The 2020 Presidential Election is, to this day, one of the most controversial topics on social media. Simply questioning its legitimacy can get you banned from many of the most popular platforms. Thankfully, there are platforms like Truth Social, and now X, that are allowing discussions and discourse to take place.

The Gateway Pundit has been on top of election discrepancies, anomalies, and disinformation leading up to the 2020 Election and has continued to be a leader in bringing you the most recent stories from continuing investigations and research.

Donald J. Trump ✓

Page One: SUMMARY OF ELECTION FRAUD IN THE 2020 PRESIDENTIAL ELECTION IN THE SWING STATES: I am pleased to share a Report that is fully verified, most of the information was gotten from Government Sources, Tapes, and other Public Records, and compiled by the most highly qualified Election Experts in the Country. These numbers are determinative and, in all cases, are hundreds of thousands of Votes per Swing State more than I needed to WIN that State. If the Republican Senate does not step forward and address this ATROCITY, it will happen again, and be virtually impossible for Republicans to WIN ELECTIONS in the future. Recently, President Trump Truth'd out an anonymous report titled "Summary of Election Fraud in the 2020 Presidential Election in the Swing States." The 32-page report includes separate sections for Georgia, Wisconsin, Pennsylvania, Michigan, and Arizona. The source is anonymous, as they should be, for now, but all the information is cited, and most is now in the public square.

Remaining anonymous could potentially thwart opportunities to use law enforcement to investigate the investigator and prevent Mockingbird Media from engaging in ad hominem attacks on individuals rather than information.

The report starts out with a bold statement that, according to polling, more than half the country now believes to be true:

*"It has often been repeated there is "no evidence" of fraud in the 2020 Election. In actuality, there is no evidence Joe Biden won."*

## "SUMMARY OF ELECTION FRAUD IN THE 2020 PRESIDENTIAL ELECTION IN THE SWING STATES

These numbers are determinative and, in all cases, are hundreds of thousands of Votes per Swing State more than I needed to WIN that State. If the Republican Senate does...<https://t.co/aQtzcFLdQj> [pic.twitter.com/krkLJsPctI](https://pic.twitter.com/krkLJsPctI)

Here are the highlights from the [report](#) for each swing state (the entire report will be shown below to read):

### Georgia

---

- Fulton County, Georgia, the most populous county in the state, has **no digital record** of all in person votes cast in its original results.
- Not a single ballot purportedly cast during early in-person voting was witnessed to and signed off by poll managers, as required by Georgia election rules. **Seals were broken** and **memory cards removed** from tabulators for the results of these 315,000 votes, which were **printed out on different machines than the ones that tabulated them**
- The ballot images of these votes, along with the rest of in-person ballots cast on Election Day, were **destroyed**
- Fulton County did not count the same ballots during the original count and the machine recount. There are **19,541 distinct ballots that appear in one machine count but not the other**
- Thousands of fraudulent "presidential only" ballots were injected into the second machine count, with huge margins favoring Joe Biden. Ballots that are blank except for the presidential contest were counted in batches together, with the pattern appearing in at least eight counties, including Fulton
- **Eighty-eight percent** of Fulton County's precincts reported a **different total number of votes between the first and second machine count**
- **376,863 ballot images are missing** from the first machine count, which includes all in-person votes in Fulton County
- 235,000 absentee ballots were requested and accepted too early, prior to the lawful date 180 days before the 2020 Election, which was May 6, 2020. These votes should have never been counted in the 2020 Election

- Fulton County certified 59,143 in-person votes on Election Day, despite the fact that only 14,152 people had voted as of 5 p.m. on Nov. 3, 2020. Evidence suggests the in-person vote total on Election Day was inflated by approximately 37,000 votes, as records show no rush to the polls during the final two hours of voting, and a screenshot of the in-person Election Day results shared by a government contractor showed only 21,843 people voted at the polls in Fulton County on Nov. 3
- There were over 364,000 ineligible voter registrations on the rolls during the 2020 Election and likely **67,284 votes were cast from voters with invalid residency**
- 59,000 of the 79,460 drop box ballots in Fulton County were not immediately transported to the election registrar, in violation of State Election Board rules
- An estimated **355,000 ballot transfer forms** for drop box ballots are **missing** statewide
- The presence of a “**QR code mismatch**” error within the Dominion tabulators that systematically undercounts votes was found in **65 out of 67 Georgia counties** where records were available.
- The election results in Georgia in 2020 are not only unreliable, but were electronically altered, and are unsupported by the state’s own election records. The appearance of tens of thousands of unconfirmed ballots in subsequent hand and machine counts suggest reconciliation happened after the Election, meaning after it was clear what margins were needed to win

Next, we will highlight Wisconsin and Pennsylvania.
