Yesterday, the third International COVID Summit was held at the European Parliament. As noted by the European Parliament Members in attendance, this was an historic event. The summit lasted all day, with many fantastic speakers. It was live streamed and recordings of the many speakers will be made available soon. The ICS summit covered all aspects of the pandemic, as well as the documentation of the increasing power grab by the World Health Organization to control public health and increased control by organized globalized entities throughout the world .

At the end of the day, I was asked to give a summary of the day's highlights. This was no small task - but I gave it my best shot. Please pardon my "ums," I was stumbling over the

many new names and concepts that I had to quickly collate in my own mind on short notice.

ICS³

MAY 2, 3, 4, 2023
BRUSSELS

May 3rd guests will speak directly from the European Parliament and will stream live in 7 languages.

Co-hosted by MEPs:

CRISTIAN TERHES
IVAN VILIBOR SINČIĆ*
CHRISTINE ANDERSON*
FRANCESCA DONATO*
MISLAV KOLAKUŠIĆ*

As an organizing member (and I suppose co-founder) of the International COVID summit, I have been amazed at how these events have come together. This particular summit has been a huge success.

Today, a press conference was held with the members of EU Parliament who helped organize this event, myself and Dr. Byram Bridle. There was much excitement about the high quality, primary data shared at the meeting and the need for the media to participate more actively in disseminating the important work of these scientists. People at the Parliament, including MEPs are enthusiastic about an ICS book of the presentations presented at the EU Parliament be published soon.

At that press conference, it was announced by Romanian officials that they wish for an International COVID summit to be held in Romania in September of this year. Another European nation, which I am not privy to name yet, has also expressed a strong interest in having a summit in their country's legislative body as well. This is real progress!

Last week, I put out a call for donations and so many of readers responded. We raised just about \$10,000.00, which helped pay for the event venue on May 1st. This day was a closed session of about 100 doctors and scientists, who were able to discuss their findings in detail and strategize in this confidential forum. It also helped pay for a media event and open public sessions, which are being held today.

Transcript of the International COVID Summit Summary Statement

Dr. Robert W. Malone

Four members of the European Parliament (EP) have basically given rise to this growing momentum here in the European Parliament of willingness to recognize the truths that have occurred despite all of the propaganda, censorship, defamation, and other malicious activities that have been deployed on them and so many others across the world.

The two members that initially spoke, Mr. Christian Terhes (Romania) and Mr. Ivan Sincic (Croatia) emphasized that we should allow scientists to speak, and that this pandemic of the COVID narrative has finally collapsed. And with this conference, they had hoped, and I think we have succeeded, in demonstrating the failures of that approved narrative. That being the truth that has been revealed over the last three years thanks to these many researchers and all of those that work with them to provide this information for us.

Dr. David Martin (United States) discussed that he had warned the European Parliament years ago about the risks of allowing the licensure or the patenting of genetic organisms and the proceeding of gain of function research. He had anticipated many years ago and warned the parliament about the risks that might incur if we allowed these policies, and then documented extensively how humanity has been hijacked, morality has been hijacked, science has been hijacked, nature has been hijacked, all in the service of a universal vaccine template with a presumed hundred percent protection. He called out that this must be reversed, that we must have in the future, 100% product liability for those that wish to impose these or other new technologies on the populations of the world.

Nick Hudson (South Africa) from PANDATA (Panda), who I have known personally and who has worked very, very hard with his group (always been willing to challenge the dominant narrative) shared with us that we really have had false narratives dominating world discussion and press for these last three years. That false narratives included that these were deadly viruses, that there was no preexisting immunity, that this was a novel virus, that everyone was susceptible to this disease, that we had asymptomatic transmission, that the lockdown saved lives, that the mask mandates reduced transmission. Every one of these things was a lie, and yet they were repeatedly propagandized and distributed throughout the world in a harmonized fashion that I think has left all of us in awe.

If nothing else, we must give credit to those who have deployed this propaganda. I think it is one of the most amazing demonstrations of modern PSYOPs and propaganda, as was well demonstrated during the various presentations. Dr. Ciro Isidoro (Italy) demonstrated that this is not really a novel disease, it's an old disease, and emphasized that you can't find the cause of death if you do not do autopsies. You can't save COVID patients with paracetamol and watchful waiting. He also presented a lesson that was repeatedly emphasized throughout the conference: Spike is a toxin. This is something that I was roundly attacked for saying over two years ago, and I'm very reassured to see that this is now universally accepted, at least within our community.

Dr. Giovanni Meledandri (Italy) demonstrated and spoke about the evolution of coronavirus, which demonstrates a pattern of disease attenuation, and as many had predicted that what we have seen during this outbreak is absolutely the selection of vaccine resistant mutants. Although we have seen the rise in infectivity with the latest Arcturus variant, the infections are ocular. As has been the case with viral outbreaks throughout history, we've seen the increasing attenuation of the virus and its reduction in pathogenicity now to the point where we really just have something akin to a normal circulating respiratory virus, the likes of which we have seen throughout all of our lives as physicians and as general members of the patient population.

Dr. Stramezzi (Italy) emphasized the importance of early responses in Italy, and most importantly that it was known in June of 2020 that COVID was a treatable disease. Despite the various efforts from throughout the world, in particular the Italian authorities, to suppress that information and to encourage the narrative that this was a

novel disease that was highly pathogenic, that required sophisticated novel treatments, Dr. Stramezzi gave us a great lesson in the ability of a well-trained physician to obtain and derive and demonstrate the ability to treat a respiratory virus with existing agents. This is a theme that has been echoed throughout this conference and throughout the world, starting with the original International COVID Summit, which pioneered bringing together physicians from all over the world to demonstrate in particular and discuss and share with each other best practices in early treatment.

And as I think that this whole series of International COVID summits, I just want to give a shout-out to the two organizers that always wish to remain anonymous, Lilly (Canada) and Rob (Italy), who are not medical professionals. They're brave, committed individuals who felt the call to duty and stood up at a time when everyone else was afraid and said, "We are going to get these conferences started and run and operated." They have encountered repeated obstacles throughout the history of the International COVID Summit and have overcome every single one. I can't tell you how many times we thought this particular conference was going to come to naught. And yet here we are, I think with one of the most successful ICS conferences to date.

Moving on, Dr. Luis Fouche (France) gave us a great essay on the effects of mandates, early treatment, and he particularly focused on masks and associated data. He explained that there's no utility for masks for preventing Coronavirus infection, which I know will shock most of you (sarcasm). As early as March 2020, the evidence existed that masks could cause harm, that the CDC evidence for mask use is not existent or weak, that masks do not work in schools – as shown by studies in the European Union, that the data are quite clear, that the lockdowns in the European Union increased the speed of transmission by 50% relative to Sweden. That's shocking to me. Lockdowns must be avoided and mask use in children absolutely must be avoided going forward for these types of respiratory diseases. I think that's something we can all get behind.

Professor Dr. Phillipe Brouqui (France) forgive me if I'm mispronouncing, gave us his analysis of the IHU experience in use of hydroxychloroquine to treat COVID disease. We were unfortunately deprived of the opportunity that many of us looked forward to, for Professor Didier Raoult (France, also of IHU) to share his time and insight. I remember personally how badly Dr. Raoult was defamed, slandered, harassed, delegitimized by the press, and yet he persisted; one of the greatest virology scientists and

immunologists in France, who unfortunately has been forced into retirement. He built an amazing institute, the IHU, and we did benefit from Phillipe Brouqui sharing with us the experience of the IHU in the use of hydroxychloroquine, and in particular, his courage in speaking about the limitations of evidence-based medicine and randomized clinical trials in the face of an outbreak, and their (IHU) willingness to make the same decision I had made and focus on early treatment with repurposed drugs.

And I think in retrospect, many of us will agree that was the wisest position taken, to focus on drug repurposing, not development of new vaccines and not seeking novel drugs. The IHU led the world in this, and had great success and also demonstrated that the vaccines have had no effect on the pandemic, unfortunately. But I think we all owe the institute. And Dr. Raoult, an enthusiastic thank you for their courage and fortitude in the face of all the obstacles and all of the derision that they've encountered for their guidance and leadership in pioneering the various treatments that revolved around use of hydroxychloroquine and azithromycin in particular.

Dr. Pierre Kory (USA), my American colleague, stepped in then and spoke at length about Ivermectin, and gave us just a classic series of demonstrations about how the whole enterprise of the pharmaceutical industry and the academic publishing industry has been compromised throughout this COVIDcrisis in a way that we can now clearly see, particularly in the way they've mismanaged repurposed drugs and ivermectin in particular. And I certainly resonate with that. I have many examples with him of how the likes of the FDA have suppressed ivermectin very adequately. I saw what was going on during ACTIV-6 and I resigned.

Jason Christoff (Canada) gave us what I think was one of the most important speeches here, from my perspective. As we think about going forward, Jason gave us clear demonstrations of how the media and information warfare technology has been weaponized and deployed against us. And he concludes that crimes were committed and psychology and psychological technology (including “Nudge” technology) was weaponized against the public, and that this must never happen again. This is one of the things that I feel most strongly about, is that somehow we need legislation that makes it clear that deploying fifth generation warfare technology, PSYOPs, psywar technology on civilian populations is absolutely not acceptable.

And the bizarre thing is that the deploying of this technology has been justified on the basis that it's necessary to do this to preserve democracy. I argue the contrary is what's true, that this makes the concept of democracy obsolete. The idea of personal autonomy, of the ability of an individual to have personal sovereignty is completely negated in a world in which governments feel that it's acceptable to deploy modern PSYOPs technology on their own populations. It means that everything that we hold dear in terms of free speech and democracy and representation and the evolution of power down to the lowest level that it should be delegated to, which was a core principle upon which the European Union was founded, has been negated over the last three years. And we have seen that clearly. It's the theme that runs all the way through this meeting.

Dr. Harvey Risch (USA) gave us great examples about the problems with the manipulation of data on the efficacy of vaccines. Dr. Byron Bridle (Canada), who I think has just been a hero all the way through this, also spoke. I don't think there's a better case study that I'm aware of, of how somebody has spoken truth, acted with integrity and dignity, and just been harassed mercilessly by his academic institution and his government than the example of Dr. Bridle over the last three years. But Byron has stood his ground. I think he's developed some nervous ticks over the last three years, but I think he's just been an amazing hero in what he's done in revealing the Pfizer/Japanese common technical document and so many other things.

EP Member Francesca Donato (Italy) gave us a summary from the morning about the importance of truth, democracy, and freedom, which has been important to all of us since the beginning. I think those were excellent summary comments. And EP Member Mislav Kolakusic (Croatia), made the clear, unequivocal statement that physicians should define pandemics, not the World Health Organization. I think that's another thing we can all concur with. EP Member Christine Anderson (Germany) followed with an emphasis that the "official" EP COVID Committee reports are repeating. The COVID committee reports that have come out of this institution are repeating as accepted wisdom every single lie that we have encountered all the way through this outbreak. That report is really not valid. It is clearly biased.

I could go on and on about the excellent presentations from Dr. Guisepppe Tritto (Italy), Dr. Natalia Prego (Spain), Professor Giovanni Frajese (Italy), Emmanuelle Darles (France), Alejandro Diaz Villalobos (Mexico), giving us the perspective on the pediatric

consequences of the mismanagement from Mexico. Dr. Kirk Milhoan (USA), my good friend, making it abundantly clear about the cardiac pathology associated with the COVID “vaccines”, the unnecessary deployment of these “vaccines” in pediatric populations and the excess mortality and morbidity that has been associated with that. And Dr. Rosanna Chifari (Italy) spoke about the fetal effects of the “vaccines” and that spike activates microglia in the brain, as well as the CNS consequences of this. Dr. Arne Berkhartd (Germany) spoke about damage to heart and lungs observed in his series of 75 autopsies. So we now have clear autopsy data, and excellent presentations from our pathologists, including my friend Dr. Ryan Cole (USA), about the effects of the COVID “vaccines” on cancer.

We also had Vincent Pavan (France) speaking about the data concerning all-cause mortality in France. Supporting these observations were the all-cause mortality statistics of Dr. Theo Schetters (Netherlands) showing the correlation between the deployment of the vaccines and the waves of excess all-cause mortality in the elderly, which are perhaps the most clear and explicit demonstration of what is really a “re-challenge study” that I've ever seen. There should be no more doubt about the cause and effect relationship between mRNA vaccines and death. We have seen all of this noise about correlation does not prove causation. We've seen data from Theo and from Dr. Jessica Rose (Canada) and so many others that refute this thesis. And as Dr. Rose kindly points out, without screaming it to the roof, that the Bradford Hill criteria have been abundantly met here in demonstrating that this is a valid correlation.

I could go on and on about the legal consequences and breaches that have occurred throughout the European Union and the world, as documented by Children's Health Defense and many others. Many other attorneys, both in the United States, in Australia, and throughout the European Union, Switzerland, are finally reaching the point where they're holding officials and hopefully pharmaceutical companies accountable. And I think that we will all be able to synergize as this discovery process moves forward.

Then in conclusion we had what were frankly forward looking presentations, frankly from Drs. Meryl Nass (USA) and Katarina Lindley (Croatia), my good friends, an alert, the thing that you should take home, is that these new regulations, these International Health Regulation modifications that the WHO is trying to slip under the rug so that we don't pay attention to them, and unfortunately they've been promoted by the

government that I'm a citizen of. And I can tell you that in my country, there is great consternation and disagreement about pushing these from this administration and our health and human services through the World Health Organization.

I concur that the risk is substantial for basically a surreptitious power grab by a group that is not elected, is not representative, and has shown (for instance) in the Monkeypox outbreak as well as with this outbreak to not be responsible custodians of world health and human health.

I thank you for your time. I hope this was helpful. And now we've got to get out of here before we get thrown out.

May God reward you richly for your efforts, Dr. Malone. I appreciate you personally more than you know. I'm compelled to infer that you, RFK Jr, Del Bigtree, etc were divinely brought to your respective states of knowledge and statuses for this time. At bare minimum, God, through you etal, is giving people a chance to side with reason and love over fear and darwinian competition due to the valiant fight you warriors have waged over the last 3 years or so.

After the horrors of the Holocaust, the worldwide Jewish community has never allowed anyone to forget what happened to their community. Dr. Malone, we must also never let anyone forget what happened during the CovidCrisis. Please stay healthy and please keep up the pressure. We may never be made whole again, but we can never let the criminals who orchestrated the CovidCrisis do it again.

This has been an historic event indeed. For someone who works in the European bureaucracy I felt the building shake yesterday and myself in awe of what MEPs have achieved. You have been remarkable in summarising such a rich event in di few minutes. The "uhms" were actually emphasising how genuine and honest and unscripted the event was. Please urge the organisers to provide an official EP recording which we will take care to disseminate in the institutions and among colleagues. No one working for the EU institutions will be able to say from today onwards "I didn't know".

Dr Malone thank you for your hard-work and sacrifice. My words are lacking how grateful I am. My family, the five of us with three daughters made it through the world lie and maestro Dr Fauci's incredible masterpiece of deception escaping the jab. Yes we have our trauma that we are still working through. My ladies are attending college out of the state of Oregon

which was not the plan be they ran from the mandates. My twin daughters graduated in 2020 by way of drive in style. My youngest is graduating this year attending most her high school career under the narcissism of Kate Brown mandates. All my daughters are A students and beautiful souls. I fought for them and with them and my wife with my sometimes (most the time) crazy madness behavior of...these mandates are LIES. We must not succumb to these lies I screamed from soul passionately from our Oregon farm! The trauma still lingers in me as I continue to work through next steps. I am a business owner in the construction industry and an Internet doctor who believes in natural medicine created by Creator Divine.

My youngest is going into medicine and attending Montana State University. How do I best guide her? I am so concerned about the medical industry complex brainwashing. Where do I AIM her especially as she rolls her eyes saying, "here goes dad again." I am a constitutional believer. I love our country (Army Vet) and I want the best for the people and I recognize how blessed we are as we drown in our blessing blindness of consumerism, me included. I do my best to forgive but troubled by what I see. Fight and forgive and fight or forgive, I oscillate between. I want to help and start by making my bed every morning but I feel hopeless at times. If it wasn't for you and your peers I would loose hope. Thank you thank you thank you. Much love and prayers for you and your family.

What a magnificent accomplishment! There are no words to express the deep heart felt gratitude all of humanity should have and express to one and all who made possible, and participated in third annual Summit. Wow! I for one stand in awe! Thank you!

The resistance is winning. Government is backing down and or walking back at all levels, but for those psychos who are not - and we will get to them and to their handlers as well.

Strategically, the current "double down" nefarious and mortal blow if left unchecked, and soon, to U.S. populations is contaminated food supply for breakfast lunch and dinners across the land. Our resistance strategists could justifiably consider splitting attack tactics (and likewise personnel) into two groups: maintaining pressure on govt to ban vax and whatever the strategists deem essential preceding during or after that general mission statement; and, addressing plant and meat product poisoning now well underway.

Do we really know what is in our children's food now or what will be in it tomorrow? Could it be food poisoning fits a depopulation agenda? If yes to the first by way of available data, and yes to the second, how can we not address this concern with everything we have and can muster?

♡ LIKE (16) 💬 REPLY (2) ...

YourVoiceCounts May 4 · *edited May 4*

Let's use S.W.O.T. to assess the resistance and the enemy. Strengths: we are now organized and in agreement with evidence to crush safety and efficacy of vax with demonstrated death, disability, injury, miscarriages and infertility. Weaknesses: unlike covid vaxx war, the enemy has no backing for inclusion of vaxx and other crap in plant and animal products served on our breakfast lunch and dinner plates. University research funding, MSM advertising revenue, bribery monies relating to dishonest dems (and reps) in congress - all of these illicit financing has likely not been handed over to those scoundrels and traitors (yet), hence, the enemy is much less planned and much weaker than he was when we faced Covid injection battles, therefore it is much easier to "turn" former allies of the enemy into supporters of a "no vax in food products allowed" platform (at present - that circumstance will change to our detriment over time). Opportunities: review our advantage (aka opportunity) in the forgoing statements within this paragraph. Threats: the threats we face is the inevitable mass poisoning of our food which is likely intended to alter our genome - not in a good way, resulting in

inheritable maladies where the sheer numbers of same can and likely will dwarf the 1/3 loss in labor force the U.S. experienced circa 2021 through 2022, and counting. We must Act Now or watch as we see and feel, experience the slow poisoning of all of us and our children and parents over the next few years.

It's up to us. As Reiner and Martin, Renz and Callender, to name a few of our many leaders teaches us, "there is no Calvary - We [The People] are the Calvary!"

Our OBJECTIVE is to secure a Federal District Court Judicial Order temporarily restraining and then permanently banning inclusion of known poisons and other risky products into public food supply chain products. AND WE CAN DO THAT!

A federal judge who has children and grandchildren will likely deeply appreciate our request and odds are the more federal judges approached, the greater the chances one Injunction will be Ordered - and it only takes ONE to stop this criminal practice nation wide. Just one and we win this war now waged on the food we all eat.

I couldn't even explain to other physicians that Hydroxychloroquine was safe at recommended doses...that it had some scientific ACE-2 binder mechanism, had been used safely for 40+ years and has never had a "Black Box" warning...

...of course I was recommending normal dosing at first onset on symptoms

Now I'm living in the sun and fresh air of Florida, exercising, taking vitamins minerals and the recommended supplements (D,Zinc,Quercetin, and Nattokinase)...I initiate daily Ivermectin now at lower dose at first onset, isolate and observe symptoms a few days (paranoia) and never go out symptomatic...now I've added gargling and nasal flushes

Shouldn't this kinda be recommended for normal behavior and limit stupid and dangerous experimental mandates...Trump passes "Right to try" experimental medication and then they forbid "off-label" use of established treatments/medications, with SEVERE punishments?

♡ LIKE (13) ◻ REPLY (2) ...

Congratulations on a valuable conference. There is strength in numbers with more and more true scientists worldwide coming forward. I heard Dr. David Martin speak and he was most impressive. WHO and other entities have hijacked the world with their demonic rhetoric and scare tactics. They are the ones who have put out misinformation; harrassing people to force them to comply with their murderous demands. There were valid treatments for CV, which were suppressed. HCQ worked like a charm for me. Yet, so many hospitals used toxic drugs, ventilators and classified many non-covid deaths as CV ... to boost their bottom line. It is disgusting to think that there are so many unethical people in the medical field and in the world, who would destroy other people for money.

Thank you, Dr Malone, for this excellent summary of the day's proceedings - and thanks to all those who presented, and to the organisers. You are the hope of the world - a world suffering in so many ways from the abuse of science, and the weaponisation of government and corporate power, that have dominated our lives for the past three years. We must all work to prevent this happening again, to restore trust in science and government, and to protect democratic liberties.

James Goodrich Writes J Goodrich News Letter May 4

Very busy day today. I listened to most of your speech Dr. Malone and couldn't help but think of my wife and her colleagues who work in a major Boston hospital operating room. These fearless heroic Nurses and Doctors that put these government and media pushed dangers to the side and showed up every day to help correct peoples physical problems. They acted as soldiers going into a war zone. Everyone has fears but true courage was shown when these hero's would show up every day to do their jobs. As the authoritative government cracked down on these big hearted hero's I watched many have tragic adverse reactions to the forced shots. The shots were much worse than the virus. 3 shots in, my wife said there are talks to force a fourth shot to all employees or be fired. I told her to quit if they won't give her an exemption. What a catastrophe the medical establishment (Fauci etc.) have placed on these good Doctors and Nurses. J.Goodrich

DD please don't include me. It was all my wife and the great people she worked with. When Dr. Malone was talking about the fear that was put out (I drove my wife every day she worked in Boston) it brought back those days of not knowing if she would get sick at work. Since, she has stayed at the same hospital but moved to a satellite in Waltham Ma..

Thank you! It sounds like a rewarding and productive time was shared by all. Missed the 3rd, my timing was evidently off. Will be looking forward to the tapings as they become available. Hope there will be a way to contribute for them. Your summary was excellent and whets ones appetite.

With no solution to the PayPal situation, contributed to this SubStack, to offer some extra travel moneys toward you folks attending. If you will be having and attending another meet in the fall, hopefully there will be options for contributions directly.

So glad this was rewarding for all!

Safe travels! Looking forward to our nexts! Very Bestest

"There 'should be' no more doubt about the cause and effect relationship between mRNA vaccines and death." Should be - cannot imagine Pharma or the Gov coming out of the closet on that one. I still question how long Moderna/Pfizer were working on the gene therapy before Covid was even released on humanity.

"...everything that we hold dear in terms of free speech and democracy and representation and the evolution of power down to the lowest level that it should be delegated to, which was a core principle upon which the European Union was founded," was a nice gesture – being in Brussels. Belgium was founded in 1830 with the most liberal constitution in Europe and Brussels became a refuge for progressives (Socialist/Communist) from Germany and other countries. Marx and Engels lived in Brussels (other countries either kicked them out or had a warrant out on them) during the years they wrote and published the Communist Manifesto as did all the important Communist League members. The last line: "Let the ruling classes tremble at a Communist revolution. The proletariat have nothing to lose but their chains. They have a world to win. Working Men of All Countries, Unite!" The EU was a masterminded scheme for nation consolidation. Power down to the lowest levels was never its objective, quite the contrary. The Great Reset is scheduled for completion exactly 200 years from the founding of Belgium.

As for the enemy's 5GW efforts, it does amaze me just how aggressively people will contort their own sense of reason and deny their own earlier convictions in order to comply with the narratives dispensed by their 5GW attackers. I'm wired in a way not to be vulnerable to that sort of thing and always thought everyone was that way. But this whole debacle has shown me just how powerful 5GW is against at least 70% of the population. Makes sense I suppose... The departments in our government that do that sort of thing get a tremendous amount of money. And nobody would give it to them unless what they do, works....

Agreed. ET is one of the best - providing the deepest dives into any reported topic, over and above all other media available today. I started ET when it reported the satellite imagery of crematorium plumes demonstrating how many deaths china endured during early covid assault pre-vax. Another land mark report was filed by Joshua when he video captured and publish screen shots of the flipped election results in key states (WI PA GA AZ MI) in 2020 pres. election between 3 a.m. and 5 a.m. the following day after the polls closed. He should have received the Pulitzer for that one and if he had, things would be much different now, but alas the press is captured and until we hold media criminally responsible, as persons, not as corps. for such mischief, such as that participation in election misconduct by not reporting what every media outlet saw to be true, we will be no closer to open free honest elections.

Vallely, what a hero. He saw right through Obama's mission to take down our Military. He has a website that lists those top brass O took out. I will check out these links. Obama was a plant just like Biden. The nation is letting both get away with murder.

♡ LIKE (4) 💬 REPLY (1) ...

jtrudel trudelgroup.com Writes jtrudel's Newsletter May 4 · *edited May 4*

Well said. Thank you. General Vallely is a good friend, my coauthor, and one of my heroes.

Paul started the first effort – Operation Jericho – to get Americans out of the January 6 Gulags, so they can get fair trials, juries of their peers, honest legal counsel, health care, so they can be subpoenaed and allowed to testify under oath to Congress.

https://open.substack.com/pub/jtrudel/p/operation-jericho-2023?r=6r9ya&utm_campaign=post&utm_medium=web

Since then, several other other groups (e.g, Trump, Ted Nugent, etc.) have launched similar efforts. Thanks to Tucker, we did get one out, the Shaman, mostly because both his lawyer and the judge who sentenced him were enraged that they had not been shown the exculpatory evidence. The Shaman is reportedly now in rehab, and recovering.

Alas, Tucker was fired, the videos are again sealed and not accessible, and Congress seems stuck.

♡ LIKE (3) 💬 REPLY (1) ...

Shelley May 4

I will check out Jericho. Speaker McCarthy did the least possible with the videos after he had to promise to release them to get his speaker's job. He stuck all sorts of restrictions on viewing them. The Shaman I understand is now suing the government for withholding exculpatory evidence. The Gateway Pundit also is keeping track of the J6ers and collects donations to pay for legal fees etc.

Big E May 5

Dear Drs. Malone, Your efforts and those of your colleagues have been heroic. "Thank you" 🙏 will never be enough to express our appreciation.

Gold 🏆 is said to be one the most malleable and ductile materials on earth. But that's wrong. That honor goes to the human mind 🧠!

The Covid era and many other events in history illustrate how easily human minds can be hammered and stretched – through fear and propaganda – beyond their ability to reason.

You have saved many minds (and bodies) through your efforts. Now the rest of us must use every trick in the book to hammer and stretch broken minds back from the brink; humanity's survival depends on it.

Good to hear about your meetings at the EU on the pandemic and the 5th generation Psy ops we we were subjected to.

I am sure the EU has some honourable individuals, but the organisation is part of the toxic globalist movement and I detect your despair in your summary.

I am currently in SW France, where drought is prominent in people's lives. The government messaging is obvious as it supports the climate change agenda.

Whilst it cannot be denied that there was little rain in the past Winter, something does not make sense.

A village well known to me always provided water to the gardens from a reservoir filled from the mountain streams. A series of sluices enabled water to be directed to gardens.

This was not working this week, so I checked the reservoir. To my surprise it was full, but the main sluice was shut preventing water distribution to the gardens.

I consulted a friend in the village, who told me the local government had banned use of this water, enforced by fines. No reason given, it was just an edict.

So a source of water desperately needed in the drought (and used for 100 years or more) has been stopped during a drought.

Meantime people are bombarded with new drought restrictions. It's almost as if the government want to make the drought as severe as possible.

That's what's happening in the EU area. They seem to prioritise the climate agenda above the welfare of citizens.
