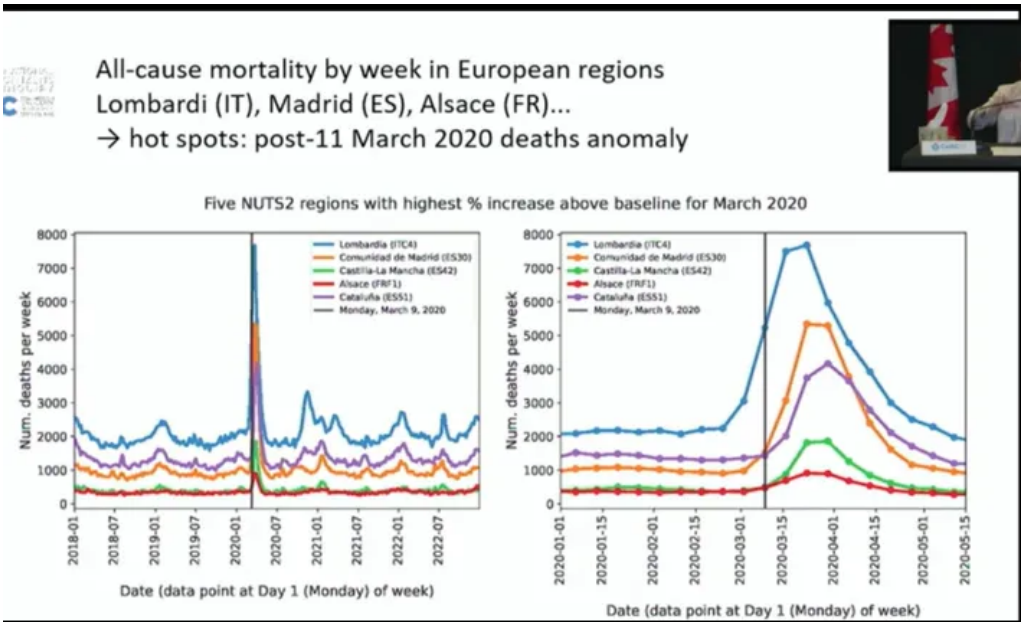
Hig s mortality – before and after inje

Lot lives with NPI's – complete fab .

All cause mortality coincides with injection roll-out in Canada:



Mortality waves brings about the peak – in BC – for example. Same as New York and New Jersey. Same peak at same time in Europe – hot spots that coincide with injections.



Check out the monthly progression from around the 10:46 minute mark .

2020, all is normal for excess mortality - IT IS NOT A RESPIRATORY VIRUS – CAUSED BY WHAT IS HAPPENING IN HOSPITALS.

Did not cross into Spain, Portugal and Germany – hot spots not Europe wide. – people died in hospitals – not from the virus – e.g. use of respiratory machines.

Overdoses of HCQ caused deaths. Did not follow HCQ protocols – O/D of HCQ = excess deaths – Germany did not O/D = no excess mortality.

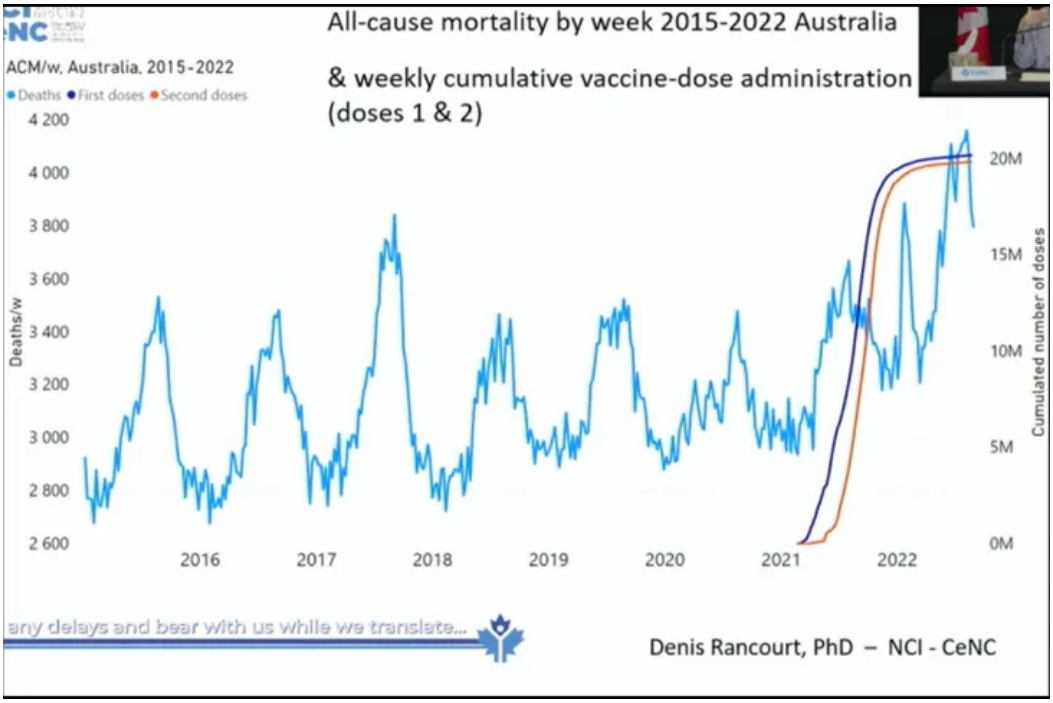
“Vaccines” cause death – irrefutable – autopsy studies available – adverse event monitoring

Denis Rancourt 330,000 US deaths linked to “vaccines” corroborated by other studies.

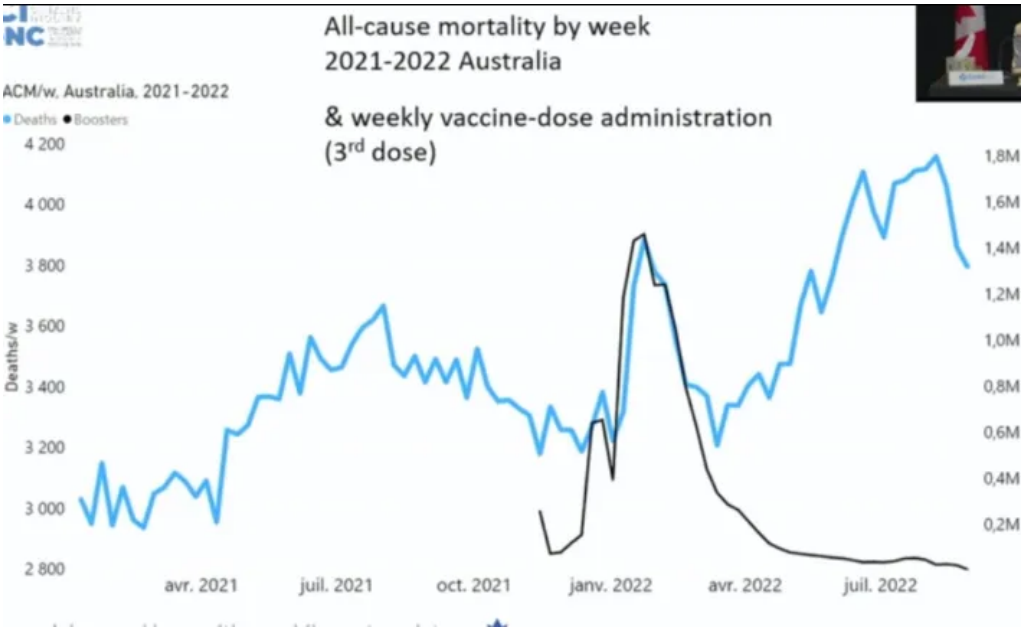
In India no excess mortality prior to vaccine – vaccine festival – vulnerable first – killed 3.7 million(in 2021?) – see previous article below.

(100) Did the roll-out of approximately 350 million doses in India between April-July 2021 cause 3.7 million deaths? (substack.com)

For Australia, excess mortality occurs after vaccines, In Australian summer, after third injection.



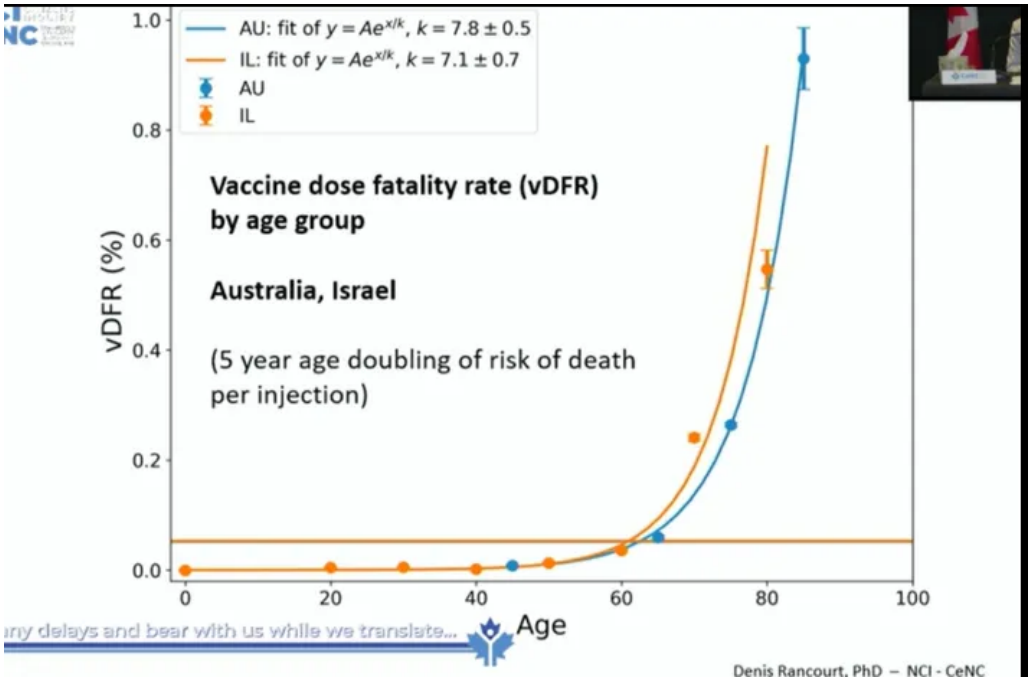
Australians don't die of heat waves, so this is out of their flu season over May to August.



We can quantify number of people that die per dose

Poor US States excess death = more deaths in poor US States - same rates as in poor India.

Age demographic of deaths by age:

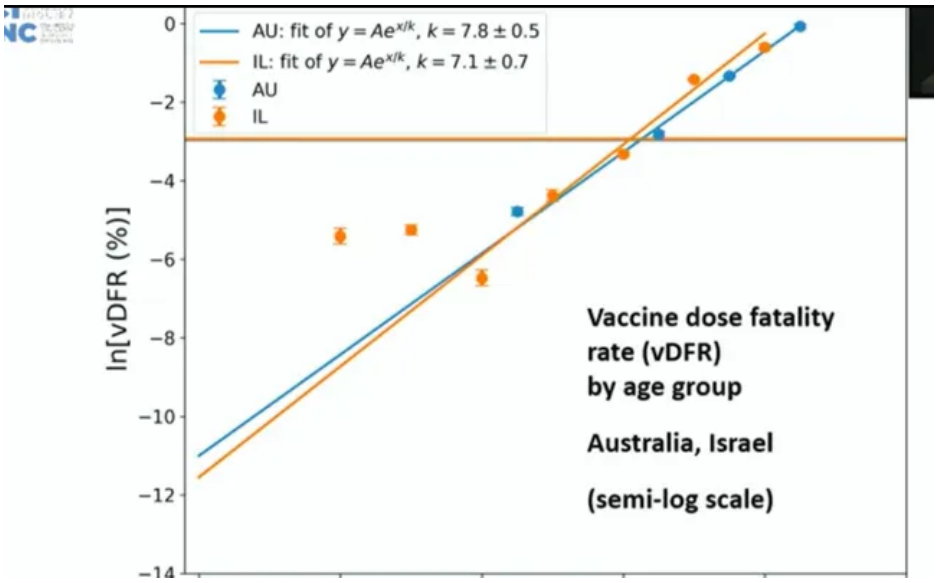


Australia and Israel have good data.

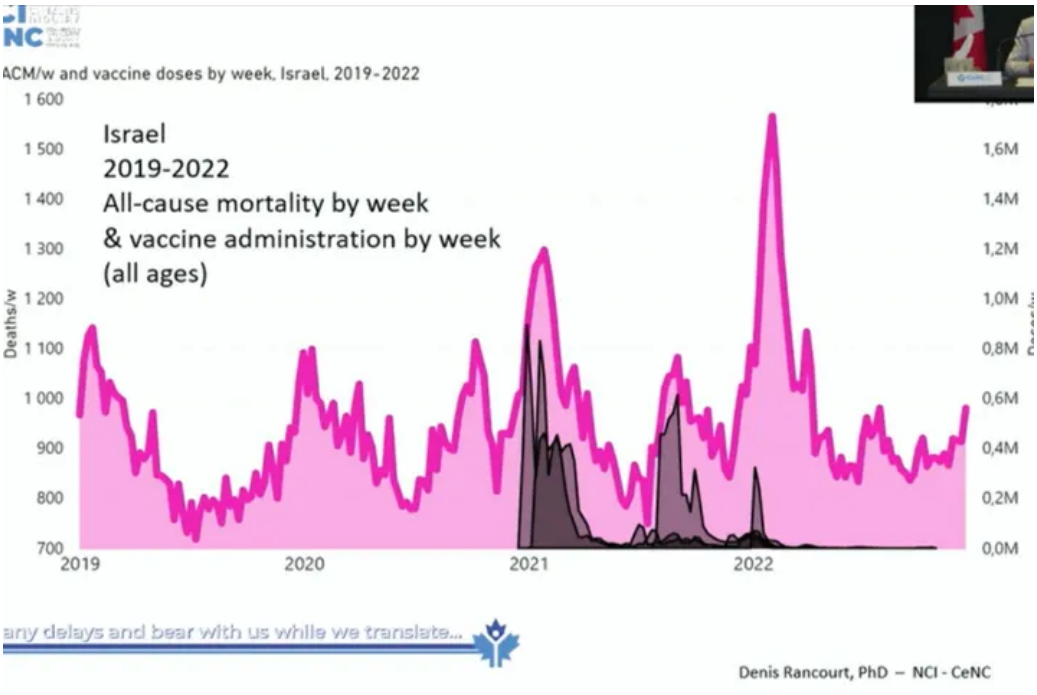
Fatality by injection by age in chart above.

100 doses will kill one person. ONE PER CENT!!! (13 billion doses globally!!!)

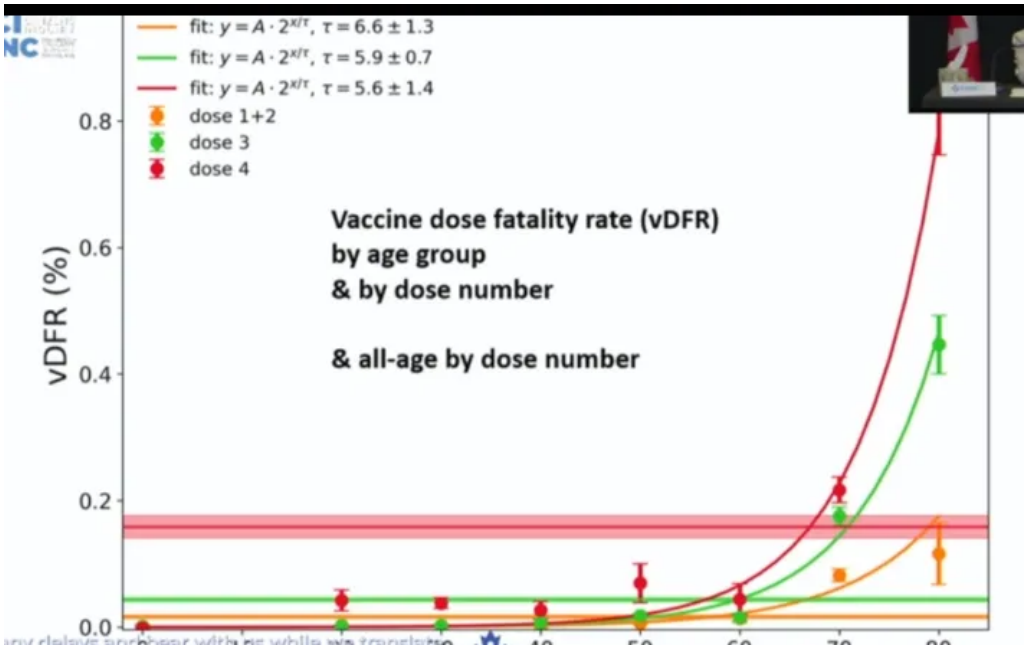
Younger people's risk is higher than usual for the young:



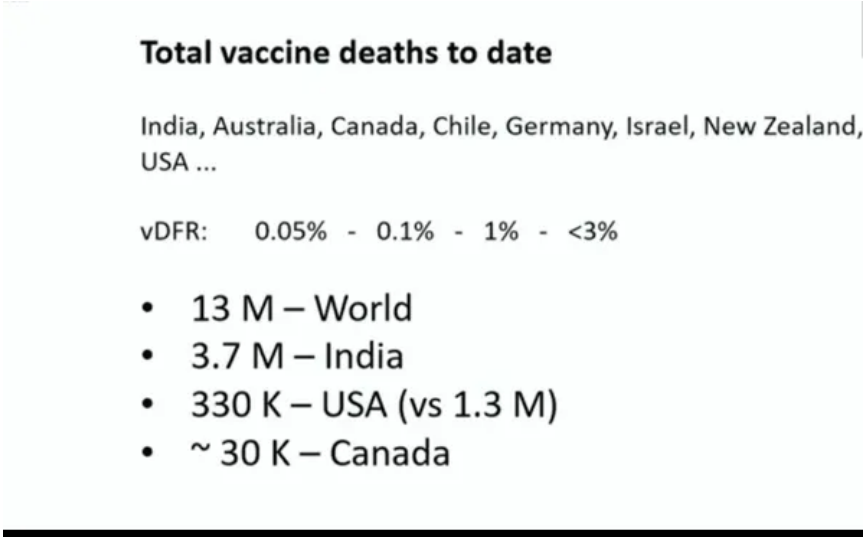
Doses by mortality – pink = doses and black = deaths:



More doses = more deadly.



More research on fatalities globally – about to be published.



Average numbers from prior research– 13 million dead worldwide – US 330,000 people.

Poor people in US States used to receive antibiotics – antibiotic usage cut by half in the US – the poor died.

Onwards!

....and not one jab death in China which did not use mRNA tech on over a billion.

Remember all the jokes about bat soup? Where's the smoking bat? Senator Kennedy
