*The Right Way* is the #1 conservative blog on Substack — recommended by over 241 other Substack authors!

On April 6th of 2020, I posted a Tweet thread about Bill Gates and the COVID-19 virus that went viral — it was viewed by millions of people around the world — and it became the subject of fake “fact-checking” in various corporate media outlets.

As most of you already know, I was de-platformed from Twitter in late 2021 for warning people about the undisclosed ingredients in the COVID vaccines. When Elon Musk restored my account in his general amnesty in late 2022, I noticed that my Tweet thread on Bill Gates had been completely stripped of its viewership numbers!

Here's the original thread.

The more you study this virus, the more you find the same name: Bill Gates.

He's the 2nd largest funder of WHO.

He's building 7 vaccine labs.

Fauci. Tedros. Event 201. ID2020.

He basically controls global health policy.

What's the plan? Using vaccines to track people.

In 2017, Gates's sway over the WHO was so obvious that even liberals were worried.

Politico said even "...academics have coined a term for his sway in global health: the Bill Chill. Few people dare to openly criticize what he does."

Bill Gates is very interested in one area of medicine: vaccines.

Why? Because govts can mandate that people get them. And if vaccines include microchips then you have worldwide surveillance.

This explains his interest in quantum-dot tattoos.

Most people are not aware such nanotechnology exists.

What's a quantum dot-tattoo? It's a tag that comes with your vaccine shot. It embeds "just under the skin, where they become something like a bar-code tattoo."

It's invisible & tracked by smartphone.

While Gates has used his foundation to take control of the WHO, his company Microsoft has suddenly launched a worldwide "digital identity" campaign: [#ID2020](#)

The program: leverage immunization as an opportunity to establish digital identity worldwide.

Sinister, isn't it?

Bill Gates is Exhibit A in the dangers of billionaire "philanthropy."

No government authorized him to roll out a global system for tracking people by nanotech vaccines.

He just bought off relevant orgs & did it.

It's not just incompatible with democracy.

It's the end of it.

To summarize: I told you exactly what Bill Gates was doing with “quantum-dot tattoos” and “nano-technology” in early 2020 — he was introducing [a global digital ID system using vaccines as a pretext](#).

I was branded as a lunatic for stating this obvious truth.

Four years later, [Bill Gates announces at Davos](#) that *he’s going to do exactly what I told you*.

Who was right — and who was wrong?

## **I Need Your Help!**

In 2020, I was the first reporter to tell you that Dr. Fauci funded the Wuhan Lab.

In 2021, I was banned from Twitter because I warned you about the dangerous COVID “vaccines.”

In 2022, left-wing hate groups targeted me in *Washington Post* articles as a “conspiracy theorist” to keep me banned on social media forever.

In 2023, the voting machine companies Smartmatic and Dominion want to *search through my emails and telephone records* .

It’s very expensive to prepare for litigation, and discovery, in these massive lawsuits brought by the voting machine companies. (Fox News paid out almost \$800 million just last year.) They try to bankrupt and silence conservative journalists by dragging them through court proceedings for years.

Independent and fearless journalists need your support *like never before*.

*I need your support like never before.*

If we are going [to survive the current regime](#) then we must stand together.

I’ve got your back. Do you have mine?

Sometimes I do believe the Lord works in serendipitous ways. When I heard that the "vaccine" was actually a modifying RNA injection, I knew right away that it would change the DNA of a person injected. I taught life science (biology) to 7th graders and we spent a whole lot of time examining cells, both human and plant and how they work. I knew instantly that this injection was genetic therapy and had nothing to do with a vaccine. Then I began my research. Since I'm retired I had plenty of time to peruse the Internet, and peruse I did. I was shadowbanned on Twitter, kicked off of LinkedIn and found Gab. Every platform or blog where I could sign up and make a comment I shared my research. I tried warning everyone, especially my family and friends, and sometimes to no avail.

There is going to have to be a reckoning of the damage and death that has been done. It will need to be brutal to discourage another attempt by the maniacs wanting to rule the world.
