The Summer of Love 2024 has already started. And who is funding this street violence? Very likely your state cannabis program.

Although legal at the state level under multiple laws, these state cannabis programs are cash heavy operations because of the disconnect between state and federal laws on the use of this drug. The cash can't be inserted into banks because of federal laws, so it stays cash and organized crime and now crime overseers such as Chinese paramilitaries gravitate toward cash operations because of the wonderful laundering opportunities. Abortion is also a cash heavy - but we'll talk about that later.

First things first - state sponsored cannabis programs are a pox and a cancer on American society. The libertarians fight and argue on this topic - but this is not the “Fast Times at Ridgemont High” pot from the 80s. The modern cannabis cannot be disassociated with the Fentanyl pesticide being strewn on our streets to cause death and destruction.

Want to know who is funding the sudden appearance of Hamas supporters and their street violence? Very likely the state cannabis programs, where Chinese paramilitaries are muscling their way in - and often now conducting the operations totally outside of state government regulatory oversight. The Hamas advocates are indistinguishable and often the exact same people as the BLM, Antifa, Transgender, Groomer, Squatter, Public School Teacher, and grievance of the day useful idiots for the

Chinese Communist Party (Andy Ngo has documented this multi-personality grievance cult very well).

When Stephen Gregory was alive and Senior Editor of the Epoch Times, we had different viewpoints on the funding levels and sources for the street mobbery of the 2020 Summer of Love.

His number for the street violence was \$10m of walking around money from the CCP. My model showed closer to \$100M of CCP walking around money, largely from casinos in Vancouver, BC and then in Indian gambling establishments along the I-5 corridor south to Seattle, Portland, San Francisco, and Los Angeles. The going rate in Portland was \$250 a night for the Antifers. Do a little math on the number of protesters x number of nights x number of cities and \$100M was far more realistic.

Even for the CCP \$100M is a lot - it may have helped steal the the 2020 election, but the CCP is now very tight on liquidity. This time the CCP is getting the walking around money for street violence straight from the American People through this fraud and canard of state sponsored cannabis.
