3 days ago · The Great Wakeup

COVID-19 was our wakeup call.

Blatant tyranny on a massive scale, it showed us we must stand together and resist. But the real medical emergency never went away. And I am not talking about a virus from China.

No. I mean the WHO's power grab in the form of a new Pandemic Treaty.

For the past few weeks, I've interviewed brave whistleblower [Dr. Meryl Nass](#) on this vital subject. [Part I](#) explained the threat. In [Part II](#), she described how it will harm your life. In [Part III](#), we discuss solutions.

Now for the good news.

The globalists have overstepped. They thought they could get away with tightening a legal noose around our necks before anyone would be the wiser.

They were wrong.

Despite these threats we needn't fear the future. Ralph Waldo Emerson once said, "This time, like all times, is a very good one, if we but know what to do with it."

I see a better future dawning: one based on our potential to *thrive*—not just *survive*—as humans. The time is now to wake up to centralized technofascism, to ignite a movement toward freedom-minded tech.

Together, let's reclaim our liberty, humanity's birthright—the sweetest treasure we've ever known. Learn how by reading my new coauthored book: [Neuromined: Triumphant over Technological Tyranny](#) or visiting [The Great Wakeup](#).

How to Stop the WHO Pandemic Treaty

Part III of Our Interview with Whistleblower Dr. Meryl Nass.

The Great Wakeup

Listed in Who's Who in America and Who's Who in the World, Dr. Meryl Nass has consulted for the World Bank, the Government Accountability Office, and the US Director of National Intelligence on the prevention, investigation, and mitigation of chemical/biological warfare and pandemics.

Dr. Nass works for Children's Health Defense, and helped edit three of Robert F. Kennedy, Jr.'s books. She's given six testimonies to Congress and has spoken to state legislatures on

bioterrorism, Gulf War syndrome, and vaccine mandates. Dr. Nass founded Door to Freedom to fight the WHO's sovereignty grab and the Great Reset.

Q: In **Part I of our interview, you explained the WHO Pandemic Treaty. In **Part II**, you described its many dangers. Now that we know what's at stake, can you please tell us what we can do to stop it?**

A: The number one thing we must do is get the information out there. If the WHO gets its way, it will silence us. We will not be able to push back in the (limited) way we did with the COVID-19 pandemic. Therefore, the time is now to act. While we still can, we must wake up the public. We must spread the word that this is real and it's happening now.

Q: Speaking of COVID-19, what did we learn from that "pandemic" related to the WHO's Treaty?

A: Most of all, we learned we must stand together and resist. We also observed through so much data that masks didn't work. Masks provide theatre. They were not useful for stopping disease transmission of COVID. They *were* useful for ideological subversion. That's just a fancy way of saying we were all like frogs in the pot being boiled slowly. Most everyone was afraid to speak up on these matters. Naturally, power-seeking authorities took advantage of such fear, thereby gaining mass control. Again, masks and now the widely debunked idea of "social distancing" were methods of indoctrination and keeping us apart from each other. All this tyranny normalized mass social-compliance and made it much harder to share information.

Q: In light of that recent tragedy, what would you recommend we do now?

A: See virtue signaling for what it is. Point it out to people. Speak up. Don't stay silent. If you don't do it now, you won't have a chance later. In terms of laws, we must revoke the Patriot Act, the PREP Act, the Model State Emergency Health Powers Act, and other such emergency legislation enacted after 9/11. We must remove the ability for governments to exercise dictatorial powers once and for all.

The Great Wakeup is a reader-supported publication. To receive new posts and support my work, consider becoming a free or paid subscriber.

Q: Can you explain what you mean?

A: After September 11, 2001, most states created emergency laws giving the government profound control when there was a declaration of an emergency, especially medical emergencies. One is called the **Emergency Health Powers Act**. It allows the governor to **shut down** your restaurant, for example, or impose penalties if you don't comply. Likewise, it's possible to seize your property, or disallow your right to bear arms, etc. Soon we will have medical tyranny because the globalists decided that fear of a deadly pandemic is the easiest way to gain control of people—unless we stop them. Again, we must revoke the laws that give our officials dictatorial powers.

Q: Imagine you're talking to a regular, suburban individual. What can I personally do?

A: Do you have a farm?

Q: No. I live in the city. What do people like me do the next time the government imposes such harsh restrictions?

A: With the draft WHO health regulations, you might not be allowed into a grocery store without your vaccine passport. And, mind you, other places in the world already have **facial recognition**, like in Amsterdam, Japan, etc. It isn't just China; it's in use in 98 countries already.

Bottom line: You need to know how to sustain your family. My advice is to learn to grow your own food if you can. Also, support local farmers. *Network*. Build friendships with your neighbors and community. You will need such connections if the WHO is successful.

Q: What else?

A: Be aware of this: if you don't comply, your children may not be allowed to go to good schools due to a poor social credit score, just like in China. That's even if you can afford to pay for private schooling. Similar to China, those who resist may discover that without the right social credit score, they can't get on a bus, or a plane, or a train. You may lose your job. People must understand this is a *great reset*. Globalist elites are trying to control us. And it's not just health, either. They've *been* changing the education

system, the policing system, the legal system. They are going after our ability to defend and feed ourselves. All our systems are under attack. We need to be ready with contingency plans that bear this reality in mind.

Q: Is this going to look the same for everybody?

A: No. Everybody must figure this out for their own family. You cannot look to your government to help you. People are moving out to the country. People are learning to grow food. We need to work with our communities and agree not to comply. Let's show the globalists we're not going to make this easy for them.

Q: What is happening legislatively?

A: The National Defense Authorization Act (NDAA) of 2023, passed 14 months ago, and other bills have spent many billions of dollars on the Global Biosecurity agenda. This requires that the United States follow the WHO's agenda for biosecurity, and it requires us also to follow the *One Health Program*, which we've discussed.

Q: Again, what can we do about this?

A: First, at the state level, you can talk to your legislators and your friends, and say, "Look, let's get these emergency laws that were passed after 9/11 revoked!" Even more importantly, health is a state authority in the United States. The Constitution reserves the regulation of healthcare to the states. It's not in the Constitution as a federal power. So your governor, your attorney general, or your legislature all have the power to say, "We're not going along with the WHO,"—according to the Constitution.

At the federal level, send an email, make a phone call, or best yet, send a physical letter or fax, and say you want us to opt out. We've got 54 members of Congress who-co-sponsored a bill to leave the WHO and defund it. In fact, the House passed the foreign operations funding bill in September with zero funding for the WHO. But it has not been considered by the Senate, and the President is very unlikely to sign it.

Q: This is quite frightening. Do you still have hope?

A: Yes. The globalists, making use of the WHO to pull off a coup, have overstepped. They thought that by control of information (the MSM) they could get away with tightening a legal noose around our necks before anyone would be the wiser. They were wrong. They bit off more than they could chew. The rise of populism in Europe, the farmer protests in 15 countries, the realization that there is an attempt to destroy the normal food supply and feed us insects have awakened millions of people who won't go along.

The only way the WHO could pull this off is if the people did not know what was happening. Well, now we know. And we say NO. Even if the WHO passes its new treaty and new regulations, the people, acting together, can say no—and who is going to stop us? Do our police and army want more untested, liability-free vaccines required of them? I don't think so.

Q: Any last thoughts?

A: Get involved. Grassroots work. Here's one example: I started an organization called [Door to Freedom](#). It's a 501(c)(3), We're going to lose our free speech if we don't do something, but together we can take this down. We must.

Here's what seems to be unfolding to me. There's this game going on; maybe you see it as a battle or even a struggle. But there are two opposing forces that are at war:

In one corner is team humanity - people like you and me from every walk of life and every imaginable place. We care about our children and their children and we want to see prosperity for ourselves and all who are open to attaining it. We love our home planet just

like we love our local community. And most of all we love freedom and truth, gifts we recognize coming from the force of creation that is behind it all starting with our very own breath.

And in the other corner we find team psychopath. It's a relatively small bunch of creepy greedy people who lack any degree of empathy respect or integrity. All they have going for them is their trickery and their ability to rig the entire system in their favor. But as Dr Nass has stated, they are falling down mainly because they can no longer keep their agenda of domination a secret. Every day more and more of us are seeing them for what they are - the lowest form of human being who should never again be trusted or followed.

So how can we win? As far as I can see the best thing we can do is explore what we have and are both individually and as a team. And the more we manifest that divine spark that pushes us forward the more attractive we become to all the simple and oftentimes lost souls who are looking for hope and guidance. Is it going to be easy? Who knows but we really have no choice if we don't want the bizarre and demented world our failed rulers have their sights set upon. I'll see you on the battlefield and salute you for your courage. 🎆
