That same day, British sports journalist Mike Dickson died suddenly at the age of 59. The cause of death was conspicuous by its absence in the obituaries — but the man collapsed and died without warning at the Australian Open.

Mike Dickson, the Daily Mail's legendary tennis correspondent, has tragically died at the age of 59.

Dickson was a hugely respected and admired journalist who spent 38 years in the industry - 33 at the Mail having started in 1990 - and his loss will be felt deeply by colleagues.

He previously worked as the Mail's cricket correspondent before moving over to tennis and covered 30 different sports across nearly 50 countries in total during a rich career.

Former NFL linebacker Ronald Powell has died at the age of 32.

Powell was drafted by the [New Orleans Saints](#) in the fifth round of the 2014 draft and played 14 times for them during his rookie season.

He also had brief spells with the [Tampa Bay Buccaneers](#), [Seattle Seahawks](#) and [Chicago Bears](#) but never played in the NFL again after leaving New Orleans.

There's a kind of perverse silence running through these obituaries in our newspapers now. You're told now that *it's impolite to inquire about the cause of death*. You simply need to accept that sudden cardiac arrest can strike down healthy athletes in the prime of youth.

They've forced us to translate what their headlines mean to glean the truth:

"Died suddenly" = killed by the vaccine

"Sudden heart attack" = killed by the vaccine

"After a brief illness" = killed by the vaccine

"Died unexpectedly" = killed by the vaccine

"No cause of death was listed" = killed by the vaccine

I made the mistake of typing the phrase "football player dies" into Google as I looked for more information on Ronald Powell's death and so I got these sickening results.

Brace yourself.

12 year old football player dies: Vaccine fears surface in ...

Feb 18, 2023 — Netizens reacts to COVID-19 vaccine fears in connection to 12 year old Elijah Jordan Brown Garcia's **sudden death**.

Look at the dates. Look at the ages.

Boys who were 12 years old.

Boys who were 15 years old.

I couldn't read the headlines all the way through. I could almost hear the sobbing of their stricken families rising from the words like a howling wind. I could see the funerals —the frozen ground in winter being freshly dug up for the new graves.

I could see the mothers driven almost insane by grief in their black clothes.

There seemed to be one word being chanted everywhere: *death*.

Death. Death. Death. Death. Death.

Today we take a moment to remember our colleague Tim Hahn. He was an inspirational leader who spent over 12 years at Novavax making an impact in so many of our lives and areas of work. He led and supported efforts across our pipeline including RSV, NanoFlu, Matrix-M and [most recently the COVID-19/seasonal influenza vaccine](#).

We celebrate Tim's never-ending generosity and sense of humor; a great scientist, people leader, friend, husband, and father. We honor his memory.

And the chanting is only getting louder.

There's no way serious adverse effects are limited to only 1 in 800 *per shot*. There's no way that the death toll from the "vaccines" will be only 17 million — that's *far too low*.

Why? Because 17 millions *doesn't move the needle* for the depopulation cultists. That's a *rounding error* in terms of global population rates. That's why the vaccines are [contaminated with plasmid](#)

[DNA](#). That's why no government on earth will allow public access to the vaccine and mortality data. That's why New Zealand is busy *prosecuting its own vaccine data administrator* for [leaking the data](#) showing that COVID vaccines *increase the risk of myocarditis by over 25X*.

Our corrupt elites, you see, are *much more ambitious* and *much more evil* than you can possibly imagine.

Dr. Michael Yeadon recently tried to describe the scale of their crimes against humanity.

The phrases you should remember: *multiple deliberate toxicities. Never could be safe. You would never pick the spike protein. Black swan event.*

Dr. Mike Yeadon tried to warn you. Dr. Luc Montagnier tried to warn you. Dr. Zev Zelenko tried to warn you. Dr. Robert Malone tired to warn you. Dr. Peter McCullough tried to warn you. Dr.

Geert Vanden Bossche tried to warn you.

In 2020, I was the first reporter to tell you that Dr. Fauci funded the Wuhan Lab.

In 2021, I was banned from Twitter because I warned you about the dangerous COVID “vaccines.”

In 2022, left-wing hate groups targeted me in *Washington Post* articles as a “conspiracy theorist” to keep me banned on social media forever.

In 2023, the voting machine companies Smartmatic and Dominion want to *search through my emails and telephone records*.

It’s very expensive to prepare for litigation, and discovery, in these massive lawsuits brought by the voting machine companies. (Fox News paid out almost \$800 million just last year.) They try to bankrupt and silence conservative journalists by dragging them through court proceedings for years.

Independent and fearless journalists need your support *like never before*.

I need your support like never before.

If we are going [to survive the current regime](#) then we must stand together.

I’ve got your back. Do you have mine?

Keep your memory files strong. THEY count on short dull minds. With all the shocking that has transpired in the last 5, 10, or 15 years, how many bits and pieces can you bring up and cite? This is a healthy (mind, body, soul) exercise. Fear not that you will run out of brain cells. Plant truth where you can. Read / Study!
