

Could The Clot Shots Unleash Prion Disease?

According to Dr. Luc Montagnier: the spike protein is also a prion.

How did Yale University [start a study on what was the best messaging for COVID-19 vaccine compliance in July 2020?](#)

That's *before* the vaccine was available.

How was there [already a spreadsheet of SARS-CoV candidate vaccines on January 28, 2020?](#)

The answer is simple: because the COVID pandemic is a *pre-planned exercise*.

You know this because Dr. David Martin has told you that [we've been engineering the coronavirus for 56 years and we weaponized it in 2005.](#)

You know this because four patent applications filed by Moderna were modified *to include the term "accidental or intentional release of a respiratory pathogen" in 2019* to justify making a "vaccine" for something that did not exist.

You know this because MP Andrew Bridgen (in the United Kingdom) said in a video that he was told by a senior minister of the UK Parliament: "You can speak out all you want. It doesn't matter. You are vaccinated. You will be dead of cancer soon."

 **The Resistance**

In fact, millions of vaccinated people around the world may soon die of turbo cancer.

This is hard for many people to accept — but then again, the assistant secretary for HHS is currently *a man pretending to be a woman*. When your government refuses to acknowledge basic biology in order to support transvestites during a Maoist cultural revolution, then *anything is possible*.

To make matters worse, Dr. Hiroshi Arakawa has just found the mRNA vaccine in human placentas — which means the “vaccines” transfer from the pregnant woman to her baby.

aussie17
@_aussie17

"A Time Bomb"

From Dr Hiroshi Arakawa, Molecular Biologist, Institute of Molecular Oncology (Milan)

"...even if you appear to be a healthy newborn, you may be carrying a **time bomb** that you don't know when it will go off in the future..."

*"This time, what was **confirmed in the placenta was not only the spike protein, but also the vaccine mRNA itself, and this fact indicates that the transfer of mRNA preparations inoculated to pregnant women into the placenta is a fatal flaw common to all LNP/mRNA preparations.***

*It shows me something again. If LNP-wrapped mRNA can reach the intrauterine environment, the same can be said of LNP-wrapped contaminant DNA. **Contaminant DNA may also be transfected into the fetus, which has a small number of cells.***

*The toxicity of the coronavirus vaccine in the uterine environment **predicts the induction of premature birth and miscarriage, as well as the impact on congenital physical and intellectual disabilities.***

*Or, even if you appear to be a healthy newborn, you may be carrying a **time bomb that you don't know when it will go off in the future. It is believed that the coronavirus vaccine is also largely involved in the current decline in Japan's birth rate. As long as mRNA vaccination continues, there are concerns that the declining birthrate and population decline will further accelerate.***

In 2021, the FDA and the CDC were warned that mRNA vaccines caused cancer by inhibiting the p53 protein.

So, naturally, the FDA and the CDC *continue to recommend* the mRNA vaccines to your friends and family.

That's a sign that both agencies *don't care if you die*.

What does all this mean?

It means that laboratory scientists are now confirming that the mRNA vaccines are a bioweapon. The spike protein is a bioweapon. It's a bioweapon that genetically modifies human beings so that the modifications are permanent — and can be inherited by your offspring.

And if the spike proteins and the turbo cancers don't get you, then fatal maladies like *prion disease* probably will.

Here's a terrifying medical research study to ponder: ["Emergence of a New Creutzfeldt-Jakob Disease: 26 Cases of the Human Version of Mad-Cow Disease, Days After a COVID-19 Injection."](#)

Emily Jayne Casey (Cloonan)

February 22, 2024

Emily Jayne Casey (Cloonan) passed away surrounded by family on 2/22/2024 after a brief battle with Creutzfeldt-Jakob disease (CJD). She is survived by her loving husband Allen, beloved children Liam Henry and Elizabeth Rose (Libby), parents Billy and Kathy Cloonan, brothers Billy Cloonan (Leigh) and Brendan Cloonan (Jamie), Grandmothers Mary Cloonan and Barbara Shelley, in-laws Al and Diane Casey, Sister-in-Law Erin Robinson (John), her cherished Corgi, Winston, along with a crew of friends, cousins, nephews, and nieces.

Emily was born and raised on Long Island in Northport, NY, and earned her undergraduate degree in education from SUNY Geneseo. Upon graduation, she moved to Rochester and made it her new home, finding a great group of friends and an active social life. While earning her master's degree at St John Fisher College, she worked for the Brighton School District. Emily has been an educator at Our Lady of Mercy School for Young Women since 2014, most recently as chair of the Social Studies department. She loved all her students and took great pride in their accomplishments, staying in contact with graduates for many years. She was a beloved and respected educator and colleague. She will be greatly missed by administration, faculty and students alike.

Emily and Allen met on New Year's Eve in 2014 and were married at the Geneseo Valley Club in September 2017, surrounded by a group of family and friends from every stage of her life. They honeymooned in Barcelona, and then built an idyllic life living in the North Winton Village with days consisting of caring for their dogs, entertaining, and traveling. Liam was born in May of 2020, and they moved to Pittsford, quickly pivoting to a family-centered life. They welcomed Libby in March of 2023, and have just begun to see her grow.

Her true passion was being a mother to her two children. She took great pride in everything they did and was always their biggest advocate. Emily's devotion to her family and her unwavering spirit will forever be remembered. Though she may be

This is not a theoretical problem. These deaths are already happening — like Emily Jayne Casey this year. She was a young mother and a teacher in New York who did not deserve to die from a “brief battle” with Creutzfeldt-Jakob disease (CJD) — which is a fatal neurodegenerative disorder. It’s also a prion disease.

How could her battle have been so brief? How is this possible? Probably because the spike protein was engineered that way: “In the Appendix to this paper, we highlight the presence of a prion region in the spike protein of the original SARS-CoV-2, and in all the “vaccine” variants built from the Wuhan virus. The prion region in the spike of SARS-CoV-2 has a density of mutations eight times greater than that of the rest of the spike, and, yet, strangely that entire prion region disappears completely in the Omicron variant.”

As Dr. Luc Montagnier said in one of his last interviews (in June 2021), [the spike protein is a prion which causes mad cow disease, Alzheimer's, Parkinson's, and dementia.](#)

Dr Frensor @drfrensor · 13h ·

Autopsy of patient with encephalitis (brain holes) caused by the spike protein. If it was caused by the virus, there'd be nucleocapsids alongside spike proteins.

Stains did NOT reveal nucleocapsids.

Not caused by Covid.
Caused by jab.

1/2

Presence of **Spike** protein in the respiratory secretions Presence of **Nucleocapsid** protein in the respiratory secretions

Figure 1. Nasal smear from a person with acute symptomatic SARS-CoV-2-infection (confirmed by PCR). Note the presence of ciliated epithelium. Immunohistochemistry for two SARS-CoV-2 antigens (spike and nucleocapsid protein) revealed a positive reaction for both as to be expected after infection. (a) Detection of the spike protein. Positive control for spike subunit 1 SARS-CoV-2 protein detection. Several ciliated epithelia of the nasal mucosa show brownish granular deposits of DAB (red arrow). Compared to the positive control, the DAB-granules are fewer and less densely packed granular deposits of DAB. (b) Detection of nucleocapsid protein. Positive control for nucleocapsid SARS-CoV-2 protein detection. Several ciliated epithelia of the nasal mucosa show dense brownish granular deposits of DAB (red arrow).
1:58

Read that again: *The spike protein itself is a prion.*

Now get ready for the worst news. Are you sitting down? Studies have shown that *prion diseases can be transmitted across species in the air*. Research has proven that transmission through *inhalation of aerosolized prions* can occur in animals.

If you can't yet understand why the CDC and the FDA and the rest of America's government doesn't care if you die — that's because *your death is the point of the exercise.*

That's [the point of the bioweapon.](#)

Our friends and family have become casualties of a war they didn't even know was being waged against them.

IF YOU BELIEVE VACCINES SAVE LIVES I HAVE 40 QUESTIONS FOR YOU

1. Name five vaccine ingredients
2. What is MRC-5?
3. What is WI-38?
4. What is vaccine court?
5. What is the National Vaccine Injury Compensation Program?
6. What is the 1986 National Childhood Vaccine Injury Act?
7. How has the CDC schedule changed since 1986?
8. How much money has been paid out by vaccine injury court?
9. How many doses of how many vaccines are in the CDC schedule between birth and age 16 (70 in US)?
10. Do vaccines contain aborted fetal tissue? If so, which vaccines? How many aborted babies were needed before they found one with the virus necessary to create the vaccine?
11. Do any vaccines contain dog, monkey, pig, and human DNA?
12. What is an adjuvant?
13. What is an antigen?
14. Which arm of the immune system do vaccines stimulate?
15. Which arms of the immune system do natural diseases stimulate?
16. What is transverse myelitis?
17. What is encephalopathy?
18. What is the rate of autism in 2017, what was it in 2000? What was it in 1990?
19. What is glyphosate and is it in vaccines?
20. If your child is injured, who will take physical, emotional, and financial responsibility?
21. What was the Supreme Court's statement on vaccines in 2011?
22. Can you provide a study showing vaccinated vs. unvaccinated health outcomes?
23. Can you show me a safety study proving it is safe to inject multiple vaccines?
24. What is shedding?
25. Do vaccines shed? Which vaccines can shed for up to six weeks?
26. Which vaccines are live virus vaccines?
27. What is the VICP?
28. What is SV40?
29. What is MTHFR (Methylenetetrahydrofolate Reductase)?
30. What is an acceptable amount of aluminum to ingest per day and how much is injected via the Hep B vaccine on day one of life?
31. Can someone who was vaccinated for pertussis still spread pertussis after being exposed to it? If so, for how long?
32. What is the death rate from measles in the US from 2005-2015? From the MMR vaccine in same time frame?
33. What does attenuated mean?
34. Where can I find information about vaccines?
35. Are there vaccine consent forms?
36. Can the vial stopper cause allergic reaction?
37. Can there be serious reactions to vaccines?
38. What is NVIC?
39. Is there any compensation for physicians who have a certain percentage of their patients vaccinated?
40. What's the difference between natural formaldehyde and synthetic? Which one is in vaccines?

Michael Fee Mar 21

If the SP is a PRION, then if you're in close proximity to a hyper-vaccinated, like office sharing or school dormitory, you are living in a cloud of spike protein.
