Most of the readers here probably wouldn't consider having their children vaccinated. However, if you're contemplating the idea or know someone who is, it's important for you to know what the CDC has recently admitted to. This knowledge will help you or loved one make an informed decision, because there are red flags flying everywhere.

As you're likely aware, the government is preparing for another round of COVID vaccine campaigns. Interestingly, they're now promoting a new vaccine, as the previous 17 they rolled out (a slight exaggeration) haven't worked, to be totally honest. Not sure why this next batch will "suddenly" work, but that's what they want you to believe.

NY Governor Kathy Hochul “Tell everybody don’t rely on the fact that you had a vaccine in the past, it will not help you this time around.”

And last time around it didn't keep you from getting, or spreading it contrary to what we were told repeatedly.

Woke Fairytale
~~Once upon a time,
there was a boy who
wanted to be a girl.~~

Now, this is the point where things become quite dicey and rather alarming, particularly for teenagers who face minimal COVID risk factors to begin with. COVID expert Alex Berenson revealed this highly important nugget of information in a post on X, and it's crucial for every parent to pay very close attention.

Here's what Alex [said](#):

Again, from [@CDCgov](#)'s OWN data: 1 million mRNA Covid shots for teens will prevent 0-1 Covid deaths and CAUSE 100,000-200,000 severe side effects. Yes, you read that right.

The math: Moderna trial teen subjects had a 25% risk of Grade 3/4 adverse events if they received the shot, 5% for placebo. For Pfizer, the rates were about 11% and 2% (Pfizer is a lower dose; why the placebo rates were different IDK.) That's a gap of 0.09 to 0.2, x1MM shots

Alex Berenson 

@AlexBerenson · [Follow](#)

Again, from [@CDCgov](#)'s OWN data:

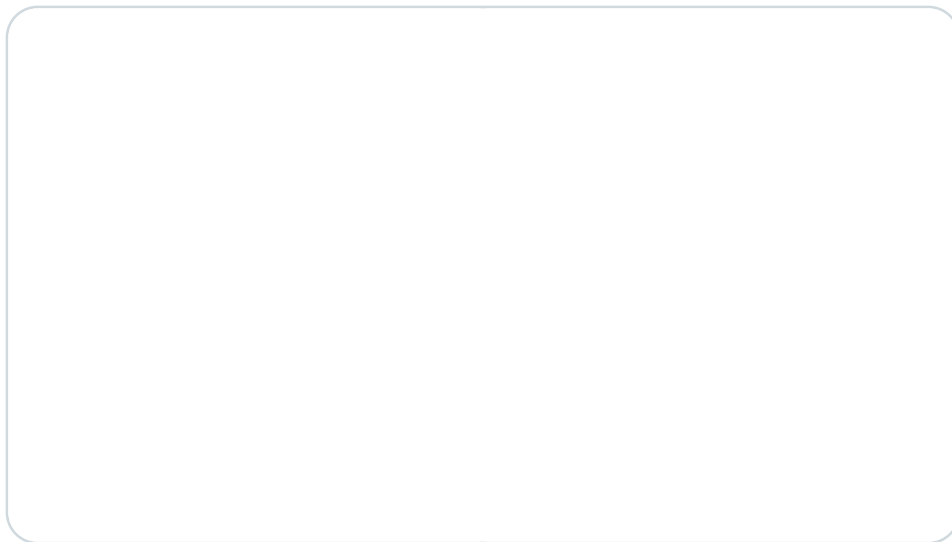

1 million mRNA Covid shots for teens
will prevent

0-1 Covid deaths

and CAUSE

100,000-200,000 severe side effects.

Yes, you read that right.

Here's a closeup of the images Alex shared:

Estimated COVID-19 hospitalizations prevented vs. potential myocarditis cases for every million mRNA COVID-19 vaccine doses: 12 – 17-year-olds¹

Per million doses in 12 – 17-year-olds over 6 months²

19 – 95 hospitalizations prevented

5 – 19 ICU admissions prevented

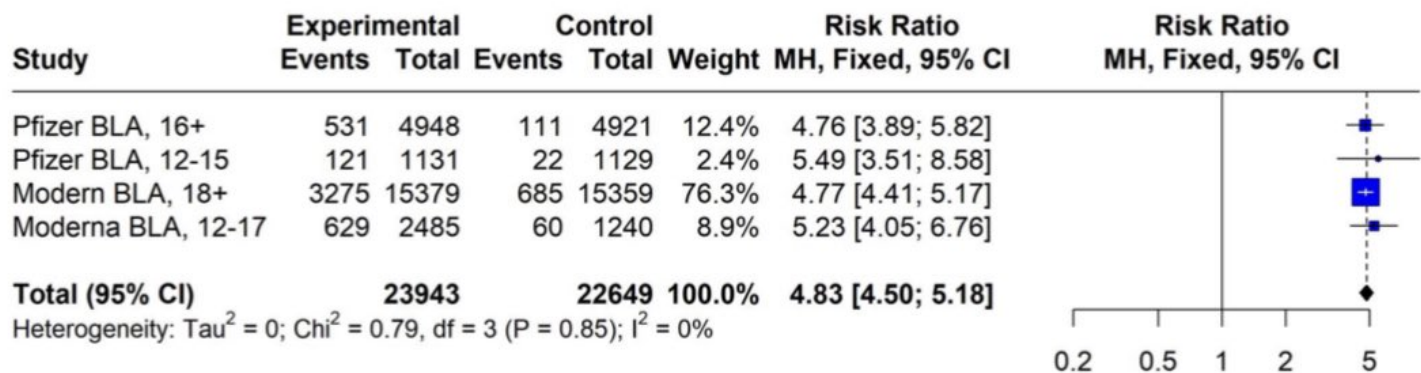

0 – 1 death prevented

cdc.gov

Reactogenicity*, Severe (Grade ≥ 3), Adults and Adolescents (n=4)

*Reactogenicity data are from the original monovalent Moderna and Pfizer randomized controlled trials

BLA: Biologics License Application

That's a very startling revelation, and the numbers are jaw dropping. We genuinely hope that parents grasp the gravity of this situation and take the time to gather more information.

Speaking of learning more, there's another significant piece of information to share. A recent study also has some very dire news for males who have received their full booster shots. According to the study, they may have effectively reduced their lifespan by a staggering 24 years.

[Slay:](#)

An explosive new study has revealed that American men who have been “fully boosted” with Covid shots will suffer a staggering 24-year loss in their life expectancy.

Researchers have analyzed the official data from the U.S. Centers for Disease Control and Prevention (CDC) and the UK government to determine the long-term effects of mRNA injections.

The study sought to weigh the balance of risk for the vaccines by establishing how long the negative side effects take to reduce over time after a person receives each dose.

However, the researchers found that the damage doesn't lessen over time and, instead, it remains indefinitely, increasing with each shot.

The CDC All-Cause Mortality data has shown that each vaccine dose increased mortality by seven percent in the year 2022 compared to the same figures for 2021.

The data revealed that each year, every vaccinated person becomes more and more likely to die at a rate of seven percent per dose, per year.

This means that the mRNA vaccines and booster shots are a “slow-acting genetic poison,” according to the study.

The study also found that the human body cannot recover from any amount of mRNA injections.

So taking 2021 as the baseline, a person who received five doses would be 350% more likely to die in 2031, 700% more likely to die in 2041, and 1050% more likely to die in 2051 than an unvaxxed person.

The image shows a promotional graphic for a book by Bill O'Reilly. On the left is the book cover, which features the title 'TOP 5 WAYS TO PREPARE FOR A RECESSION' and a large gold dollar sign over an American flag. On the right is a photograph of Bill O'Reilly, a man in a dark suit and blue tie, pointing his right index finger. Below the book and photo is a green button with the text 'GET YOUR FREE GUIDE' in white capital letters.

Before you make any decisions regarding vaccination, it's smart to take a moment, let things settle, and thoroughly go over the constant stream of new data that's coming out. Also, please remember that unless your child has an underlying health condition or another factor that places them at high risk, COVID is essentially no more severe than a common cold for healthy teenagers.

We know from scientific studies and observation, the gene therapy "vaccine" kills more than it saves.

Dilemma:

So if one knows a parent that intends to commit attempted murder of their child, what is one to do?

Can't fix stupid or ignorance! If one chooses not to

research and find the Truth themselves...even after its been shared with them...then they have chosen bilssful ignorance that will not end in bliss!

A trial was done in France by scientists from different parts of the world. They found that 84% of the jabbed were omitting numerous Mac Addresses. Which means people were injected with a Computer Operating System. That's what this whole Jab thing is about. Connecting our bodies to the Web.

"emitting"? Usually not a spelling officer, but this one is meaning-altering

Serious and VERY good question! I was standing in line at my pharmacy to pick up some medication's and I saw this woman marching her two children probably ages two and four up to the vaccination station... I wanted to scream out don't do that you will kill your children, but I took the cowardly way out and STFU... I am embarrassed to relate this.

Can it be characterized as "attempted murder" on the parent's part -- stoked, encouraged, and misled by the state as he is, and irresponsibly ignorant as he may have allowed himself to remain -- if he thinks in his misled and ignorant good faith that he's genuinely **helping** his child? Is it not rather a particularly vicious murder by hapless

The state is at the very least an accessory to the murder.

Yes, BB, I would say the hapless **parent** is the accessory -- even if his ignorance is borderline inexcusable -- but the depopulationist, genocidal **state** is the far guiltier party.

willful ignorance not an excuse. the info is widely available. at best, if the kid dies, it's state sanctioned negligent homicide.

I don't suggest that this kind of ignorance was willful. Some people just don't have the mental capacity to see through the blown smoke. The widely available info you refer to -- which should lead to shrewdness and wisdom and suspicion -- seems to be selectively filtered or pushed out of their minds by the overwhelming noise

We....can not actually wake someone else up. They themselves have to wake up. And that means they have to experience something that shocks them into doing so. Hopefully that's not their own death!

True, and often
stated: A
conservative is often
just a liberal who's
been mugged.

A "mugging" can take
many different forms,
and the death of a
Democrat may well
be one of them--
natural selection will
not be denied it's
place in evolution.
The most
unfortunate part is
that to a certain
extent they drag us

I agree! Thus....this is
really not our Home.
We are only
experiencing this for
the knowing we need
of what not to
embrace and retain.

None of this goes with us and where we go...really is..our Home. All this shall come to pass as all form does.

Did you know Contagiøn has never been scientifically proven? But it has been disproven during the so called Spanish Flù that was also caused through

vaccines? The U.S Army ran trials to prove the Virus spread from one person to another and ended up proven the opposite. These trials can be found in book 'The Invisible Rainbow'. Everything we've been told is a lie. Coincidentally the Aids Virus just like CONVID was never isolated and purified using the Gold standard either.

The unmitigated gall of this comparative handful of self inflated misfits who think they have the right to do this to the rest of humanity. They are no better than the Nuremberg criminals and should suffer the same fate. Each and every one of them. It should be the goal of the people to make that happen.

It's certainly my goal -- after they are duly and legally indicted, tried, and convicted -- to live to see them swing from lampposts. The USA has a lot of lampposts.

Partly, I think,

It is like a cult mass suicide.

The demi-gods and priests
from medical ABCs,
physicians clubs, elected
offices, and media visages, all
support drinking the koolaid.

Who wants to keep living in a
world where it's wrong to
believe in TV personalities and
in the government?

They must think that the
comet of compliance will
beam them up.
