

Protests in Japan

Thousands of people rallied in Japan on April 13, 2024 against the World Health Organization, the WHO's proposed "Pandemic Treaty" and the COVID-19 jabs.

*April 13, 2024, will be etched in the annals of modern Japanese history as tens of thousands of citizens across the nation came together in a series of pandemic rallies. The protests centered on the widespread opposition to the Pandemic Treaty, with escalating concerns over "infectious disease" and "public health" becoming potent tools for an **unprecedented push** towards what is perceived by many as a **totalitarian surveillance society**.*

From the bustling streets of Ikebukuro to the gatherings at Higashi-Ikebukuro Central Park, the sheer scale of participation speaks volumes.

*Modern history researcher Prof Chikatsu Hayashi's address was a rallying cry to resist the encroaching shadows of global totalitarianism, symbolically referring to the proactive stance against it as "**stopping the third atomic bomb with our hands.**" His poignant discourse highlighted a national movement poised against not only the Pandemic Treaty but also the underlying structures threatening Japan's sovereignty and the well-being of its citizens.*

April 13 marked not just a protest against a treaty but a stand against a future where health becomes a lever for control and surveillance. The massive turnout signifies a critical moment in Japan's civic engagement. It's a call from its people for autonomy, transparency, and the reassessment of global health governance that resonates beyond its borders. Today, Japan stands at the forefront, questioning, challenging, and seeking change for a future where health policy respects national sovereignty and individual rights.

大手メディアさん、この規模のデモを報道しない理由は無いよな？
数字が取れるチャンスなんだから。

.....報道すべきだよな？

#パンデミック条約反対 デモが池袋にて行われております。

@ttmikrs 様より動画引用

Translated from Japanese by Google

Major media, there's no reason not to report on a demonstration of this scale, right?
It's a chance to get some numbers.

Should that be reported?

#パンデミック条約反対 A demonstration is being held in Ikebukuro.

TRANSCRIPT:

Thank you very much for giving me this valuable opportunity to send my message about human rights abuse in the time of COVID-19. My name is Masayasu Inoue, Professor Emeritus of Osaka City University Medical School. My specialty is Molecular Pathology and Medicine.

*The pandemic was used as a **false pretext by the WHO** to **drive vaccinations of all peoples in the world**. A plan was set up to shorten the time to develop vaccines, which usually takes longer than ten years to less than one year. **Operation Warp Speed**. This operation was used to **cover up the misconceptions of the genetic vaccines**. Under the **pretext of saving time, an extremely dangerous method was selected**.*

*That is, intramuscular injection of viral genes to **produce toxic spike proteins directly in human tissues** to stimulate immune system. Because this **is a completely new method and misconceived method that has never applied before in human history**, it is **impossible**, therefore, **for most of doctors to give proper informed consent**. However, due to irresponsible government and media*

campaigns to promote vaccines, 80% of the Japanese has been vaccinated.

*Unfortunately, seven shots have been done so far. This is the most and worst in the world. And **the result was the induction of the terrible drug induced injury that has never seen in human history.** I believe that the fraudulent use of **experimental gene therapy** to healthy people, particularly to healthy children, is an **extreme violation of human rights.** However, Keizo Takemi, Japanese Minister of Health, Labor and Welfare, has been insisting that there is no serious concern about the injury caused by **genetic vaccines.** And without learning from the current situation of injured patients, they plan to construct a new vaccine production system in preparation for the next pandemic. **This is an unbelievable, crazy situation.***

The Japanese government is first in the world to approve a new type of vaccine called self replication replicon vaccine, and plans to start to supply it in this fall and winter. The Ministry of Economy, Trade and Industry is providing a huge amount of subsidies for this project. And factories to produce new vaccines are being built one after another in Japan. I visited these factories directly.

*Furthermore, the Japanese government is currently soliciting large scale clinical trials worth \$900 million from pharmaceutical companies that are taking on the challenge of developing vaccines **to prepare for the next pandemic by Disease X proposed during the Davos** conference this year. It is speculated that the movement by the Japanese government is part of CEPI Coalition for Epidemic Preparedness Innovation's 100 days mission, which aims to shorten the time to one third of Operation Warp Speed. Namely, **they are trying to shorten the vaccine business cycle** by developing a vaccine in hundreds of days. **This is possible only by ignoring the human rights perspective.** Amendments to the WHO, International Health Regulation (IHR), and the so called Pandemic Treaty, which are about to be adopted at the 77th World Health assembly this year, are attempting to give rationality and legal binding force to such unscientific and dangerous crazy plans.*

*If such things continue, there is **high risk that Japan made vaccines will be exported under the guise for false trust.** If Japan were to become a vaccine perpetrator, it would leave **irreparable harm to future generations.** Therefore, **the actions of Japanese government MUST BE STOPPED by international collaborations.***

*Although it has already been three years since I started to give lectures to educate Japanese people about the dangers of vaccines, it is still difficult to penetrate through the sound barriers of mainstream media. **If we tell the truth about vaccines on YouTube, it is deleted within a day.** The reality is that **we are facing censorship and speech suppression almost every day.***

*Therefore, I put my hope in the publication of a book with the last version of speech and published a book with a title "**Withdraw From WHO**" It is difficult to stop this movement because it is now politically hopeless to change the situation of the Japanese government. The message I would like to cover convey to the world is that when Disease X occurs in the future, you should never trust the Japan made vaccine that was developed in a short period of time in order to protect human rights in cases of control that transcend national boundaries.*

I believe that sharing the truth and countries is so important and that this is a step towards unity and solidarity. Only through the process of information exchange between all countries in the world, we can find hope in the midst of despair. I do hope that my statement will help all of you to protect your healthy life and your family. Thank you very much for your attention.

- Prof Masayasu Inoue, Professor Emeritus of Osaka City University Medical School.

You just know, the first thing the controllers would do, is roll out another fake pandemic with accompanying tyrannical measures. Your installed governments would lift up their hands and say, its nothing to do with us guvnor..
