

Proof: The FDA knew on September 17, 2021 that people who got the COVID vaccine were 2X more likely to be infected

Why didn't they warn us at the time? Instead, they remained silent. The mandates should have been the opposite: hospitals should have fired anyone who got vaccinated.

Although not independently verified by FDA, the post hoc analysis appears to indicate that the incidence of SARS-CoV-2 during the analysis period among 18,727 study participants originally randomized to BNT162b2 (mean of 9.8 months post-Dose 2 at the beginning of the analysis period) was 70.3 cases per 1,000 person-years, compared with an incidence of 51.6 cases per 1,000 person-years among 17,748 study participants originally randomized to placebo and crossed over to BNT162b2 (mean of 4.7 months post-Dose 2 at the beginning of the analysis period). An additional analysis appears to indicate that incidence of COVID-19 generally increased in each group of study participants with increasing time post-Dose 2 at the start of the analysis period. Only 3 severe COVID-19 cases were reported during the analysis period, all of which occurred among study participants originally randomized to BNT162b2.

Most people didn't read the [September 17, 2021 FDA briefing document](#) so let me highlight the top of page 22 for you. With a little simple math ([shown here](#)), it's clear that you are 2X more likely to be infected during the time you are vaccinated. The p-value is <.001. This was not just a fluke. It was validated in the Cleveland Clinic study.

Executive summary

The [Cleveland Clinic study, which I fully explain in this article](#), shows that the more vaccines you get, the more likely you are to be infected with COVID.

This was not a fluke. As I pointed out in my article, the results were consistent with three other large studies, two of which (the Qatar and Pfizer studies) were general population and not just healthcare workers.

One of the two large confirming studies was the Pfizer Phase 3 trial participants themselves.

Did you know that Pfizer told the FDA in a document dated September 17, 2021 that people who were on the vaccine for a longer period were more likely to be infected with COVID than those who spent only about half the time in the vaccinated state. The difference between the infection rates of the vaxxed vs. unvaxxed was more than 2X. [See this section of my article](#) for details on data in the FDA document and the simple calculation to determine the relative infection rates.

The bottom line is that the FDA knew on Sept 17, 2021 that you were *more* likely to be infected with COVID if you were vaccinated. That's the opposite of what they told us.

What do we do now?

We need to acknowledge our mistakes and take corrective action.

Every business who has a vaccine mandate should immediately issue a reverse mandate.

For example,

1. Hospitals should immediately fire anyone who is vaccinated with the COVID vaccine. Proof of being unvaccinated should be required to keep your job. Religious and medical exemptions should be honored so if anyone's religious beliefs **require them to be vaccinated**, those people should be accommodated. Similarly, if anyone has a medical condition requiring them to be vaccinated, they should be given an exemption.

2.

3. **Discover more from Steve Kirsch's newsletter**

4. I write about COVID vaccine safety and efficacy, corruption, censorship, mandates, masking, and early treatments. America is being misled by formerly trusted authorities.

5. Tens of thousands of paid subscribers

inated to enroll. In addition, all on. In short, if you are vaccinated, grants and attend public gatherings. e to enter the US without proof of e unvaccinated or face losing their should have their license to practice tifications and hospital privileges a danger to society because they t for their patients.

8. vaccine shall be investigated and may have their license to practice medicine revoked. After all, the COVID vaccine isn't justifiable for any patient so you must be a very bad doctor who doesn't believe in evidence-based medicine.

9. Other than as noted above, there should be no tolerance for the vaccinated. These people should have known better. They are a risk to society and prevent us from getting to herd immunity. They should be ostracized and excluded from all family events moving forward.

In short, it's time to turn the tables around.

It's time to turn the tables around and discriminate against all vaccinated people.

Summary

At this point, there is absolutely no doubt that **COVID vaccination increases your risk of infection**. Everyone who tries to attack the Cleveland Clinic study has failed. Nothing sticks.

Many of my readers have validated this effect with their own eyes and often write in comments like it's all their *vaccinated* friends getting sick with COVID. And those turbo cancers, amyloid clots, and sudden deaths are happening almost exclusively in the vaccinated (or if you got a transfusion).

[Wayne Root's statistics](#) are another great anecdote that should be impossible if the vaccines are so safe. Nobody's been able to explain his numbers. Basically, Wayne found that his vaccinated friends were dying or had severe side effects in large numbers while his unvaccinated friends were unaffected.

And where is the anti-Wayne Root anecdote where it is just the unvaxxed who are getting very sick and dying? I still can't find such an anecdote. I've tried.

Why can't I find a single anecdote of a nursing home where the all-cause death rate declined after the vaccine rolled out?

If you listened to the CDC and mainstream media, you were led to believe that the unvaccinated would all be extinct by now.

So now that nobody can attack the Cleveland Clinic data, isn't it time to right this wrong and **reverse the mandates**?

How about we now give the vaccinated a taste of their own medicine so they will understand first hand what it feels like to be unfairly penalized for doing nothing more than following the science?

Just to make sure you all got the point of the article is that the data does in fact show it was the opposite of what they thought.

Do you think they would ever implement my list had they known the true facts?

Of course not.

So by turning the tables, they can get a sense for how ridiculous their policies were.

The just thing to do, in equity, IS to reprimand and censure the vaccinated. Equity court demands it.
