The massive increase in anti-government demonstrations that have occurred in the past few months can no longer be considered a legitimate exercise of the democratic right to protest. Credit: Tomer Neuberg/Flash90

The Real Agenda of the Judicial Reform Opponents in Israel Exposed as Fascist Terror Continues

Edited by: Fern Sidman

As Israel finds itself in the grip of turmoil and stark division between those forces who stridently oppose judicial reform measures being taken by the Netanyahu government in Israel and those who wish to preserve true democratic principles by not allowing the country's supreme court to hold an inordinate amount of power, it is time to examine the agenda of those who have been taking to the streets in Israel in their aim to overthrow the current government.

Underneath the veneer of purportedly attempting to preserve the court's inherent infrastructure, the real battle ensuing in Israel is being conducted by the old guard, secular, left wing radical "progressives" against their most hated enemy, the up and coming religious, right wing, pro-nationalistic camp in Israel.

began and it is of paramount importance to understand the history of their political aims as they continue to encourage fascist terror in the streets.

Those who erroneously claim that they are in staunch opposition to judicial reform are exactly the same people who, in the past said that the ill fated Oslo Accords would bring peace to Israel and the entire Middle East. If anything, it created even more terror attacks targeting Israel.

These are the same people who promised that following the 2005 disengagement of the area now known as Gaza, where at one time over 10,000 Israelis lived in thriving communities, there would be no missiles on Ashkelon. Clearly, that hypothesis has proven false as Gaza is used as a launching pad for rocket attacks on Israel by Hamas as well as a staging ground for which to build terror tunnels into Israel to cause death and destruction among Israel's civilian population.

These are also the same people who territorial assests and a substantive gas supply to the Hezbollah terrorist organization and said by doing so the rate of terror committed by them against Israel would decrease. Moreover, these same people stood in opposition to the elimination of the tunnels from Lebanon.

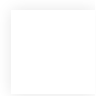

These are the same people who predicted that the Middle East would collapse if the US moved the embassy to Jerusalem and who showed their unflinching support for the disastrous nuclear agreement with Iran that was initiated by former President Barack Obama.

We should also be reminded that these are the people who said that Netanyahu's files are cast in concrete and they are the ones who stated that the Pegasus was only applied to one person.

They also opposed the economic plan that Netanyahu brought as finance minister, which raised Israel's GDP per capita above that of Germany.

They also opposed the construction of Route 6 in Israel and they opposed the train to Jerusalem.

In their quest to show support for Israel's enemies, these people are the ones who voted against canceling social security payments to terrorists who are bent on Israel's destruction.

And while we're on that note, these people have the dubious distinction of opposing the construction of a fence against infiltrators into Israel on the Egyptian border and they opposed all the laws that would have encouraged infiltrators to return home.

-Interestingly enough, these people are the ones who strongly favored the importation of refugees from Syria into Israel and they are leading the charge to import non-Jewish refugees from Ukraine to Israel.
