What's becoming increasingly evident is that a network of NGOs funded partly by the US taxpayer but by other countries and corporations are covertly facilitating the invasion of illegals at the US southern border, as well as distributing them across the US into progressive metro areas.

According to an August report by progressive left-leaning media watchdog organization [Fairness & Accuracy In Reporting](#), President Biden's Department of Homeland Security allocated \$363 million to NGOs to assist illegal aliens once in the US.

Texas Governor Greg Abbott released a press release one year ago detailing how "NGOs may be engaged in unlawfully orchestrating other border crossings through activities on both sides of the border, including in sectors other than El Paso."

Once across the border, NGOs are also [helping migrants with transportation across the US](#), such as providing seats on commercial airlines.

Just ran into a group of African migrants from Guinea heading to New York City. They had documents from "Catholic Community Services of Southern Arizona Inc" Im seeing migrants ALL over the place here at the airport this is insane.

"A lot of NGOs are helping Biden open the border to unlimited illegal crossing. But none of this could happen without the president's approval," Byron York, the chief political correspondent at the Washington Examiner, said.
